

Research and analysis: Domestic RHI mechanism for budget management: estimated commitments

Updated: July RHI Budget Caps published.

The quarterly forecast shows the current estimated committed expenditure for the next 12 months based on the number of Domestic Renewable Heat Incentive (RHI) applications and accreditations. It advises whether any tariffs will be reduced, the level of reduction, and what the new tariff(s) will be, and when they will take effect.

The monthly budget forecast will be published by the last day of each month. It includes the current estimated committed expenditure for the next 12 months based on the number of RHI applications received. It is for information only and no reductions to tariffs will be made as a result of the information contains.
