

Research and analysis: Water levels: weekly reports for Hampshire, West Sussex and Isle of Wight

Updated: New data uploaded 18 October 2018.

These graphs compare current data with the average, using information from Environment Agency telemetry equipment at remote stations.

The graphs give an overview of recent trends in water levels, but they haven't been subject to quality control. If you need quality-controlled data, please contact the Environment Agency hydrometry and telemetry team in Solent and South Downs on 03708 506 506 ([call charges](#)).
