

Research and analysis: Water situation: national monthly reports for England 2018

Updated: New report published: water situation September 2018.

These reports collect information from the Environment Agency, the Met Office and water companies that measure and monitor:

- the amount of rain that falls
- how dry the soils are and how much rain they can soak up
- the amount of water flowing in rivers
- the amount of water stored below ground in aquifers and above ground in reservoirs

They also present the outlook for river flow and groundwater.
