

Robotics tech helps boost efficiency

To speed up the construction of public housing, the Housing Authority has been embracing innovation and technology, including the use of cutting-edge robots to support manual workers, creating a safer and more efficient environment. Construction robots have been and will be utilised in 37 projects.

News.gov.hk spoke to a site foreman and a Housing Department structural engineer to find out how robots help increase productivity and enhance worker safety.

The story is available at www.news.gov.hk/eng/feature today (October 15) in text and video format.
