

S for IT speaks on “vaccine pass” and “LeaveHomeSafe” mobile app

Following is the transcript of remarks by the Secretary for Innovation and Technology, Mr Alfred Sit, at a media session after attending a radio programme today (February 27):

Reporter: (“vaccine pass” and “LeaveHomeSafe” app)

Secretary for Innovation and Technology: The “vaccine pass” and also the “LeaveHomeSafe” app can help the contact tracing, as a matter of fact we are proactively promoting the vaccine pass so that we can help the contact tracing officers to trace cases more effectively. The Hong Kong SAR Government will continue to make good use of our technology to support the contact tracing and all sorts of anti-epidemic work. Thank you.
