

Samantha Peace appointed HSE Director of Energy Division

The regulator that oversees significant parts of the energy industry has announced a new Director.

The Health and Safety Executive (HSE) has appointed Samantha Peace to lead its Energy Division.

Current Director Chris Flint has chosen to retire. Chris will leave HSE in April next year. Before then, he will lead several projects for HSE and work with Samantha to ensure a smooth transfer.

Samantha, who has worked at HSE for 28 years, has a background in regulation. She joined HSE in 1995 as a factory inspector before moving to senior leadership positions in HSE's Field Operations Division.

Alongside her role with HSE, Samantha is a member of the executive committee of the International Association of Labour Inspection (IALI) where she works with regulators across the world.

Samantha said: "It is a great privilege to be named as HSE's Director of Energy Division. It is well-regarded for its work in areas including regulating offshore energy and has been expertly led by Chris for the last few years. I look forward to beginning my new position and will continue to build on the great work Chris has done during his time as Director."

Chris, who was appointed as Director in 2017, said: "I have thoroughly enjoyed my time as Director of Energy Division at HSE and am pleased that someone as experienced and accomplished as Samantha is taking over. There have been some wonderful projects in the offshore and energy field that I am

very grateful to have worked on and now look forward to tackling new challenges in the Director of Regulation office.”

Jane Lasseby, Acting Director of Regulation at HSE, said: “Alongside everyone at HSE, I congratulate Samantha on her new position. Samantha has excelled in every position she has held with HSE and I am certain she will continue to do the same as Director of our Energy Division.

“I also wish Chris all the best in his new role before retiring next year. Chris oversaw numerous challenges and key projects whilst leading our Energy Division and proved himself as an excellent Director as well as demonstrating his commitment to HSE.”

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain’s national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. hse.gov.uk
