

SB responds to media enquiries on Daya Bay Nuclear Power Station

In response to media enquiries on rumours on social media claiming that an explosion had occurred at the Daya Bay Nuclear Power Station, a spokesman for the Security Bureau today (November 13) clarified that no notification has been received from the relevant Mainland authorities. After verification with the Nuclear Emergency Committee Office of the Guangdong Province, it is confirmed that the nuclear power station is operating normally. Such a rumour is totally groundless and fictitious.

The spokesman appealed to members of the public to pay attention to announcements released through Government official channels and should not believe any rumour lightly.
