

Speech: Spring Statement 2018: Philip Hammond's speech

Mr Speaker.

I am pleased to introduce to the House the first Spring Statement.

The UK was the only major economy to make hundreds of tax and spending changes twice a year.

And major international organisations and UK professional bodies alike have been pressing for change.

In 2016 I took the decision to move to a single fiscal event in the Autumn.

Giving greater certainty to families and businesses ahead of the new financial year.

And allowing more time for stakeholder and parliamentary engagement on potential fiscal changes.

Today's statement will update the House on the economic and fiscal position.

Report progress on announcements made at the two budgets last year.

And launch further consultations ahead of Budget 2018, as set out today in my Written Ministerial Statement.

I won't be producing a Red Book today Mr Speaker.

[political content removed]

Mr Speaker.

I am pleased today to report to the House on a UK economy that has grown in every year since 2010.

And under Conservative Leadership now has a manufacturing sector enjoying its longest unbroken run of growth for fifty years.

An economy which has added 3 million jobs.

And seen:

- every single region of the UK with higher employment and lower unemployment than in 2010
- seen the wages of the lowest paid up by almost 7% above inflation since April 2015
- [political content removed]

Solid progress towards building an economy that works for everyone.

[political content removed]

I, meanwhile, am at my most positively Tigger-like.

As I contemplate a country which faces the future with unique strengths.

Our language is the global language of business.

Our legal system is the jurisdiction of choice for commerce.

We host the world's most global city, and its international finance and professional services capital.

Our companies are in the vanguard of the technological revolution.

While our world-class universities are delivering the breakthrough discoveries and inventions that are powering it.

British culture and talent reaches huge audiences across the globe.

And our tech sector is attracting skills and capital from the four corners of the earth.

With a new tech business being founded somewhere in the UK every hour.

Producing world-class products including apps like TransferWise, CityMapper,

And Matt Hancock.

Mr Speaker.

Today the OBR delivers its second report for the fiscal year 2017-18.

And I thank Robert Chote and his team for their work.

It forecasts more jobs.

Rising real wages.

Declining inflation.

A falling deficit.

And a shrinking debt.

The economy grew by 1.7% in 2017, compared to 1.5% forecast at the Budget.

And the OBR have revised up their forecast for 2018 from 1.4% to 1.5%.

Forecast growth is then unchanged at 1.3% in 2019 and 20, before picking up to 1.4% in 21 and 1.5% in 22.

That's the OBR's forecast Mr Speaker.

But forecasts are there to be beaten.

As a nation, we did it in 2017.

And we should make it our business to do so again!

Our remarkable jobs story is set to continue.

With the OBR forecasting more jobs in every year of this parliament.

And over 500,000 more people enjoying the security of a regular pay-packet by 2022.

I am pleased to report that the OBR expect inflation, which is currently above target at 3%.

To fall back to target over the next 12 months.

Meaning that real wage growth is expected to be positive from the first quarter of 18-19, and to increase steadily thereafter.

Mr Speaker.

I reported in the Autumn that borrowing was due to fall in every year of the forecast.

And debt to fall as a share of GDP from 2018-19.

The OBR confirms this today.

And further revises down debt and borrowing in every year.

Borrowing is now forecast to be £45.2 billion this year.

£4.7bn lower than forecast in November.

And £108bn lower than in 2010.

[political content removed]

As a percentage of GDP, borrowing is forecast to be 2.2% in 17-18.

Falling to 1.8% in 18-19, 1.6% in 19-20, then 1.3%, 1.1% and finally 0.9% in '22-'23.

Meaning that in 18-19 we will run a small current surplus, borrowing only for capital investment.

And we are forecast to meet our cyclically adjusted borrowing target in '20-21 with £15.4bn headroom to spare.

Broadly as forecast at the Budget.

Mr Speaker,

The more favourable outlook for borrowing means the debt forecast is nearly 1% lower than in November.

Peaking at 85.6% of GDP in 17-18.

And then falling to 85.5% in 18-19, then 85.1%, 82.1%, 78.3%, and finally 77.9% in 2022-23.

The first sustained fall in debt in 17 years.

A turning point in the nation's recovery from the financial crisis of a decade ago.

Light at the end of the tunnel.

Another step on the road to rebuilding the public finances [political content removed]

[political content removed]

Mr Speaker.

In Autumn 2016, I changed the fiscal rules to give us more flexibility to adopt a balanced approach to repairing the public finances.

Reducing debt.

Not for some ideological reason.

But to secure our economy against future shocks.

Because we [political content removed] are not so naïve as to think we have abolished the economic cycle.

Because we want to see taxpayers' money funding our schools and hospitals, not wasted on debt interest.

And because we want to give the next generation a fair chance.

But I do not agree with those who argue that every available penny must be used to reduce the deficit.

And nor do I agree with the fiscal fantasists [political content removed] who argue that every available penny should be spent immediately.

We will continue to deliver a balanced approach.

Balancing debt reduction against the need for investment in Britain's future.

Support to hard-working families through lower taxes.

And our commitment to our public services.

Judge me by my record, Mr Speaker [political content removed].

Since Autumn Statement 2016, I have committed to £60 billion of new spending.

Shared between long-term investment in Britain's future.

And support for our public services.

With almost £9 billion extra for our NHS and our social care system.

£4bn going into the NHS in 18/19 alone.

And as I promised at the Autumn Budget.

More to come if, as I hope, management and Unions reach an agreement on a pay modernisation deal for our nation's Nurses and Agenda for Change staff.

Who have worked tirelessly since the Autumn in very challenging circumstances to provide the NHS care that we all value so highly.

£2.2 billion more on education and skills.

And £31 billion going to fund infrastructure, R&D and housing through the National Productivity Investment Fund.

Taking public investment in our schools, hospitals, and infrastructure in this parliament to its highest sustained level in 40 years.

And at the same time we have cut taxes for 31 million working people by raising the personal allowance again in line with our manifesto commitment.

Taking more than 4 million people out of tax altogether since 2010.

Freezing fuel duty for an eighth successive year, taking the saving for a typical car driver to £850 [political content removed].

And raising the National Living Wage to £7.83 from next month, giving the lowest paid in our society a well-deserved pay rise of over £2,000 for a full-time worker since 2016.

Mr Speaker.

Since becoming Chancellor, I have provided an extra £11 billion of funding for 2018/19.

To help with short-term public spending pressures.

And to invest in Britain's future.

In the longer term, I can confirm that, at this year's Budget I will set an overall path for public spending for 2020 and beyond.

With a detailed Spending Review to take place in 2019.

To allocate funding between Departments.

That is how responsible people Budget.

First you work out what you can afford.

Then you decide what your priorities are.

And then you allocate between them.

And if, in the Autumn, the public finances continue to reflect the improvements that today's report hints at.

Then, in accordance with our balanced approach, and using the flexibility provided by the fiscal rules.

I would have capacity to enable further increases in public spending and investment in the years ahead.

While continuing to drive value for money to ensure that not a single penny of precious taxpayers' money is wasted.

A balanced approach.

Getting our debt down.

Supporting our public services.

Investing in our nation's future.

Keeping taxes low.

Building a Britain fit for the future.

And an economy that works for everyone.

Updates since the Budget.

Mr Speaker.

There is much still to do.

Since Autumn 2016 we have set out our plan to back the enterprise and ambition of British business and the hard work of the British people.

A plan to unleash our creators and our innovators.

Our inventors and our discoverers.

To embrace the new technologies of the future.

And to deliver the skills we will need to benefit from them.

To tackle our long-standing productivity challenges.

And to say more loudly than ever that our economy will remain open and outward-looking.

Confident to compete with the best in the world.

We choose to champion those who create the jobs and the wealth on which our

prosperity and our public services both depend.

Not to demonise them.

Mr Speaker,

[political content removed]

The market economy embraces talent and creates opportunity.

Provides jobs for millions and the tax revenues that underpin our public services.

So we will go on supporting British businesses.

We are reducing business rates by over £10 billion.

And we committed at Autumn Budget 2017 to move to triennial revaluations from 2022.

Today I am pleased to announce that we will bring forward the next business rates revaluation to 2021 and make the triennial reviews from that date.

We will launch a Call for Evidence to understand how best we can help the UK's least productive businesses to learn from, and catch-up with, the most productive.

And another on how we can eliminate the continuing scourge of late payments – a key ask from small business.

Because Mr Speaker, we are the champions of small businesses and the entrepreneur.

Since the Budget, we have made substantial progress in our negotiations with the European Union.

To deliver a Brexit that supports British jobs, businesses and prosperity.

And I look forward to another important step forward at the European Council next week.

But we will continue to prepare for all eventualities.

And today my RHF the Chief Secretary is publishing the Departmental allocations of over £1.5 billion of Brexit preparation funding for 2018-19 which I announced at the Autumn Budget.

Our Modern Industrial Strategy sets out our plan to keep Britain at the forefront of new technologies.

With the biggest increase in public R&D spending for four decades.

Much of this new technology depends on high-speed broadband.

And today I can make the first allocations of the £190 million local full fibre challenge fund announced at Autumn Budget and confirm £25 million for the first 5G testbeds.

As our economy changes, we must ensure people have the skills they need to seize the opportunities ahead.

So we've committed over £500 million a year to T-Levels, the most ambitious post-16 reforms in 70 years.

And from next month £50 million will be available to help employers prepare for the rollout of T-Level work placements.

Last week, the Education Secretary and I chaired the first meeting of the National Retraining Partnership between Government, the TUC and the CBI.

And I can re-assure the House, Mr Speaker.

[political content removed]

But there was a clear and shared commitment to training, to prepare the British people for a better future ahead.

And next month our £29 million construction skills fund will open for bids to fund up to 20 construction skills villages around the country.

We're committed as a government to delivering 3 million apprenticeship starts by 2020 with the support of business through the apprenticeship levy.

But we recognise the challenges the new system presents to some small businesses looking to employ an apprentice.

So I can announce today that my Right Honourable Friend the Education Secretary will release up to £80 million of funding to support those small businesses in engaging an apprentice.

We publish a consultation on improving the way the tax system supports self-funded training by employees and the self-employed.

And because we currently understand more about the economic pay-back from investing in our infrastructure than we do about investment in our people.

I have asked the ONS to work with us on developing a more sophisticated measure of human capital.

So that future investment can be better targeted.

Mr Speaker, we're undertaking the largest road building programme since the '70s.

As Transport Secretary, I gave the green light to fund the new bridge across the River Mersey in 2011.

And I was delighted to see it open late last year.

The largest infrastructure project in Europe, Crossrail, is due to open in just 9 months' time.

We're making progress on our plans to deliver the Cambridge-Milton Keynes-Oxford Corridor.

We're devolving powers and budgets to elected mayors across the Northern Powerhouse and Midlands Engine.

We're in negotiations for city deals with Stirling and Clackmannanshire, Tay Cities, Borderlands, North Wales, Mid Wales, and Belfast.

And today we invite proposals from cities across England for the £840 million fund I announced at the Budget to deliver on their local transport priorities.

As part of our plans to spread growth and opportunity to all parts of this United Kingdom.

And at the heart of our plan for building an economy that works for everyone is our commitment to tackle the challenges in our housing market.

With an investment programme of £44 billion to raise housing supply to 300,000 a year by the mid-2020s.

And today I can update the House.

We are working currently, with my Right Honourable Friend the Housing Minister, with 44 authorities who have bid into the £4.1 billion Housing Infrastructure Fund, to unlock homes in areas of high demand.

We are concluding housing deals with ambitious authorities who have agreed to deliver above their Local Housing Need.

And I can announce today that we have just agreed a deal with the West Midlands to have committed to deliver 215,000 homes by 2030-31, facilitated by a £100 million grant from the Land Remediation Fund.

And my Right Honourable Friend the Housing Minister will make further announcements on the over the next few days on the Housing Infrastructure Fund.

We will more than double the size of the Housing Growth Partnership with Lloyds Banking Group to £220 million, to help providing additional finance for small builders.

And London will receive an additional £1.7 billion to deliver a further 26,000 affordable homes, including homes for social rent, taking total affordable housing delivery in London to over 116,000 by the end of 2021-22.

Mr Speaker, my Right Honourable Friend for West Dorset has outlined his initial findings on the gap between planning permissions granted and housing completions.

In a letter which I have placed in the Library of the House.

And I look forward to his full report at the Budget.

And I am delighted to inform the House that an estimated 60,000 First Time Buyers have already benefited from the Stamp Duty relief I announced at the Autumn Budget.

[political content removed]

In the Autumn, we published a paper on taxing large digital businesses in the global economy.

And today we follow up with a publication that explores potential solutions.

And I look forward to discussing this issue with G20 Finance Ministers in Buenos Aires at the weekend.

We also publish a call for evidence on how online platforms can help their users to pay the right amount of tax.

We will consult on a new VAT collection mechanism for online sales.

To ensure that the VAT consumers pay actually reaches the Treasury.

And we will call for evidence, too, on how to encourage cashless and digital payments, while ensuring cash remains available to those who need it.

Mr Speaker.

This government is determined that our generation should leave the natural environment in a better state than we found it.

And improve the quality of the air we breathe.

So we will publish a call for evidence on whether the use of non-agricultural red diesel tax relief contributes to poor air quality in urban areas.

And following our successful intervention to incentivise green taxis, we'll help the Great British White Van driver go green with a consultation on reduced VED rates for the cleanest vans.

And follow up on the vital issue of plastic littering and the threat to our oceans.

With a call for evidence to support us in delivering on our vow to tackle this complex issue.

It will look at the whole supply chain for single use plastics.

At alternative materials.

Reusable options.

And recycling opportunities.

And it will look at how the tax system can help drive the technological progress and behavioural change we need.

Not as a way of raising revenue.

But as a way of changing behaviour.

And encouraging innovation.

We'll commit to investing to develop new, greener, products and processes.

Funded from the revenues that are raised.

And as a downpayment Mr Speaker, we'll award £20m now from existing departmental budgets to businesses and universities, to stimulate new thinking and rapid solutions in this area during the call for evidence.

Mr Speaker,

We are delivering on our plan.

With a balanced approach.

Restoring the public finances.

Investing in our economy and our public services.

Raising productivity through our modern industrial strategy.

Building the homes our people need.

Tackling the environmental challenges that threaten our future.

Embracing technological change, seizing the opportunities ahead.

As we build our vision of a country that works for everyone.

An economy where prosperity and opportunity are in reach of all.

Wherever they live.

Whatever their gender, colour, creed or background.

Where talent and hard work alone determine success.

A beacon of enterprise and innovation.

An outward looking, free-trading nation.

One that is confident that our best days lie ahead of us.

A force for good in the world.

A country we can all be proud to pass on to our children.

And, I commend this statement to the House.

[News story: Pioneering treatment could save limbs on the battlefield](#)

Biomedical engineers are pioneering a new technique for treating injured limbs which could reduce amputations after battlefield injuries.

The technique has been developed by researchers at the University of Strathclyde, Glasgow and funded by the Defence Science and Technology Laboratory (Dstl) through the Defence and Security Accelerator.

Created in response to the experiences of Iraq and Afghanistan, where improvised explosive devices caused traumatic injury, the three-stage approach is a brand-new technique that brings together kit that can be used in the field, with highly specialised solutions once the patient is evacuated to a hospital.

A novel tourniquet is applied to the limb, which applies pressure at different points, reducing pressure and damage to specific areas. A cooling 'sock' is then wrapped around the tissue, to preserve it from further damage until the casualty can be evacuated to a care facility. Once at a hospital, the limb is placed inside a protective 'box', which can sustain the area while doctors attempt repairs. The box has specially decontaminated air to reduce infection, and continually supplies the affected area with blood.

Weighing only five kilogrammes, the technology is specially designed for deployment on operations, and used by combat medics. The system could also be used in a non-military setting, for example natural disasters or remote locations.

Following successful trials, the system is set to be available commercially, and could one day form part of the medical kit in every frontline unit.

Dr Neal Smith, Capability Adviser, Medical Sciences, from Dstl, said:

While this technique may not be right for every injury, it is a hugely important innovation that could save the limbs of many more of those affected. It's a fantastic example of where we work with academics to fund life-changing research which has been turned into a product to improve the quality of life of those injured in service.

Professor Terry Gourlay, Head of the Department of Biomedical Engineering at Strathclyde University, said:

We looked at every stage of the journey an injured soldier follows after injury to ensure our solution was designed specifically for them.

The system we have developed is essentially a life-support system for the limb which gives doctors precious time to attempt to repair damage while ensuring the safety of the patient.

Professor Gourlay's team also pioneered the blood salvaging technique known as HemoSep, which allows blood lost in surgery to be transfused directly back to the patient, reducing the need to donated blood. A military version of the HemoSep project was also funded by Dstl.

Find out more about our [Protecting Our People Programme](#).

Statement to Parliament: PM Commons statement on Salisbury incident: 12 March 2018

With permission, Mr Speaker, I would like to update the House on the incident in Salisbury – and the steps we are taking to investigate what happened and to respond to this reckless and despicable act.

Last week my Rt Hon Friends, the Foreign and Home Secretaries, set out the details of events as they unfolded on Sunday the 4th of March.

I am sure the whole House will want to once again pay tribute to the bravery and professionalism of our emergency services and armed forces in responding to this incident, as well as the doctors and nurses who are now treating those affected.

Our thoughts, in particular, are with Detective Sergeant Nick Bailey who remains in a serious but stable condition. In responding to this incident, he exemplified the duty and courage that define our emergency services; and in which our whole nation takes the greatest pride.

Mr Speaker, I want to pay tribute to the fortitude and calmness with which people in Salisbury have responded to these events and to thank all those who have come forward to assist the police with their investigation.

This incident has, of course, caused considerable concern across the

community. Following the discovery of traces of nerve agent in Zizzi's restaurant and The Mill pub, the Chief Medical Officer issued further precautionary advice. But as Public Health England have made clear, the risk to public health is low.

Mr Speaker, I share the impatience of this House and the country at large to bring those responsible to justice – and to take the full range of appropriate responses against those who would act against our country in this way.

But as a nation that believes in justice and the rule of law, it is essential that we proceed in the right way – led not by speculation but by the evidence.

That is why we have given the police the space and time to carry out their investigation properly.

Hundreds of officers have been working around the clock – together with experts from our armed forces – to sift and assess all the available evidence; to identify crime scenes and decontamination sites and to follow every possible lead to find those responsible.

That investigation continues and we must allow the police to continue with their work.

Mr Speaker, this morning I chaired a meeting of the National Security Council in which we considered the information so far available. As is normal, the Council was updated on the assessment and intelligence picture, as well as the state of the investigation.

It is now clear that Mr Skripal and his daughter were poisoned with a military-grade nerve agent of a type developed by Russia.

This is part of a group of nerve agents known as 'Novichok'.

Based on the positive identification of this chemical agent by world-leading experts at the Defence Science and Technology Laboratory at Porton Down; our knowledge that Russia has previously produced this agent and would still be capable of doing so; Russia's record of conducting state-sponsored assassinations; and our assessment that Russia views some defectors as legitimate targets for assassinations; the Government has concluded that it is highly likely that Russia was responsible for the act against Sergei and Yulia Skripal.

Mr Speaker, there are therefore only two plausible explanations for what happened in Salisbury on the 4th of March.

Either this was a direct act by the Russian State against our country.

Or the Russian government lost control of this potentially catastrophically damaging nerve agent and allowed it to get into the hands of others.

This afternoon my Rt Hon Friend the Foreign Secretary has summoned the

Russian Ambassador to the Foreign and Commonwealth Office and asked him to explain which of these two possibilities it is – and therefore to account for how this Russian-produced nerve agent could have been deployed in Salisbury against Mr Skripal and his daughter.

My Rt Hon Friend has stated to the Ambassador that the Russian Federation must immediately provide full and complete disclosure of the Novichok programme to the Organisation for the Prohibition of Chemical Weapons.

And he has requested the Russian Government's response by the end of tomorrow.

Mr Speaker, this action has happened against a backdrop of a well-established pattern of Russian State aggression.

Russia's illegal annexation of Crimea was the first time since the Second World War that one sovereign nation has forcibly taken territory from another in Europe.

Russia has fomented conflict in the Donbas, repeatedly violated the national airspace of several European countries, and mounted a sustained campaign of cyber espionage and disruption. This has included meddling in elections, and hacking the Danish Ministry of Defence and the Bundestag, among many others.

During his recent State of the Union address, President Putin showed video graphics of missile launches, flight trajectories and explosions, including the modelling of attacks on the United States with a series of warheads impacting in Florida.

While the extra-judicial killing of terrorists and dissidents outside Russia were given legal sanction by the Russian Parliament in 2006.

And of course Russia used radiological substances in its barbaric assault on Mr Litvinenko. We saw promises to assist the investigation then, but they resulted in denial and obfuscation – and the stifling of due process and the rule of law.

Mr Speaker, following Mr Litvinenko's death we expelled Russian diplomats, suspended security co-operation, broke off bilateral plans on visas, froze the assets of the suspects and put them on international extradition lists. And these measures remain in place.

Furthermore our commitment to collective defence and security through NATO remains as strong as ever in the face of Russian behaviour.

Indeed our armed forces have a leading role in NATO's Enhanced Forward Presence with British troops leading a multinational battlegroup in Estonia.

We have led the way in securing tough sanctions against the Russian economy.

And we have at all stages worked closely with our allies and we will continue to do so.

We must now stand ready to take much more extensive measures.

Mr Speaker, on Wednesday we will consider in detail the response from the Russian State.

Should there be no credible response, we will conclude that this action amounts to an unlawful use of force by the Russian State against the United Kingdom.

And I will come back to this House and set out the full range of measures that we will take in response.

Mr Speaker, this attempted murder using a weapons-grade nerve agent in a British town was not just a crime against the Skripals.

It was an indiscriminate and reckless act against the United Kingdom, putting the lives of innocent civilians at risk.

And we will not tolerate such a brazen attempt to murder innocent civilians on our soil.

I commend this Statement to the House.

[Press release: Chair appointed to lead review of press sustainability in the UK](#)

Since 2001 UK newspaper circulation has halved and over 200 local newspapers have closed their doors since 2005. With a rapidly changing media world, news reaches people through many new channels, and existing publications have often had to compete with digital media.

[Terms of reference](#) published today outline how the Cairncross review will investigate the overall state of the market, threats to financial sustainability, the role and impact of digital search engines and social media platforms, how content and data flows are operated and managed and the role of digital advertising.

Speaking at the Oxford Media Convention, Secretary of State for Digital, Culture, Media and Sport Matt Hancock said:

Although the internet has been an immense force for good, it has torn apart the established order and raised real questions about the sustainability and profitability of traditional journalism.

Dame Frances Cairncross will bring her experience in journalism and academia to tackle these issues with a view to examine the press

and protect the future of high quality journalism.

Dame Frances Cairncross said:

Having spent much of my working life as a journalist, and seen how the digital revolution has changed both the fortunes of newspapers and the opportunities for distributing news, I am excited to be undertaking this review.

This is both a challenging and an exciting time for the press, both locally and nationally, and I hope the review will clarify both ways to ensure the future of high quality journalism and the options for public policy.

Dame Frances Cairncross will be supported by a panel of experts which includes experts in the fields of journalism, academia, advertising and technology. The panel will act in an advisory capacity, with the review's final report and recommendations being determined by and issued in the name of the chair. The panel includes: Peter Wright, Matt Rogerson, Ashley Highfield, Geraldine Allinson, Mimi Turner, Douglas McCabe, Stephen Woodford, Akshat Rathi, Polly Curtis, and Azeem Azhar.

As well as identifying challenges, the review will make recommendations on what industry and government action can be taken, with a final report expected later this year.

Note to editors:

Dame Frances Cairncross is a former economic journalist, author and academic administrator. She is currently Chair of the Court of Heriot-Watt University and a Trustee at the Natural History Museum. Dame Frances was Rector of Exeter College, Oxford University; a senior editor on The Economist; and principal economic columnist for the Guardian. In 2014 she was made a Dame of the British Empire for services to education. She is the author of a number of books, including "The Death of Distance: How the Communications Revolution is Changing our Lives" and "Costing the Earth: The Challenge for Governments, the Opportunities for Business". Dame Frances is married to financial journalist Hamish McRae.

Advisory panel members:

Jo Adetunji

Jo Adetunji is a journalist and Deputy Editor at The Conversation UK, a comment and analysis website that delivers evidence-based, accessible journalism by experts from universities across the UK and Europe. The Conversation aims to bridge the gap between academic knowledge and the public via a newsroom of editors. Jo has worked in more traditional media as a reporter for The Guardian, covering stories from UK knife crime to live blogging the Arab Spring, and has also written for The Independent. She

recently contributed to Philanthropic Journalism Funding in the UK, a report commissioned by the European Journalism Centre, and was an interviewer for the latest round of the Journalism Diversity Fund. She holds a degree in the History of Art from The Courtauld Institute of Art in London.

Geraldine Allinson

Geraldine is the Chairman of the KM Media Group, part of Iliffe Media. KM is a Local Multimedia business that serves the people and organisations of Kent through Newspapers, Radio, Online and more recently local TV. The company employs award winning journalists and has highly trusted brands within its stable of products. Through online, print and broadcast KM reaches over 1 million people each week. Geraldine has been with KM Media Group since 1993 and became its Chairman in 2006. Prior to this she worked for Northcliffe Newspapers and the Midland News Association. She is currently a Non-executive Director at the PA Group (parent company of the Press Association), Director of the Radiocentre and a Director of the News Media Association (NMA). Previous industry positions include: President of the Newspaper Society, Chairman of the Independent Publishers Forum and the Weekly Independent Newspaper Association.

Azeem Azhar

Azeem runs Exponential View, a newsletter looking at how our world is changing in the face of the accelerating pace of technology. This is built on the back of 20 years as an entrepreneur, corporate innovator and journalist. He is currently senior adviser to the Chief Technology & Innovation Officer at Accenture, focusing on frontier technologies. Azeem advises Harvard Business Review, the Huxley Summit and several founders of disruptive technology firms. He lives in London with his wife and three children.

Polly Curtis

Polly Curtis joined HuffPost UK in August 2017 as Editor-in-Chief with 17 years of media industry experience. Immediate prior to joining HuffPost, Polly was director of media for British Red Cross during a time that included the organisation's largest emergency response in decades, as they operationalised after the Manchester bombing, London Bridge and Finsbury Park attacks and at Grenfell. Prior to her position at British Red Cross, Polly was digital editor at The Guardian, where she led digital plans for the Scottish referendum, the EU referendum and the 2015 election as well as the live coverage of some of the biggest breaking stories in recent times. She has a background as a news editor and reporter, having served as the Guardian's deputy national editor, Whitehall correspondent, education editor and health correspondent.

Ashley Highfield

Ashley Highfield is CEO of Johnston Press plc, one of the largest local media groups in the UK, and owner of the i newspaper. He has worked in high levels in companies including Microsoft – where he was UK Managing Director (Consumer & Online) – and the BBC, where as executive board director for New

Media & Technology, he was responsible for the development and launch of BBC iPlayer. During his tenure there he oversaw a growth in the BBC's online presence from 3.5m to 17m users. In June 2015 Culture Secretary John Whittingdale named Ashley as one of the advisory board members tasked with working on the renewal of the BBC's Royal Charter, which led to the local democracy reporter initiative. In October 2015 he was appointed Chairman of the News Media Association for a two year period. He has previously served on the boards of William Hill plc and the British Film Institute in non-executive roles.

Douglas McCabe

Douglas is a leading expert in tech and publishing media. He analyses supplier strategies and forecasts consumption, revenue and marketing expenditure. He is a former director of Fish4, the online advertising portal, and was director of sales development and market insights at Waterstones. Douglas holds a degree from Stirling University.

Akshat Rathi

Akshat Rathi has worked for both established publications and new media startups. He is a reporter for Quartz, covering science and energy, and previously worked for The Economist and The Conversation. His work has also been published in The Guardian, The Hindu, and Nature. He holds a doctorate in chemistry from the University of Oxford.

Matt Rogerson

Matthew Rogerson is the Head of Public Policy at Guardian Media Group (GMG). Matthew joined GMG in 2013 following 5 years at Virgin Media, where he worked on a range of issues, including responses to the Digital Britain report, the Government's Communications Review, and broadband policy. Matthew's work at GMG covers areas such as press freedom, media plurality, digital advertising and brand safety, and the changing nature of digital news. Before working in the private sector, Matthew worked as a parliamentary researcher.

Mimi Turner

Mimi Turner is Founder of brand strategy consultancy Mimi Turner Associates and has more than twenty years experience in print and digital publishing. Mimi has been instrumental in growing some of the UK's biggest digitally disruptive media brands including the Lad Bible, GIVEMESPORT and Vice Media, and has developed a deep understanding of millennial and Gen Z audiences. She is a board advisor to TRUTH, the media agency using blockchain technology to provide transparency in the advertising supply chain, and is an advisor to online video platform Suggestv, which helps publishers build brand context through video. Prior to transforming the Lad Bible, Mimi spent three years working for Richard Desmond as Group Director of Communications of Express Newspapers, Channel 5 and OK Magazine, and was also Sales and Marketing Director of The Health Lottery. Mimi spent over a decade in journalism with the Hollywood Reporter and began her career writing about science and

technology for the Sunday Times and the Times.

Stephen Woodford

Stephen was appointed CEO of the Advertising Association in September 2016. Having held management roles in three agencies (Leo Burnett, WCRS/Engine and DDB/adam&eveDDB), Stephen currently chairs youth marketing agency Livity, a social purpose-driven business that seeks to transform young peoples' lives, especially from BAME backgrounds. He was recently Chairman of Lexis PR and a founder and director of U, a challenger to conventional banks. Stephen is a past President of NABS and serves on the board of the History of Advertising Trust. He was IPA President (2003-05) where he led both their first ethnic diversity initiative and transformed its professional qualifications for new industry entrants, which over 15,000 people have now sat and passed.

Peter Wright

Peter Wright has been Editor Emeritus of Associated Newspapers, publishers of the Daily Mail, Mail on Sunday, MailOnline and Metro, since 2012. He was Editor of The Mail on Sunday 1998-2012. He is a member of the Independent Press Standards Organisation (IPSO) Complaints Committee, and the News Media Association Legal, Policy and Regulatory Affairs Committee. He is also a member of the Thomson Reuters Founders Share Company Nominations Committee. Previously he was a commissioner and later director of the Press Complaints Commission (2008-14) and the Editors' Code of Practice Committee (2004-8). He sat on the Defence, Press and Broadcasting Advisory Committee Review (2014-15).

Government response: Statement on former Ofcom board member

In the summer of 2016, Bill Emmott stepped down as chair of Ofcom's Content Board and as a non-executive director on the main Board, posts to which he had been appointed in December 2015. The parties were unable to agree the terms of Mr Emmott's departure.

Appointments to Ofcom are the responsibility of the Secretary of State for the Department for Digital, Culture, Media & Sport (DCMS). Mr Emmott subsequently brought judicial review proceedings in the High Court against the Secretary of State, challenging the decision as to how his appointment should be formally brought to an end.

During the time that he was in post, Mr Emmott, a distinguished former Editor of the Economist, brought substantial editorial and leadership experience to both the Content Board and main Board.

The parties now recognise that his departure from the post reflected changed circumstances since his recruitment and have agreed formal terms to resolve the dispute between them.

The DCMS is grateful to Mr Emmott for his significant contribution and commitment to Ofcom.
