

Seabraes Bridge – lift

Residents pointed out to me that there is still no signage at the Seabraes Bridge to let people know who to call if the bridge is out of order.

I contacted the engineer responsible for the bridge maintenance and he has updated me as follows :

“At present there is no signage on the bridge to advise users of the phone number to call in order to report a fault with the lift.

I have been advised that the call out telephone number is likely to change at the end of February, therefore I will arrange for a temporary sign with the current number to be displayed at the bridge by the end of this week.

Once the new number is confirmed late February, I will arrange for a more permanent sign to be installed.”
