

Service suspension of community testing centres and mobile specimen collection stations

A spokesman for the Food and Health Bureau announced today (October 12) that testing services at all community testing centres (CTCs) have been suspended due to the issuing of Tropical Cyclone Warning Signal No. 8. In addition, all mobile specimen collection stations have been closed and testing services suspended.

If Tropical Cyclone Warning Signal No. 8 is cancelled at or before 2pm tomorrow (October 13), the testing services of the indoor mobile specimen collection stations will start to resume in two hours after the relevant signal is cancelled.

If Tropical Cyclone Warning Signal No. 8 is cancelled at or before 6pm tomorrow (i.e. two hours before the normal closing time of the CTCs), the testing services of the CTCs will start to resume in two hours after the relevant signal is cancelled.
