

Statutory guidance: SR2012 No 10: on-farm anaerobic digestion facility using farm wastes only, including use of the resultant biogas

Updated: Updated SR2012 No 10: on-farm anaerobic digestion facility using farm wastes only, including use of the resultant biogas

Standard rules are limited to premises used for agriculture and to wastes arising from on-farm activities, including dairies. They're available to operators with an anaerobic digestion capacity of less than 100 tonnes of waste or a combination of waste and non-waste, both solid and liquid, on any one day.

You can apply online for most standard rules environmental permits.
