

Statutory guidance: SR2012 No 9: on-farm anaerobic digestion using farm wastes

Updated: We updated Standard Rules SR2012 No 9 – On-farm anaerobic digestion facility using farm wastes only, including use of the resultant biogas

These rules are limited to premises used for agriculture and to wastes arising on-farm, including dairies.

They are available to operators with an anaerobic digestion capacity of over 100 tonnes of waste or a combination of waste and non-waste (both solid and liquid) on any one day.

You can apply online for most standard rules environmental permits.
