

Landscape Orbs

As part of welters® commitment to achieving zero waste working practices, all by-product materials produced in cast stone manufacturing is now being utilised as a structural landscape commodity.

Example visual of Landscape Orbs used for bank stabilisation

The Landscape Orbs are created using irregular spheroid formations of cast stone, which are cured into solid forms. These are perfect for uses such as bank stabilisation, erosion protection or as naturalised stone features in their own right.

Government World and welters world new editions

The latest editions of **Government WORLD** and the **welters world** supplemental are available to download on the Government World website.

Government WORLD magazine is published quarterly and covers news items from local government and the main UK political parties over each three month period. The next edition will be published in June.

welters world covers the work and innovations carried out by **welters organisation worldwide** over each subsequent quarter and is the main supplement to the magazine.

The publications are available in hard copy, digital download and USB *slim card* formats.

What We Do

Dear colleagues and customers, thank you for visiting us at the ICCM Education Seminar!

We have been attending and supporting ICCM Conference Events for over twenty years, providing a wide range of products and services to its Members and the Industry in general. Please take a moment to study the basics of 'what we do' and how we can help you in your service provision.

We look forward to working with you!

Kindest regards

Keith Welters

www.welters-worldwide.com

ICCM Education Seminar supported by welters for over twenty years

welters® organisation introduced the concept of single cast burial chambers, mausolea cells and memorial housings to the industry over 30 years ago and the company continues to design, manufacture, supply and install these facilities nationwide.

By operating its own manufacturing facility, the company avoids using third party concrete producers or subcontractors, resulting in an unrivalled standard of production quality and consistency.

welters Heritage Galloway cattle breeding programme

Blizzard conditions ensue as the naturally insulated heifers patiently await insemination

March 2018 began with selected heifers from **welters**[®] award winning Galloway cattle herds undergoing artificial insemination (AI) procedures in readiness for calving in late Summer.

AI technician performing the delicate insemination process

This breeding programme is an important part of **welters**[®] ongoing commitment to protecting native species and resources in the UK.

The process is carried out by a skilled AI technician to ensure a good success rate within the herd.

A fully mature Galloway heifer will normally be in estrus or 'heat' every 18-24 days and it takes an experienced herdsman to spot when the cow is displaying heat signals and to plan the AI procedure accordingly.

Timing is crucial as the heifer will begin ovulation towards the end of the heat cycle, which only provides a short window of 12-18 hours to inseminate.

The procedure is over quickly and is not stressful for the animal

With such a time-critical process, there can be no delays and even sub-zero temperatures, the worst winter in decades and the coldest March on record will not prevent the **welters**[®] intrepid and dedicated farm staff from completing this important work.

The farm is looking forward to the new Galloway additions joining the herd later in the year, ensuring good breeding stock for the future.

[**welters Stone Midi Family Mausoleum**](#)

welters®

ORGANISATION
WORLDWIDE
Design and Innovation
Four Interment Mausoleum

Family mausoleum for four interments comprising of:

- Architectural decorative base plinth set on a concrete foundation
- Precast concrete interment cell super-structure
- Decorative stone corner posts
- Natural stone cladding to sides and rear
- Decorative 900 front tablets
- Decorative stone pediment with fleur-de-lis

The mausoleum will be fitted with blank granite tablets. The granite front tablet inscriptions and bronze ornaments shown here are examples for display purposes only and not included in the specification.

All inscription work and bronzes selections will be made and quoted for separately at the time of need after the installation is complete.

Page 1 of 1

welters Stone Midi Family Mausoleum

The welters Stone Midi Family Mausoleum provides an affordable family sized memorial structure. The mausoleum is manufactured from decorative cast stone with moulded stone fronts inlaid with polished black granite for inscriptions.

The model shown offers up to four interments. Variations are available for two and six interments as required.

As with all other family mausoleum designs, the Stone Midi Family Mausoleum is available direct to the public or through the authorising Cemetery Authority, where applicable.
