

## **Import of poultry meat and products from Tuaran District of Sabah State in Malaysia suspended**

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department announced today (August 7) that in view of a notification from the World Organisation for Animal Health (OIE) about an outbreak of highly pathogenic H5N1 avian influenza in Tuaran District of Sabah State in Malaysia, the CFS has instructed the trade to suspend import of poultry meat and products, including poultry eggs, from the district with immediate effect to protect public health in Hong Kong.

A CFS spokesman said that Hong Kong imported about 100 tonnes of frozen poultry meat and 190million poultry eggs from Malaysia in the first six months of this year.

"The CFS has contacted the Malaysian authorities over the issue and will closely monitor information issued by the OIE on avian influenza outbreaks. Appropriate action will be taken in response to the development of the situation," the spokesman said.

## Yuen Long recycling site raided by EPD for illegal handling of hazardous electronic waste (with photos)

A recycling site in Yuen Long, which illegally handled hazardous electronic waste (e-waste), was raided during an inter-departmental blitz enforcement operation in January by the Environmental Protection Department (EPD). The company concerned, Mei Wah Environmental (Hong Kong) Company Limited, was convicted at Fanling Magistrates' Courts today (August 7) for contravening the Waste Disposal Ordinance (WDO) and the Waste Disposal (Chemical Waste) (General) Regulation and was fined a total of \$130,000. This company was also fined \$41,000 in May this year for contravening the WDO and the Regulation.

An EPD spokesman said that a blitz operation was jointly conducted with the Police in January this year at various open recycling sites at Shan Ha Tsuen in Yuen Long. It was found that a recycling site operated by Mei Wah Environmental (Hong Kong) Company Limited illegally stored waste printed circuit boards (PCBs) and LCD monitors, which are classified as chemical waste. About 6 700 waste LCD monitors and five bags of waste PCBs weighing about 1.2 tonnes were found during the operation, with a total market value of approximately \$800,000. Upon investigation and evidence gathering, the EPD initiated prosecution against the operator of the recycling site concerned in accordance with the Regulation.

The spokesman stressed that dismantled or destroyed PCBs, LCD monitors and cathode ray tubes are hazardous e-waste, containing heavy metals and other toxic substances. They are classified as chemical waste and are regulated under the existing laws on chemical waste disposal. The EPD is all along been committed to combating the illegal collection, storage, handling and import and export activities of hazardous e-waste. Anyone who violates the above laws shall be liable to a maximum fine of \$200,000 and six months' imprisonment for the first conviction. For subsequent offences, offenders are liable to a maximum fine of \$500,000 and two years' imprisonment.

Members of the public may visit the EPD's website for more information about the control of chemical waste:
