

Elderly reminded to take precautionary measures during cold spell

Attention Duty Announcers, Radio and TV Stations:

Please broadcast the following special announcement immediately, and repeat it at frequent intervals:

With the approach of cold weather, the Social Welfare Department (SWD) reminds the elderly to take precautionary measures during the cold spell. Relatives, friends and neighbours are encouraged to show concern and care for the health of frail elderly persons, particularly those living alone. Those in need may call the SWD hotline at 2343 2255 for assistance.

CHP reminds public on precautions against cold weather

The Centre for Health Protection (CHP) of the Department of Health (DH) today (January 27) reminded the public, particularly the elderly and people with chronic illnesses, to adopt appropriate measures to protect their health in view of the cold weather.

A spokesman for the CHP said that cold weather can easily trigger or exacerbate diseases, especially among the elderly and persons suffering from heart disease, respiratory illness or other chronic illnesses.

"Elderly people have less insulating fat beneath their skin to keep them warm and their body temperature control mechanism may be weaker. Their body may not be able to appropriately respond to the cold weather," the spokesman said.

Some senior persons may have decreased mobility, which can in turn impair their ability to generate and conserve body heat. Chronic illnesses, such as hypertension, diabetes and endocrine disorders may undermine the health of elderly people and lower their metabolic rate, subsequently causing their body to generate less heat. Persons with chronic illnesses such as chronic respiratory illnesses or heart disease are vulnerable to disease aggravation due to cold weather.

The CHP reminded the public, in particular the elderly and persons with chronic illnesses, to adopt the following preventive measures:

- Take note of the weather forecast. Wear warm clothing, including hats, scarves, gloves and socks accordingly;
- Consume sufficient food to ensure adequate calorie intake;
- Perform regular exercise to facilitate blood circulation and heat production;
- Stay in a warm environment and avoid prolonged outdoor exposure;
- Use heaters with care, and maintain adequate indoor ventilation; and
- Seek medical advice if feeling unwell.

In addition, the public should avoid alcoholic beverages.

"Drinking alcohol cannot keep you warm. Alcohol accelerates the loss of body heat through dilated blood vessels, resulting in chilling instead," the spokesman said.

"Parents should ensure that babies are sufficiently warm, but it is also important to keep babies relatively lightly clothed to avoid overheating them," the spokesman added.

Parents should observe the following safety measures when putting their children to bed:

- Keep the room well ventilated and at a comfortable temperature;
- Always place babies on their back to sleep. Leave their head, face and arms uncovered during sleep;
- Babies do not need pillows. Place babies on a firm and well-fitted mattress to sleep. Avoid soft objects, pillows and loose bedding;
- Let babies sleep in a cot placed in the parents' room and near their bed; and
- Maintain a smoke-free environment.

In addition, seasonal influenza vaccination is recommended for all persons aged 6 months or above except those with known contraindications. Persons at higher risk of getting influenza and its complications, including the elderly and children, should receive seasonal influenza vaccination early. Please see details of the vaccination schemes on the [CHP's website](#).

A person who gets influenza and COVID-19 at the same time may be more seriously ill and would have a higher risk of death. Influenza vaccination may reduce the likelihood of hospitalisation and the length of stay. It is important for elderly persons, especially those residing in residential care homes, to receive both seasonal influenza vaccination and COVID-19 vaccination. They should also receive an additional booster against COVID-19 according to recommendations as soon as possible. The public should also maintain good personal and environmental hygiene against respiratory illnesses and note the following:

- Surgical masks can prevent transmission of respiratory viruses from ill persons. It is essential for persons who are symptomatic (even if having mild symptoms) to wear a surgical mask;

- Wear a surgical mask when taking public transport or staying in crowded places. It is important to wear a mask properly, including performing hand hygiene before wearing and after removing a mask;
- Avoid touching one's eyes, mouth and nose;
- Wash hands with liquid soap and water properly whenever possibly contaminated;
- When hands are not visibly soiled, clean them with 70 to 80 per cent alcohol-based handrub;
- Cover the mouth and nose with tissue paper when sneezing or coughing. Dispose of soiled tissue paper properly into a lidded rubbish bin, and wash hands thoroughly afterwards;
- Maintain good indoor ventilation;
- When having respiratory symptoms, wear a surgical mask, refrain from work or attending classes at school, avoid going to crowded places and seek medical advice promptly; and
- Maintain a balanced diet, exercise regularly, take adequate rest, do not smoke and avoid overstress.

Food-borne diseases, particularly those linked to hot pot cuisine, are also common in cold weather. The following preventive measures should be taken:

- Wash hands before handling and consuming food;
- Do not patronise unlicensed vendors or those with poor hygienic standards while selecting food;
- Wash and cook all food thoroughly;
- Vegetables should be washed thoroughly in clean running water before cooking and consumption. When appropriate, scrub vegetables with hard surfaces with a clean brush to remove dirt and substances, including pesticide residues and contaminants, from the surface and crevices;
- Shrimps should be fully cooked until the shells turn red and the flesh turns white and opaque;
- For shellfish such as scallops and geoduck, scrub the shells thoroughly and remove internal organs;
- Most hot pot ingredients should be stored in a refrigerator at 4 degrees Celsius or below, while frozen food should be stored in a freezer at -18 degrees C or below;
- Never use raw eggs as a dipping sauce for hot pot; and
- Use different sets of chopsticks to handle raw and cooked food to avoid cross-contamination.

In addition, when using fuel-burning appliances, especially in indoor areas, the public should ensure adequate ventilation to avoid harmful exposure to carbon monoxide (CO) and prevent CO poisoning.

For more health information, the public may call the DH's Health Education Infoline (2833 0111) or visit the [CHP's website](#) and [Facebook Fanpage](#).

The public may also call Dial-a-Weather (1878 200) or visit the [website](#)

[of the Hong Kong Observatory](#) for the latest weather information and forecast, or its [page on Weather Information for Senior Citizens](#).

Employers and employees should take precautions during cold weather

Attention duty announcers, radio and TV stations:

Please broadcast the following special announcement immediately, and repeat it at frequent intervals when the Cold Weather Warning is in force:

The Labour Department reminds employers that as the Cold Weather Warning is in force, they should take appropriate precautions such as reminding employees who have to work outdoors or in remote areas to wear appropriately warm clothing, and make arrangements for employees to rotate from outdoor to indoor or sheltered work sites as far as possible. Employees should take note of the weather report, wear appropriately warm clothing and be mindful of their health conditions. They should notify their supervisors and seek medical help immediately if feeling unwell, such as having cold limbs and body shivering.

Appeal for information on missing man in Mong Kok (with photos)

Police today (January 27) appealed to the public for information on a man who went missing in Mong Kok.

Wong Ping-kau, aged 68, went missing after he left the elderly home on Ivy Street yesterday (January 26) afternoon. His wife made a report to Police on the same day.

He is about 1.65 metres tall, 75 kilograms in weight and of thin build. He has a long face with yellow complexion and short black hair. He was last seen wearing a dark blue jacket, black trousers and black sports shoes with white strips.

Anyone who knows the whereabouts of the missing man or may have seen him is urged to contact the Regional Missing Persons Unit of Kowloon West on 3661 8038 or 9020 6542 or email to rmpu-kw@police.gov.hk, or contact any police station.

[Hong Kong Customs detects about \\$4 million smuggling case involving speedboat \(with photos\)](#)

â€‹Hong Kong Customs yesterday (January 26) mounted an anti-smuggling operation in Tung Chung and detected a suspected smuggling case involving a speedboat. A batch of suspected smuggled goods, with an estimated market value of about \$4 million, was seized.

Early yesterday morning, Customs conducted an anti-smuggling operation in Ma Wan Chung, Tung Chung and spotted a light goods vehicle heading towards a waterfront. Later, several suspicious persons gathered at the waterfront were seen transferring the goods from the vehicle onto the speedboat. They were suspected of engaging in smuggling activities.

Customs officers immediately took action, and the above-mentioned persons swiftly jumped onto the speedboat and fled to the Mainland waters.

Later, Customs officers discovered another light goods vehicle which was loaded with goods in the same packing. It was suspected to be connected with the same smuggling activity.

A batch of suspected smuggled goods, including 24 carton boxes of frozen venison tails, 14 carton boxes of aquarium animals, and ten bags of suspected scheduled dried shark fins, was seized. Two light goods vehicles suspected to be connected with the case were also detained.

An investigation is ongoing.

Customs will continue to take stringent enforcement actions against cross-boundary smuggling activities through risk assessment and intelligence analysis.

Smuggling is a serious offence. Under the Import and Export Ordinance, any person found guilty of importing or exporting unmanifested cargo is liable to a maximum fine of \$2 million and imprisonment for seven years.

Under the Protection of Endangered Species of Animals and Plants Ordinance, any person found guilty of importing or exporting an endangered species without a licence is liable to a maximum fine of \$10 million and imprisonment for 10 years.

Members of the public may report any suspected smuggling activities to Customs' 24-hour hotline 2545 6182 or its dedicated crime-reporting email account (crimereport@customs.gov.hk) or online form (eform.cefs.gov.hk/form/ced002/).
