Vice minister of the State Council Information Office (SCIO) Guo Weimin attended a book launch ceremony on April 9 in Beijing.

The book “Min Thu Wun’s Affinity with China” collects the translation and original works of Min Thu Wun, a Myanmar poet and scholar, as well as the father of current Myanmar President U Htin Kyaw. The book includes Min Thu Wun’s translation of Chinese literature – ranging from famous writer Lu Xun and ancient Chinese poetry – as well as essays he wrote on China when he visited the country in the 1950s and 1960s.

During the book launch event, Myanmar President U Htin Kyaw, who is currently visiting China, said his father was always interested in Chinese literature,

and he hoped the book can contribute to the cultural exchanges between the two countries.

SCIO Vice Minister Guo Weimin said the book is a testimony to Min Thu Wun's interest in Chinese culture and the foundation of people-to-people exchanges between the countries. The president's visit to China and attendance at the book launch ceremony "continues to write a new chapter of the cultural and people-to-people exchanges of the two countries," he added.

Drawing on previous exchanges between China and Myanmar, Guo continued, "China and Myanmar are friendly neighbors linked by mountains and river, sharing deep and profound traditional 'Paukphaw' (fraternal) friendship...China is willing to work along with Myanmar to make more progress in the China-Myanmar comprehensive strategic partnership to benefit the two countries and their people."

The book is compiled in both Chinese and Burmese and published by the Foreign Languages Press under the China International Publishing Group.

[Yangtze to be hit by worse droughts, floods this year](#)

The areas along the Yangtze River are likely to see more severe droughts and floods than usual this year, flood control authorities announced Monday.

During flood season this year, the river's middle and lower reaches will see more rainfall while the upper area – except the Jinsha, Jialing, Min and Tuo rivers – will see up to 30 percent less precipitation than normal years, said Cui Jiangxue, deputy secretary-general of the Yangtze River Flood Control and Drought Relief Headquarters.

According to meteorological and hydrological forecasts, drought and floods in the river basin will occur at the same time, he said at a meeting in Wuhan, capital of central China's Hubei Province.

The headquarters urged provinces and cities along the river to track weather conditions closely and improve flood control measures.

Heavy rain along the river since January has resulted in landslides and floods in some areas.

Due to rainfall in the middle and upper reaches, the volume of water entering the Three Gorges Reservoir almost doubled to 13,000 cubic meters per second in the 24 hours starting 2 p.m. Saturday.

The water inflow began to decrease Sunday afternoon and hit 10,200 cubic

meters per second at 2 p.m. Monday – a record high since 1993. The inflow of the reservoir will continue to drop Tuesday.

More than 500 ships are waiting to pass through the dam's ship locks.

Border police in southern China's Guangxi Zhuang Autonomous Region said Monday they had seized 537 products made from Siamese crocodiles, a protected species.

The products, including 370 pieces of crocodile skin, 90 tails and 77 specimens, were detected on a logistics vehicle attempting to cross the China-Vietnam border in early March.

The police thoroughly examined the vehicle after noticing that its goods were unusually placed. The driver also failed to provide official document for transporting the products.

The skins were around 43 centimeters wide and at least 1.2 meters long apiece. The longest specimen was nearly two meters long.

Siamese crocodiles are a critically endangered species native to Southeast Asia. Their skin is used as a raw material for luxury leather products on the international market. In China, it is illegal to raise them without a license or to trade and traffic them.

Peking University to start enrollment for Oxford campus

Peking University is set to start staff recruitment and student enrollment for its British campus in the city of Oxford in June.

The elite university in Beijing signed with the Open University in February to purchase a 15-acre campus in Oxford for 8.8 million pounds, or 10 million U.S. dollars. The location will serve as an overseas campus for the university's HSBC Business School.

The school will enroll 100 international students when it opens in August 2018, coinciding with the 120th anniversary of Peking University.

This is the first time that a Chinese university has used its own finances to set up and manage a school in a foreign country.

Yu Changjiang, a scholar in education, described the move as a remarkable step for China's higher education to go global.

"Previously HSBC Business School has been recruiting teaching staff and introducing resources from abroad, but now it has begun its process of going global, thus forming bilateral exchanges between its foreign counterparts," said Yu, "this will actually become a major tendency for China's higher education industry, which will gradually develop its own characteristics and advantages to be shared internationally."

HSBC Business School's finance, management and economic courses will feature Chinese business cases to help students become better acquainted with the Chinese economy and reforms.

Students will take the first year course in the Oxford campus and the second year at the schools' campus in Shenzhen.

Those on the campus in the southern Chinese city will also be allowed to select elective courses on the campus in Oxford.
