

CHP investigates two food poisoning clusters

The Centre for Health Protection (CHP) of the Department of Health is today (May 11) investigating two food poisoning clusters affecting seven persons, and reminded the public to maintain personal, food and environmental hygiene to prevent food-borne diseases.

The first cluster comprised one man and four women aged 29 to 64 who developed fever, abdominal pain and diarrhoea about 10 to 18 hours after having dinner at a restaurant in Prince Edward on April 29. Three of them have sought medical advice and one has been discharged upon hospitalisation. Separately, the stool specimen collected from one patient tested positive for *Salmonella enteritidis* upon laboratory testing.

The second cluster comprised two women both aged 35 who developed fever, abdominal pain, diarrhoea and vomiting about 14 to 21 hours after having dinner at the same restaurant on April 30. Both patients of the second cluster have sought medical advice and no hospitalisation is required.

All patients are in a stable condition. The Food and Environmental Hygiene Department has been alerted to the incident and the CHP's investigations are ongoing.

To prevent food-borne diseases, members of the public are reminded to maintain personal, food and environmental hygiene at all times. When dining out:

- Patronise only reliable and licensed restaurants;
 - Avoid eating raw seafood;
 - Be a discerning consumer in choosing cold dishes, including sashimi, sushi and raw oysters, at a buffet;
 - Ensure food is thoroughly cooked before eating during a hot pot or barbecue meal;
 - Handle raw and cooked foods carefully and separate them completely during the cooking process;
 - Use two sets of chopsticks and eating utensils to handle raw and cooked food;
 - Do not patronise illegal food hawkers;
 - Drink boiled water;
 - Do not try to use salt, vinegar, wine and wasabi to kill bacteria as they are not effective; and
 - Always wash hands before eating and after going to the toilet.
-

LegCo Public Accounts Committee will hold public hearing

The following is issued on behalf of the Legislative Council Secretariat:

The Legislative Council (LegCo) Public Accounts Committee (PAC) will hold a public hearing on "Management of restored landfills" (Chapter 1) of the Director of Audit's Report No.70 at 9am next Monday (May 14) in Conference Room 2 of the LegCo Complex.

Fourteen witnesses have been invited to appear before the above hearing to respond to points raised in the Report and answer questions asked by PAC members.

The programme for the public hearing is as follows:

May 14 (Monday)

Venue: Conference Room 2

9am

Subject: Management of restored landfills (Chapter 1 of the Director of Audit's Report No.70)

Witnesses:

Secretary for the Environment

Mr Wong Kam-sing

Under Secretary for Home Affairs

Mr Jack Chan

Principal Assistant Secretary (Recreation and Sport)2, Home Affairs Bureau

Ms Linda Law

Director of Environmental Protection

Mr Donald Tong

Deputy Director of Environmental Protection (2)

Mrs Vicki Kwok

Assistant Director (Environmental Infrastructure), Environmental Protection Department

Ms Betty Cheung

Principal Environmental Protection Officer (Landfills and Development), Environmental Protection Department

Mr Fong Kin-wa

Director of Leisure and Cultural Services

Ms Michelle Li

Chief Executive Officer (Planning) 2, Leisure and Cultural Services
Department
Ms Linda Cheung

Director of Architectural Services
Mrs Sylvia Lam

Project Director/3, Architectural Services Department
Mr Edward Tse

Chief Project Manager 302, Architectural Services Department
Mr Chris Liu

Director of Home Affairs
Miss Janice Tse

Assistant Director (2), Home Affairs Department
Ms Eugenia Chung

PAC is chaired by Mr Abraham Shek, and its Deputy Chairman is Mr Kenneth Leung. Other members include Mr Paul Tse, Mr Steven Ho, Mr Lam Cheuk-ting, Mr Shiu Ka-fai and Ms Tanya Chan.

First round results of Public Policy Research Funding Scheme 2018-19 announced

The Policy Innovation and Co-ordination Office (PICO) announced today (May 11) the funding results of the first round exercise in 2018-19 of the Public Policy Research (PPR) Funding Scheme.

The PPR Funding Scheme aims to promote public policy research and provide evidence-based research to facilitate public policy discussion. Applications are accepted throughout the year. For the first round exercise in 2018-19, PICO received 21 applications. On the advice of an assessment panel, PICO decided to fund seven projects with a total funding of about \$2.8 million.

Assessments on the PPR Funding Scheme are conducted by the assessment panel comprising academics, taking into account the comments of reviewers who are academics and experts outside the panel. Each application is considered on its merits and contributions towards the making of public policies. A declaration of interests system is in place to ensure that the assessments are fair and just.

Details of the funded projects have been uploaded to PICO's website (www.pico.gov.hk).

Grading of beach water quality released

The Environmental Protection Department (EPD) today (May 11) released the latest grading of water quality of 37 gazetted beaches and one non-gazetted beach (Discovery Bay) that are open for swimming.

Twenty-four beaches were rated as Good (Grade 1), 10 as Fair (Grade 2) and four as Poor (Grade 3).

Grade 1 beaches are:

Grade 2 beaches are:

Approach Beach	Castle Peak Beach
Butterfly Beach	Clear Water Bay First Beach
Cafeteria New Beach	Kadoorie Beach
Cafeteria Old Beach	Ma Wan Tung Wan Beach
Casam Beach	Stanley Main Beach

Grade 3 beaches are:

Anglers' Beach	Lido Beach
Hoi Mei Wan Beach	Ting Kau Beach

Compared with the grading released last week, Ma Wan Tung Wan Beach has been upgraded from Grade 3 to Grade 2. Castle Peak Beach, Clear Water Bay First Beach, Kadoorie Beach and Stanley Main Beach have been changed from Grade 1 to Grade 2; Hoi Mei Wan Beach, Lido Beach and Ting Kau Beach from Grade 2 to Grade 3.

"The changes are generally within the normal range of fluctuation of the bacteriological water quality of the beaches," an EPD spokesman said.

Under the present grading system, beaches are classified into four grades according to the level of E. coli in the water. Grades are calculated on the basis of the geometric mean of the E. coli counts on the five most

recent sampling occasions.

While the ratings represent the general water quality at the beaches, the EPD spokesman reminded members of the public that water quality could be temporarily affected during and after periods of heavy rain. Bathers should avoid swimming at beaches for up to three days after a storm or heavy rainfall.

A summary of beach grades is published weekly before the weekend. Latest beach grades based on the most current data may be obtained from the department's websites on Beach Water Quality (www.beachwq.gov.hk or www.epd.gov.hk/epd/beach) or the beach hotline, 2511 6666.

[Economic situation in first quarter of 2018 and latest GDP and price forecasts for 2018](#)

The Government released today (May 11) the First Quarter Economic Report 2018, together with the preliminary figures on Gross Domestic Product (GDP) for the first quarter of 2018.

The Government Economist, Mr Andrew Au, described the economic situation in the first quarter of 2018 and provided the latest GDP and price forecasts for 2018.

Main points

* The Hong Kong economy turned in robust growth of 4.7% over a year earlier in the first quarter of 2018, sustaining the full-fledged upturn in 2017. External demand picked up as the global economy maintained broad-based momentum. Domestic demand also strengthened, buttressed by favourable labour market conditions and positive business sentiment. On a seasonally adjusted quarter-to-quarter comparison, real GDP grew notably by 2.2% in the first quarter.

* Total exports of goods grew strongly by 5.2% year-on-year in real terms in the first quarter, as the upswing in global investment and trade translated into booming production and trading activities in Asia. Exports of services likewise accelerated to show broad-based growth of 7.5% year-on-year in real terms, bolstered by a strong recovery in inbound tourism, active global financial market activities and buoyant regional trade flows.

* Domestic demand continued to strengthen. Private consumption expenditure grew notably by 8.6% year-on-year in real terms in the first quarter, reflecting optimistic consumer sentiment on the back of favourable job and

income as well as asset market conditions. Overall investment expenditure registered further real year-on-year growth of 3.8%, amid notable growth in machinery and equipment acquisition as well as modest expansion in building and construction activity.

* The labour market remained tight. The seasonally adjusted unemployment rate stayed at a 20-year low of 2.9% in the first quarter, while the underemployment rate showed a further decline. Total employment continued to record sturdy growth. In tandem, wages and earnings registered further real improvements, with more notable increases in the lower-skilled segments of the labour market.

* The local stock market was bullish on entering 2018, but experienced corrections in the latter part of the first quarter amid a firmer outlook for gradual US interest rate hikes and intensified concerns over the global trading environment. Separately, the residential property market remained buoyant, with flat prices rising further amid active trading.

* Looking ahead, the broad-based momentum in the global economy is likely to continue in 2018. The Mainland economy should stay on a robust growth track in 2018 following the strong performance in the first quarter. The US economy is also expected to see faster growth this year as the stimulating effect of the expansionary fiscal policy kicks in. In the euro area and Japan, recent indicators point to further moderate economic growth. The strengthening global demand should be conducive to manufacturing and trading activities in Asia, to the benefit of Hong Kong's exports. Further improvement in inbound tourism should also render additional support to Hong Kong's exports of services. However, external uncertainties have increased of late. Of particular concern are the trade tensions between the US and its trading partners, notably the Mainland, for their potential adverse impacts on global trade flows and investor sentiment. Separately, the evolving global financial conditions amid the expected US rate hikes also warrant close attention.

* Domestic demand should continue to stay resilient. Local consumption sentiment is likely to be well underpinned by favourable job and income conditions. The latest Quarterly Business Tendency Survey indicated that large enterprises have turned more upbeat about their near-term business outlook. Ongoing infrastructure works and the measures in the 2018-19 Budget (the Budget) should provide further growth impetus to the economy.

* The actual growth outturn of the Hong Kong economy in the first quarter was stronger than expected. Nonetheless, considering the increased uncertainties in the external environment, particularly on the trade and financial fronts, the forecast real GDP growth of 3-4% for 2018, as announced in the Budget, is maintained in the current round of review. The Government will continue to closely monitor developments on the external and local fronts.

* Inflation pressures have generally been moderate. Underlying consumer price inflation went up to 2.4% in the first quarter, due to favourable global and local economic situations as well as some temporary factors. Looking ahead, the robust economic conditions, if continued, are likely to exert some upward pressures on inflation over the course of 2018, though the inflation rate for

the year as a whole should remain moderate. As the outturn in inflation so far has largely been in line with expectations, the forecast rates of underlying and headline consumer price inflation for 2018 as a whole put out in the Budget, at 2.5% and 2.2% respectively, are maintained in the current round of review.

Details

GDP

According to the preliminary data on the GDP released today by the Census and Statistics Department, GDP grew notably by 4.7% in real terms in the first quarter of 2018 over a year earlier, up from 3.4% in the preceding quarter (same as the earlier estimate), marking the sixth consecutive quarter of growth above the trend growth rate of 2.7% per annum in the past 10 years. On a seasonally adjusted quarter-to-quarter comparison, real GDP surged by 2.2% in the first quarter, up from 0.8% in the preceding quarter (same as the earlier estimate) (Chart).

The latest figures on GDP and its major expenditure components up to the first quarter of 2018 are presented in Table 1. Developments in different segments of the economy in the first quarter of 2018 are described below.

External trade

Total exports of goods picked up to show notable year-on-year growth of 5.2% in real terms in the first quarter, from that of 3.4% in the preceding quarter. This was broadly similar to the growth of 5.9% for 2017 as a whole. Analysed by major market, with reference to external merchandise trade statistics, exports to Asian markets as a whole continued to show robust growth, on the back of buoyant manufacturing activities in the region that generated solid demand for exports of raw materials and semi-manufactures. In particular, exports to the Mainland saw a visible acceleration in growth. Also, exports to the US and the EU increased sizeably, thanks to sustained improvement in final demand in these economies. On a seasonally adjusted quarter-to-quarter basis, total exports of goods grew by 3.1% in real terms in the first quarter.

Exports of services likewise displayed strength in the first quarter, with broad-based growth of 7.5% in real terms over a year earlier, up from 3.9% growth in the preceding quarter and 3.2% growth for 2017 as a whole. Exports of travel services strengthened to show double-digit growth, reflecting the strong recovery of inbound tourism. Notwithstanding the somewhat more volatile financial markets in the first quarter, the solid momentum in the global economy underpinned active financial market activities, resulting in sizeable growth in exports of financial services. Exports of transport services expanded solidly amid vibrant regional trade flows, while exports of business and other services grew modestly. On a seasonally adjusted quarter-to-quarter basis, exports of services continued to rise, by 4.8% in real terms in the first quarter.

Domestic sector

The domestic sector continued to strengthen in the first quarter. Private consumption expenditure grew markedly by 8.6% in real terms over a year earlier. Consumer sentiment was firmly supported by favourable job and income conditions as well as the wealth effect resulting from the buoyant asset markets. On a seasonally adjusted quarter-to-quarter comparison, private consumption expenditure increased by 3.1% in real terms in the first quarter. Government consumption expenditure continued to grow steadily by 3.9% year-on-year in the first quarter, following 3.2% growth in the preceding quarter.

Overall investment spending in terms of gross domestic fixed capital formation increased further by 3.8% year-on-year in real terms in the first quarter, following growth of 3.5% in 2017. Thanks to the sustained upturn in the global economy, local business sentiment was broadly positive in early 2018. This, together with the sizeable increase in purchases by the public sector, rendered a notable year-on-year increase in overall machinery and equipment acquisition. Overall building and construction activity saw modest growth in the first quarter, backed by the expansion in public building and construction works. Costs of ownership transfer showed a double-digit increase as property market transactions went up visibly over a year earlier.

The labour sector

The labour market remained tight, with the seasonally adjusted unemployment rate staying at a 20-year low of 2.9% in the first quarter of 2018. The underemployment rate edged down to 1.0%, the lowest level in over 20 years. Total employment continued to grow sturdily over a year earlier. In tandem, wages and earnings registered further year-on-year improvements in real terms, with more notable increases in the lower-skilled segments of the labour market.

The asset markets

The local stock market was bullish on entering 2018, but experienced corrections in the latter part of the first quarter amid a firmer outlook for gradual US interest rate hikes and intensified concerns over the global trading environment. The Hang Seng Index closed the first quarter at 30093, up by only 0.6% from end-2017 and down by 9.2% from its peak in late January. On May 10, the Hang Seng Index closed at 30809.

The residential property market remained buoyant in the first quarter of 2018. While trading volume was 8% lower than the fervent level in the preceding quarter, it was 14% higher than a year ago. Residential property prices increased by 4% between December 2017 and March 2018. Overall flat prices in March 2018 exceeded the 1997 peak by 113%, and the housing affordability ratio worsened to around 71% in the first quarter. Flat rentals rose by 1% during the first quarter. In contrast, office rentals stayed virtually flat over the same period, while those for retail premises fell by 1%.

Prices

Consumer price inflation was moderate in the first quarter, though going up somewhat on the back of strong economic growth as well as some temporary factors. Locally, labour cost pressure was held in check on a unit cost basis, as rises in wages and earnings were largely matched with concurrent growth in labour productivity. Commercial rental cost pressure was contained in general, while the increase in fresh-letting residential rentals over the past year or so continued to feed through gradually to consumer price inflation. External price pressures also remained moderate, only edging up slightly due to the weaker US dollar over the past year and mildly higher inflation in some major import sources amid the global economic upturn. Overall, netting out the effects of the Government's one-off relief measures, underlying consumer price inflation was 2.4% in the first quarter, up from 1.6% in the preceding quarter. Headline consumer price inflation rose to 2.4% from 1.6% in parallel.

Latest GDP and price forecasts for 2018

Looking ahead, the broad-based momentum in the global economy is likely to continue in 2018. The Mainland economy should stay on a robust growth track in 2018 following the strong performance in the first quarter. The US economy is also expected to see faster growth this year as the stimulating effect of the expansionary fiscal policy kicks in. In the euro area and Japan, recent indicators point to further moderate economic growth. The strengthening global demand should be conducive to manufacturing and trading activities in Asia, to the benefit of Hong Kong's exports. Further improvement in inbound tourism should also render additional support to Hong Kong's exports of services. However, external uncertainties have increased of late. Of particular concern are the trade tensions between the US and its trading partners, notably the Mainland, for their potential adverse impacts on global trade flows and investor sentiment. Separately, the evolving global financial conditions amid the expected US rate hikes also warrant close attention.

Domestic demand should continue to stay resilient. Local consumption sentiment is likely to be well underpinned by favourable job and income conditions. The latest Quarterly Business Tendency Survey indicated that large enterprises have turned more upbeat about their near-term business outlook. Ongoing infrastructure works and the measures in the Budget should provide further growth impetus to the economy.

The actual growth outturn of the Hong Kong economy in the first quarter was stronger than expected. Nonetheless, considering the increased uncertainties in the external environment, particularly on the trade and financial fronts, the forecast real GDP growth of 3-4% for 2018, as announced in the Budget, is maintained in the current round of review (Table 2). The Government will continue to closely monitor developments on the external and local fronts. For reference, the latest forecasts by private sector analysts mostly range from 2.8-3.5%, averaging around 3.1%.

On the inflation outlook, the robust economic conditions, if continued, are likely to exert some upward pressures on inflation over the course of 2018, though the inflation rate for the year as a whole should remain

moderate. As the outturn in inflation so far has largely been in line with expectations, the forecast rates of underlying and headline consumer price inflation for 2018 as a whole put out in the Budget, at 2.5% and 2.2% respectively, are maintained in the current round of review (Table 2).
