

Red fire danger warning

Attention duty announcers, radio and TV stations:

The fire danger situation today (May 15) is red and fire risk is extreme. The countryside is extremely vulnerable to fire. If you are planning to spend the day in the countryside, please take pre-cooked food for a picnic and take all measures to prevent hill fires. The penalty for lighting fires illegally in the countryside is \$25,000 and a year's imprisonment.

CHP investigates imported case of measles infection

The Centre for Health Protection (CHP) of the Department of Health (DH) is today (May 14) investigating an imported case of measles infection and reminded the public that vaccination is the most effective way to prevent measles, and people born outside Hong Kong who might not have received a measles vaccination during childhood should review their vaccination history.

The case involves an 11-month-old girl with good past health. She developed fever, cough and runny nose since May 7, and rash since the following day. She was brought to the Accident and Emergency Department of Pok Oi Hospital on May 9 and admitted to Tuen Mun Hospital on May 10 for treatment. Her respiratory specimen sample tested positive for the measles virus upon nucleic acid testing. She is now in stable condition and is still hospitalised. Her two household contacts remained asymptomatic.

An epidemiological investigation revealed that the patient was born outside Hong Kong and did not receive measles vaccinations in her home country. She lived overseas during the incubation period and arrived in Hong Kong on April 23. The patient did not have contact with measles patients in Hong Kong. The case has been identified as an imported case. During the communicable period, the patient had visited the Immigration and Registration of Persons – Yuen Long Office (Yuen Long Office) located on Kiu Lok Square, Yuen Long, between around 10am and 11.30am on May 6. The CHP will conduct medical surveillance on about 40 staff of the concerned office.

As measles is highly infectious, the CHP has set up an enquiry hotline (2125 2374) for contact tracing of the case. The CHP appealed to the persons who visited the Yuen Long Office located on Kiu Lok Square, Yuen Long, between 10am and 11.30am on May 6 to call the hotline. Officers of the CHP will assess their conditions and offer suggestions. The hotline will operate from 9am to 1pm tomorrow (May 15), and from 9am to 5.30pm starting from May

16, Monday to Friday (excluding public holidays).

Investigations are ongoing.

"The global immunisation coverage rates have dropped since the COVID-19 pandemic. Many countries worldwide are facing a resurgence of measles outbreaks. According to the World Health Organization (WHO), the number of measles cases had risen worldwide to over 300 000 cases reported in 2023, a roughly 80 per cent increase from 2022. The Western Pacific region recorded a total of about 5 000 cases in 2023, which represented more than a 2.5 times when compared with 2022, with persistent transmission found in the Philippines and Malaysia. In view of the continuous increase in measles cases, the WHO has urged parents to bring their children to get vaccinated as early as possible to prevent measles from spreading," a spokesman for the DH said.

The CHP reiterated that vaccination is the most effective way to prevent measles. During the COVID-19 pandemic over the past three years, parents, schools and healthcare workers in Hong Kong continued to support childhood immunisations, striving to maintain the immunisation coverage rates at a high level. As revealed by the vaccination uptake of primary school students and the findings of the territory-wide immunisation surveys regularly conducted by the DH, the two-dose measles vaccination coverage has been consistently maintained at a high level, well above 95 per cent, and the local seroprevalence rates of measles virus antibodies reflect that most of the people in Hong Kong are immune to measles. On the whole, the information available indicates that the risk of large-scale outbreak is considered to be low in Hong Kong. However, it is possible for some not fully vaccinated people to get infected and transmit the measles virus to susceptible people (including children aged below 1 who are not due for the first dose of measles vaccine).

The spokesman reminded members of the public that delays in vaccination will weaken the protection for children against measles, and parents are reminded to maintain up-to-date vaccination for their children for comprehensive and timely protection. All people who are non-immune to measles, especially foreign domestic helpers, people working or studying in tertiary institutions, and workers of sea/land/air border control points who may be at a higher risk of contacting an imported case, should receive two doses of measles-containing vaccine. In general, people can be considered as non-immune to measles if they (i) did not have the infection confirmed by laboratory test before, and (ii) had not received two doses of measles-containing vaccines in the past, or have unknown vaccination status or unknown immunity against measles. On the other hand, as measles was endemic in Hong Kong and most parts of the world before 1967, people born before 1967 are considered to have acquired immunity to measles through natural infection.

The spokesman supplemented that, members of the public who are planning to travel to places with a high incidence or outbreaks of measles should review their vaccination history and past medical history, especially people

born outside Hong Kong who might not have received a measles vaccination during childhood. Those who have not received two doses of measles-containing vaccines, with unknown vaccination history or unknown immunity against measles, are urged to consult their doctor for advice on vaccinations at least two weeks before departure.

The spokesman advised, "The incubation period (the period from infection to appearance of illness) of measles ranges from seven days to 21 days. Symptoms of measles include fever, skin rash, cough, runny nose and red eyes. If symptoms arise, members of the public should wear surgical masks, stop going to work or school and avoid going to crowded places. They should also avoid contact with non-immune persons, especially persons with weakened immunity, pregnant women and children aged below 1. Those suspected to have been infected are advised to seek medical attention as early as possible and reveal relevant contact history of measles to healthcare professionals."

Besides being vaccinated against measles, members of the public should take the following measures to prevent infection:

- Maintain good personal and environmental hygiene;
- Maintain good indoor ventilation;
- Keep hands clean and wash hands properly;
- Wash hands when they are dirtied by respiratory secretions, such as after sneezing;
- Cover the nose and mouth while sneezing or coughing and dispose of nasal and mouth discharge properly;
- Clean used toys and furniture properly; and
- Persons with measles should be kept out of school till four days from the appearance of a rash to prevent the spread of the infection to non-immune persons in school.

For more information on measles, the public may visit the CHP's [measles thematic page](#). Members of the public who are going to travel can visit the website of the DH's [Travel Health Service](#) for news of measles outbreaks outside Hong Kong.

Excessive cadmium and methylmercury found in crab sample and escolar sample respectively

The Centre for Food Safety (CFS) of the Food and Environmental Hygiene Department today (May 14) announced that a crab sample and a escolar sample

were detected with cadmium and methylmercury respectively, which are metallic contaminants, at levels exceeding the legal limit. The CFS is following up on the incidents.

"The CFS collected the above-mentioned crab sample and escolar sample at the import levels for testing under its routine Food Surveillance Programme. The test results showed that the crab sample contained cadmium at a level of 10.4 parts per million (ppm), exceeding the legal limit of 2 ppm; while the escolar sample contained methylmercury at a level of 2.57 ppm, exceeding the legal limit of 0.5 ppm," a spokesman for the CFS said.

The spokesman said that the CFS had informed the vendors concerned of the irregularities and instructed them to stop sales and remove from shelves the affected products. The CFS is also tracing the sources and distribution of the products concerned.

"Long-term excessive intake of cadmium may affect the kidney functions. Methylmercury is the major form of mercury in fish. At high levels, mercury can affect foetal brain development, and affect vision, hearing, muscle co-ordination and memory in adults. Furthermore, as some international organisations such as the World Health Organization have pointed out, consuming predatory fish species is the main source of mercury intake for human beings. The report of the CFS's Total Diet Study has also pointed out that large fish or predatory fish species may contain high mercury levels (for example, tuna, alfonsino, shark, swordfish, marlin, orange roughy and king mackerel). Hence, groups particularly susceptible to the adverse effects of mercury, such as pregnant women, women planning a pregnancy and young children should opt for fish that are smaller in size for consumption and avoid consumption of the above-mentioned types of fish to minimise excessive exposure to metal contaminants in food," the spokesman added.

According to the Food Adulteration (Metallic Contamination) Regulations (Cap. 132V), any person who sells food with metallic contamination above the legal limit is liable upon conviction to a fine of \$50,000 and imprisonment for six months.

â€‹The CFS will alert the trade, continue to follow up on the incidents and take appropriate action. Investigations are ongoing.

**Secretary for Culture, Sports and
Tourism meets with trade on
development of Hong Kong tourism**

industry (with photos)

The Secretary for Culture, Sports and Tourism, Mr Kevin Yeung, met with representatives from the sectors of tourism, hotel, aviation, catering, retail, etc. today (May 14) to exchange views on how to enhance the speed and quality of the development of Hong Kong's tourism industry and discuss the marketing strategies and tourism promotional directions following the expansion of the Individual Visit Scheme (IVS) to cover eight more cities.

At the meeting, Mr Yeung conveyed the care of the Director of the Hong Kong and Macao Affairs Office of the State Council, Mr Xia Baolong, towards Hong Kong's tourism industry. He also had in-depth discussion with the representatives on issues as to how to encourage the trade to actively understand the changes, respond to the changes and embrace the changes; how to frequently adopt new ideas and methods to overcome the challenges encountered so as to pursue quality development, realising substantial enhancement in the midst of transformation. It was agreed that Hong Kong's rich tourism resources must be fully explored, and at the same time keep enhancing the quality of services; promote further collaboration between the tourism and related sectors in developing new tourism products and promotion as well as improve service quality, with a view to reinforcing and strengthening Hong Kong's position as "the best tourism destination".

Mr Yeung also expressed his sincere gratitude to the Central Government on the expansion of the IVS to cover eight more cities, as well as the staunch support to Hong Kong. He also discussed with the trade on how to enhance the tourism service and generate more economic benefits following the coverage of the eight cities under the IVS. At the meeting, he expressed his thanks for the trade's efforts over the years and encouraged all sectors to continue to render strategic advice on the further development of Hong Kong's tourism industry.

Mr Yeung said, "The Government attaches great importance to the development of the tourism industry and its contribution to the economy. Promoting Hong Kong's tourism development requires the contribution and support of all sectors. We will work hand in hand with the trade to enhance the competitiveness of Hong Kong's tourism industry, making the best use of Hong Kong's ample tourism resources and drawing reference from the successful experience of other cities in order to promote innovation and improve policies. In the face of changing visitors' patterns and competition from neighbouring cities, Hong Kong's tourism and related sectors need to be flexible and innovative to uncover more attractions with local characteristics, step up promotion of those attractions to create more diversified, enriching and unique travel experience for visitors so as to pursue the concept of 'Tourism is everywhere in Hong Kong'. We will also actively promote continuous enhancement of the quality of services rendered by the trade, and encourage members of the public to join us in extending warm hospitality to our visitors."

At the meeting, Mr Yeung also foreshadowed that the Government would

shortly announce the list of mega events for the second half of the year. He encouraged the trade to capitalise on the business opportunities brought by the mega events and make timely preparation and deployment.

[Refined arrangements for renewal applications of Northbound Travel for Hong Kong Vehicles and increased number of applications to be processed](#)

The Transport Department (TD) said today (May 14) that, from now on, arrangements for renewal applications for Northbound Travel for Hong Kong Vehicles will be refined. Eligible applicants may submit their renewal applications online during the application period allotted by the TD without having to participate in a computer ballot.

The refined arrangements are only applicable to Northbound Travel for Hong Kong Vehicles renewal applicants who meet all of the following criteria:

- (i) the applicant remains unchanged;
- (ii) the vehicle remains unchanged (including vehicle registration mark, colour and chassis number/vehicle identification number); and
- (iii) the designated drivers remain unchanged (including the number of designated drivers and their Hong Kong identity card numbers).

If the applicants for the renewal of Northbound Travel for Hong Kong Vehicles fail to meet any of the above criteria, they are required to participate again in the computer ballot and submit applications for Northbound Travel for Hong Kong Vehicles in the form of a new application within the allotted designated period. To enable applicants who submit new applications to register for the computer ballot, the TD will relax the computer ballot registration period at the same time, from 30 days before the expiry of their Closed Road Permit to 60 days before.

The refined arrangements for renewal applications for Northbound Travel for Hong Kong Vehicles introduced by the TD are as follows:

(a) starting from May 14, the TD will issue emails in phases to holders of Northbound Travel for Hong Kong Vehicles Closed Road Permit that expires in or after July this year to invite permit holders to submit Northbound Travel for Hong Kong Vehicles renewal applications;

(b) after receiving invitation emails from the TD, eligible applicants for renewal of the Northbound Travel for Hong Kong Vehicles may use the passcode provided in the emails and their personal information to submit renewal applications on the designated website within the allotted designated application period specified in the invitation email;

(c) the designated application period allotted by the TD covers six calendar days, allowing sufficient time for applicants submitting renewal applications for Northbound Travel for Hong Kong Vehicles to prepare the necessary application documents. If eligible applicants for the renewal of Northbound Travel for Hong Kong Vehicles do not submit the renewal applications within the designated period allotted, the applicants will be required to participate again in the computer ballot to obtain an application quota, and submit the application as a new application within the allotted designated period; and

(d) To further enable holders of valid licences for Northbound Travel for Hong Kong Vehicles to enquire whether they are invited to submit renewal applications, to learn when their allotted application periods are and what their passcodes are, etc, the TD will launch a new function, "Enquire Renewal Application Invitation Details", on the designated website on May 20 for applicants to check by themselves.

In addition, according to the "Guangdong Province Administrative Measures for Hong Kong Private Cars Travelling to the Mainland via the Hong Kong-Zhuhai-Macao Bridge", Mainland authorities will accept and vet applications submitted by holders of valid licences for Northbound Travel for Hong Kong Vehicles 30 days prior to the expiry of electronic vehicle licences from the Mainland authorities at the earliest. Hence, after completion of the preliminary vetting of the applications, the TD will pass the applications for Mainland authorities' processing within 30 days prior to the expiry of electronic vehicle licences from the Mainland authorities. Applicants will be notified by email of the updated application status by then, and they may also check the status of their applications online on the designated website. Applicants are advised to wait patiently after submission of their applications for renewal of Northbound Travel for Hong Kong Vehicles.

Details of the refined arrangements for renewal applications of Northbound Travel for Hong Kong Vehicles are available at the Renewal Application page on the designated website (www.hzmbqfs.gov.hk/en/RenewalApplication).

Furthermore, the number of applications of Northbound Travel for Hong Kong Vehicles to be processed will be increased from 300 to 400 applications

per working day starting from June, to better cope with the needs of new applications and renewal applications.

The governments of Guangdong and Hong Kong will continue to monitor the operation of the Northbound Travel for Hong Kong Vehicles and will keep close liaison with relevant departments to review and enhance the arrangements of Northbound Travel for Hong Kong Vehicles in a timely manner.
