

Red tides sighted

Two red tides have been sighted over the past week, the Inter-departmental Red Tide Working Group reported today (April 19).

On April 18, staff of the Leisure and Cultural Services Department spotted two red tides at Deep Water Bay Beach and Repulse Bay Beach on Hong Kong Island. The red tides still persist and no associated fish deaths have been reported as of today.

A spokesman for the working group said, "Both red tides were formed by *Noctiluca scintillans*, which is commonly found in Hong Kong waters and is non-toxic."

The Agriculture, Fisheries and Conservation Department (AFCD) urged mariculturists at Lo Tik Wan, Sok Kwu Wan and Po Toi fish culture zones to monitor the situation closely and increase aeration where necessary.

Red tide is a natural phenomenon. The AFCD's proactive phytoplankton monitoring programme will continue to monitor red tide occurrences to minimise the impact on the mariculture industry and the public.

Opening remarks by SITI at LegCo Finance Committee special meeting

Following is the English translation of the opening remarks by the Secretary for Innovation, Technology and Industry, Professor Sun Dong, at the special meeting of the Legislative Council Finance Committee today (April 19):

Chairman and Members,

Promoting Hong Kong's innovation and technology (I&T) development and accelerating Hong Kong's high-quality development is one of the focus areas of this year's Budget. The Budget also announced devoting more resources to chart Hong Kong in moving full steam towards our vision of an international I&T centre. I will give an overview of the relevant key measures in the Budget along four directions.

(1) Consolidating Hong Kong's research and development (R&D) strengths and promoting technology industry development

We are dedicated to consolidating Hong Kong's R&D strengths, supporting the midstream transformation and realisation of research outcomes with a view

to advancing the development of technology industries. With regard to artificial intelligence (AI), the Budget allocated \$3 billion to launch a three-year AI Subsidy Scheme to support local universities, research institutes and enterprises etc. to leverage computing power of Cyberport's AI Supercomputing Centre; strengthen cyber security and data protection of the Centre; and launch promotional and educational activities, etc. As for microelectronics, the Hong Kong Microelectronics Research and Development Institute will be established within this year to support the R&D of third generation semiconductors. On life and health technology, from the \$10 billion earmarked, we will allocate \$2 billion to support the InnoHK research clusters to establish presence in the Loop and another \$200 million to provide assistance to start-ups engaging in life and health technology in the Hong Kong-Shenzhen I&T Park (HSITP) in the form of incubation and acceleration programmes, etc., thereby facilitating the setting up of the InnoLife Healthtech Hub in HSITP. Furthermore, we will launch a \$3 billion Frontier Technology Research Support Scheme to assist the eight University Grants Committee (UGC)-funded universities, on a matching basis, in setting up research facilities and conducting research projects led by leading local and international researchers and provide a maximum of \$16 million annual funding to the Technology Transfer Office of each UGC-funded university. These measures will further enhance Hong Kong's I&T ecosystem and better realise our basic technology research capabilities in making breakthroughs out of the blue.

(2) Developing I&T infrastructure and promoting "new industrialisation"

The Loop development is of great significance to Hong Kong's high-quality development. We will continue to support the development of HSITP. First three buildings will be completed progressively by end of this year, and construction of the other five buildings will commence after relocation of the isolation facilities in an orderly manner.

For "new industrialisation", the Government will launch the \$10 billion New Industrialisation Acceleration Scheme (NIAS) within this year to fund enterprises in life and health technology, AI and data science, and advanced manufacturing and new energy technology that invest no less than \$200 million in setting up new production facilities in Hong Kong on a matching basis of 1 (Government):2 (Company), subject to a funding ceiling of \$200 million per enterprise. Enterprises that participate in NIAS may receive subsidies under the Research Talent Hub to engage research talent, and, on a pilot basis, engage a small number of non-local technical personnel under the Technology Talent Admission Scheme.

(3) Developing digital economy and promoting the community's digital transformation

Digital economy has become a new driving force for economic development. As a new key production factor, data links different industries and sectors, empowering enterprises to enhance efficiency, boost their competitiveness and create fresh business opportunities. Since March this year, Cyberport has invited the first batch of small and medium enterprises to apply for the \$500 million Digital Transformation Support Pilot Programme to acquire

ready to use basic digital solutions including electronic payment. The Government will also launch a \$300 million "Corporate Digital Identity" platform to facilitate the conduct of online business transactions and services. In addition, the Government has commissioned an expert group to undertake study on how to develop a robust data trading ecosystem in Hong Kong, etc.

Furthermore, in order to promote digital inclusion, the Government will allocate \$100 million under the Social Innovation and Entrepreneurship Development Fund to provide training on digital technologies and technical support to elderlies aged 60 or above in Hong Kong in the coming three years, which is expected to benefit at least 50 000 elderlies. The first batch of programmes is expected to commence in the fourth quarter this year at the earliest. We have also implemented various Cross-boundary Public Services measures, including setting up of the first Hong Kong Cross-boundary Public Services self-service kiosk in Guangzhou in February 2024, and are planning to set up self-service kiosks in more Mainland cities of the Greater Bay Area (GBA) to facilitate residents and enterprises in the GBA to access Hong Kong government services.

(4) Nurturing I&T start-ups and talent

With regard to nurturing I&T start-ups, the Hong Kong Science and Technology Parks Corporation will launch the Co-acceleration Programme to pool the efforts of the I&T industry to nurture I&T start-ups with high potential as regional or global enterprises. In addition to existing measures on nurturing and attracting talent, the Government will also allocate an additional funding of \$134 million to continue subsidising publicly-funded primary schools for two academic years under the "Knowing More About IT" Programme to enhance primary school students' interests in information technology and its application. These measures will be conducive to pooling together and nurturing Hong Kong's I&T talent.

Conclusion

Our country has always been offering strong support for Hong Kong's I&T development. Generally speaking, various measures for promoting the I&T development are gradually taking effect. The Government will continue to invest and build up a vibrant I&T ecosystem. We have full confidence in the I&T development in Hong Kong. I would like to express my gratitude to all Members again for the support to the I&T development in Hong Kong all along. I appeal for the continual support of Members and the public for the work of the Innovation, Technology and Industry Bureau. Thank you, Chairman.

Postal services to United Arab

Emirates subject to delay

Hongkong Post announced today (April 19) that, as advised by the postal administration of the United Arab Emirates, due to the impact of severe weather, mail delivery services to the United Arab Emirates are subject to delay.

Fraudulent website related to Bank Julius Baer & Co. Ltd.

The following is issued on behalf of the Hong Kong Monetary Authority:

The Hong Kong Monetary Authority (HKMA) wishes to alert members of the public to a press release issued by Bank Julius Baer & Co. Ltd. relating to a fraudulent website, which has been reported to the HKMA. A hyperlink to the press release is available on the [HKMA website](#).

The HKMA wishes to remind the public that banks will not send SMS or emails with embedded hyperlinks which direct them to the banks' websites to carry out transactions. They will not ask customers for sensitive personal information, such as login passwords or one-time password, by phone, email or SMS (including via embedded hyperlinks).

Anyone who has provided his or her personal information, or who has conducted any financial transactions, through or in response to the website concerned, should contact the bank using the contact information provided in the press release, and report the matter to the Police by contacting the Crime Wing Information Centre of the Hong Kong Police Force at 2860 5012.

Hong Kong Youth Symphonic Band Annual Concert "Europe by Rail"

The Hong Kong Youth Symphonic Band (HKYSB) of the Music Office (MO) under the Leisure and Cultural Services Department will hold its annual concert entitled "Europe by Rail" at 3pm on May 19 (Sunday) at the Hong Kong Cultural Centre Concert Hall.

The concert will be conducted by MO instructors Lee Sing-wan and Kevin

Ling. The HKYSB will perform "Carmen Fantasy", which was adapted from renowned opera "Carmen", with MO instructor Leung Wing-kin as flute soloist.

Other highlights include "Hans Christian Andersen" Suite, inspired by the adventures of Danish author Hans Christian Andersen and his classic works; "Armenian Dances, Part I", based on folk songs collected by Armenian musicologist Gomidas Vartabed; "New London Pictures", portraying the vibrancy and prosperity of the modern city; and "In the Shadow of Napoleon", a suspenseful and mysterious suite based on a musical of the same title.

The HKYSB was formed in 1978 with the aim of nurturing young musicians and arousing greater interest in band music in Hong Kong. The Band currently has 67 members and recruits annually by open audition. It has performed in Hong Kong and overseas, winning much acclaim.

Tickets priced at \$60, \$80 and \$100 are now available at URBTIX (www.urbtix.hk). For telephone bookings, please call 3166 1288. For programme enquiries and concessionary schemes, please call 2796 1003 or 3842 7784 or visit www.lcsd.gov.hk/musicoffice.
