

Notice: SN15 5HH, Mr John Howat, Mrs Christine Howat and Mr Ian Howat: environmental permit issued

The Environment Agency publish permits that they issue under the Industrial Emissions Directive (IED).

This decision includes the permit and decision document for:

- Operator name: Mr John Howat, Mrs Christine Howat and Mr Ian Howat
- Installation name: Upper Startley Farm
- Permit number: EPR/NP3131MZ/V003

News story: London market trader fined for selling rotten fruit with incorrect labelling

A London based market trader has been fined for displaying, offering for sale and selling rotten fruit and vegetables that failed to meet the minimum quality standards.

Brian Childs, a stallholder at Queens Market in Upton Park, London was fined £1,998 at Thames Magistrates' Court on 22 August 2018, following an investigation by the Rural Payments Agency's (RPA) Horticultural Marketing Inspectors (HMI).

Mr Childs, who trades under the name of Jaqueline Childs, runs one of the largest independent fruit and vegetable stalls within the purpose-built indoor complex.

An HMI inspection found the stall selling rotten lettuce, plums and papaya, while kakis and limes were being marketed with incorrect country of origin labelling.

Peter Bainbridge, RPA Operations Director said:

The ultimate objective of the RPA's Horticultural Marketing Inspectors is to work closely with the fresh produce industry at all times. They use face-to-face inspection as a means of providing advice and guidance to help support retailers such as Mr Childs understand the role that the marketing standards can play in adding

real value to their business.

Unfortunately their advice is not always heeded by individuals and businesses and when all other options are exhausted, the RPA will resort to the use of criminal sanction to bring about a required change in behaviour.

On top of the fine, HMI investigation costs of £2,049 were awarded, along with victim surcharge, producing a total financial penalty of £4,138.

Background

- Horticultural Marketing Inspectors are part of the Rural Payments Agency (RPA). The team is responsible for the enforcement of the EU marketing standards for fresh fruit, vegetables, salad crops, nuts and cultivated mushroom, throughout England and Wales, wherever fresh produce is grown, imported, exported, bought or sold.

[Guidance: Financing heat networks in the UK: guidebook](#)

This guidance outlines some of the issues, risks and opportunities around financing heat networks in the UK, to support the move to a self-sustaining heat network market. It includes:

- a decision tree for engaging with internal and external funding sources
- a decision tree for delivery structure and funding sources
- revenue streams
- commercial structures (delivery, contractual and funding)
- business rates
- accounting implications
- tax implications (Corporation Tax, VAT, Stamp Duty and Construction Industry Scheme)
- links to other guidance
- case studies
- engagement with the funding market
- cash flows associated with structures explored

The guidance is aimed at:

- heat network sponsors
- heat network developers
- heat network funders

Research and analysis: Dredged Material Disposal Site Monitoring 2016

This report presents the scientific findings of, and implications for subsequent monitoring based on the results from, dredged material disposal site monitoring conducted under a Cefas/Marine Management Organisation Service Level Agreement project round the coast of England during 2016-17.

The main aims of this report are: to aid the dissemination of the monitoring results; to assess whether observed changes resulting from dredged material disposal are in line with those expected; to compare the results with those of previous years (where possible); and, to facilitate our improved understanding of the impacts of dredged material disposal at both a site-specific and a national (i.e. non site-specific) level.

Research and analysis: Dredged Material Disposal Site Monitoring 2017

This report presents the scientific findings of, and implications for subsequent monitoring based on the results from, dredged material disposal site monitoring conducted under a Cefas/Marine Management Organisation Service Level Agreement project round the coast of England during 2017-18.

The main aims of this report are: to aid the dissemination of the monitoring results; to assess whether observed changes resulting from dredged material disposal are in line with those expected; to compare the results with those of previous years (where possible); and, to facilitate our improved understanding of the impacts of dredged material disposal at both a site-specific and a national (i.e. non site-specific) level.
