

## [News story: Natural England Deputy Chair appointed](#)

Secretary of State for the Environment, Food and Rural Affairs, Michael Gove, has appointed The Rt Hon the Lord Blencathra as Deputy Chair of Natural England (NE) until the end of his term as an NE Board Member on 11 March 2021. This follows the announcement of his [appointment to the NE Board](#) in March 2018.

Natural England is a non-departmental public body, set up under the Natural Environment and Rural Communities Act 2006. Its remit is to ensure the natural environment is conserved, enhanced and managed for the benefit of present and future generations.

Non-executive board members of Natural England have collective responsibility for the strategic direction and overall performance of the organisation. They make sure that Natural England is properly and effectively managed and provide stewardship for the public funds entrusted to the organisation.

Lord Blencathra will continue to receive remuneration at the rate of £328 per day although there will be an increase to his current time commitment of 36 days per annum.

### **Biography**

Lord Blencathra is a Member of the House of Lords where he chairs a Select Committee and has been appointed to the Council of Europe. He was formerly Minister of State at the Home Office and a Minister at the Department of the Environment in the 1990s. At the Earth Summit in Rio in 1992 he led for the UK and launched the Darwin Initiative. He formerly represented England's largest rural constituency as the Member of Parliament for Penrith and The Border. He joined the Natural England Board in March 2018. Lord Blencathra has multiple sclerosis and uses a wheelchair.

## **Press release: New protections for**

# thousands of seabirds

England's largest seabird colony will soon benefit from stronger protection as Environment Minister Thérèse Coffey confirms the Flamborough Head and Filey Coast Special Protection Area (SPA) will be extended by over 7,600 hectares.

This protected area of Yorkshire coastline already provides a safe haven for breeding seabirds including gannets, razorbills and the iconic puffin. Now, a quarter of a million breeding seabirds – including almost 2,000 puffins – will be better protected and given a safe space for feeding and foraging.

The announcement comes during National Marine Week, which celebrates the UK's rich marine life and habitats, and ongoing efforts to protect these for future generations.

Natural England has also launched a consultation to extend the nearby Teesmouth and Cleveland Coast SPA by nearly 10,000 hectares, which if designated, will help protect populations of breeding little terns and common terns.

Environment Minister Thérèse Coffey said:

We are a world-leader in protecting our marine environment, with a third of our waters already protected as part of our Blue Belt.

National Marine Week is a fantastic opportunity for us all to celebrate the diverse range of habitats which make up the British coastline, and the role we all have to play in protecting these.

These new safeguards for seabirds will help our most precious and iconic wildlife to thrive, and protect our marine environment for future generations to enjoy.

Brad Tooze, Natural England Area Manager for Northumbria:

Extending marine protection areas allows for much loved seabirds to feed and breed in a safe haven, ensuring they can thrive for generations to come in a safe and secure habitat.

Our consultation on extending the Special Protection Area at Teesmouth will help to protect populations of breeding little terns and common terns. Natural England has worked closely with our partners on the Tees to develop these proposals and we welcome views from the local community and stakeholders.

Special Protection Areas are sites designated to protect populations of rare

and vulnerable seabirds from human activity – including fishing or outdoor recreation – while minimising disturbance to birds’ open water feeding areas. There are already 45 such sites designated in English waters.

They are just one type of the many Marine Protected Areas in place around the UK to conserve rare, threatened and nationally important habitats and species for future generations. 35 per cent of English waters are part of the Marine Protected Areas network, covering over 200,000 square kilometres.

As part of the Government’s commitment to becoming a world-leader in marine protection, a consultation on designating [41 new Marine Conservation Zones recently closed](#), receiving an overwhelming 44,000 responses.

The proposed sites will cover an area almost eight times the size of Greater London and help protect species like the short snouted seahorse, stalked jellyfish and peacock’s tail seaweed. If designated, they will mark the most significant expansion of the UK’s ‘Blue Belt’ of protected areas to date.

The Government’s commitment to marine protection forms a key part of our [25 Year Environment Plan](#), an ambitious roadmap for a greener future.

Alongside expanding the Blue Belt, one of the world’s strongest bans on microbeads was [introduced last month](#) to protect our oceans and nine billion fewer bags have been distributed thanks to the Government’s [5p plastic bag charge](#).

In a further drive to clean up our seas, the Government has also set out ambitious plans to [end the sale of plastic straws, stirrers and cotton buds](#) and introduce a [deposit return scheme](#), subject to consultation later this year.
