

# Press release: Badsey Brook flood scheme open day

The open day will be held on Wednesday 25 October between 2pm and 6pm at:

West End Lane (access via site entrance)

Broadway

It will give visitors the opportunity to see the construction works in action and the progress made so far. Members of the Environment Agency project team will also be available to provide information and answer questions people may have.

Broadway, Childswickham and Murcot were severely flooded in 2007 following record-breaking rainfall across the area. The £4 million flood storage area in Broadway will be able to hold up to 135,000 cubic metres of water during times of flood and will only allow a set amount of water to flow downstream at times of intense and high rainfall. This will reduce flood risk along the Badsey Brook downstream of Broadway.

The scheme, which will reduce the risk of flooding to around 290 homes and businesses, is due to be completed in spring 2018.

Dan Wilkinson from the Environment Agency said:

This is a significant scheme for residents living in Broadway, Childswickham and Murcot who know only too well the devastating impact flooding can have. The open day will give them an opportunity to see the work in action and see for themselves how, once completed, the scheme will help reduce the risk of flooding.

Councillor Barrie Parmenter, Chairman for Broadway Parish Council, said:

Broadway Parish Council are delighted that the project is progressing well and which when completed, will improve the lives and alleviate the worries of many residents of Broadway and the surrounding area.

# Press release: River transfer project gives local communities more say

A project designed to give local organisations and communities more say over the management of local watercourses has entered a new phase with the launch of public drop-ins in four pilot areas throughout October 2017.

The project is exploring the potential to re-designate several sections of selected 'Main Rivers' as 'Ordinary Watercourses,' (a process known as 'de-maining') where – in agreement with the Environment Agency – partners such as Internal Drainage Boards (IDBs) or Lead Local Flood Authorities (LLFAs) are keen to take on the lead role of local watercourses.

The project is piloting these changes in 5 locations. 4 of these locations are now approaching the consultation stage of the process and drop-in events will be held in:

- areas of Norfolk and Suffolk
- Stour Marshes in Kent,
- The Isle of Axholme in the East Midlands
- South Forty Foot Catchment in Lincolnshire

The final pilot at Wormbrook and Allensmore Brook in the West Midlands will be running to a different timeline.

The project aims to bring significant benefits to local communities, allowing those who know the layout of their land to take control of their local watercourses, and could help pave the way for further de-maining opportunities throughout England.

For the Environment Agency, the project will also ensure resources are prioritised where the greatest impact on reducing flood risk can be achieved.

Rachael Hill, Flood and Coastal Risk Manager for the Environment Agency, said:

We are working with local organisations to strengthen local decision-making. Internal Drainage Boards and Lead Local Flood Authorities are very much on the ground in communities so giving them responsibility over their own watercourses is a win-win situation that will ensure that the right people are managing the right watercourses in the right places.

We welcome the launch of the community drop-in sessions and we look forward to working together on this project to benefit people and the environment.

Innes Thomson, Chief Executive of the Association of Drainage Authorities

(ADA), added:

This is an unmissable opportunity for local communities to have their say on how they would like to see their local watercourses managed in the best way to make use of the funds available, whilst improving the quality of those watercourses, the environment and community wellbeing associated with healthy, maintained rivers and streams.

The drop-in sessions are an ideal way to find out more about the plans, help allay possible concerns and, very importantly, to provide support for these trials so please do try and find time to come to one of them.

Gaining local support for the transfer of watercourses through engagement and consultation is essential for the success of the project. The public drop-ins will be an opportunity for local communities and interested parties to ask questions and influence the proposals.

This will be followed by a formal consultation on GOV.UK currently scheduled for December 2017 which will seek further views on the proposals. If there are no objections, changes to the watercourse will take place in July 2018.

Drop-in sessions:

East Midlands:

<b>Date</b>	<b>Time</b>	<b>Location</b>
26 October	2pm-5pm	Haxey Chapel- Stephen Jones Community Hall, DN9 2LA
31 October	10am-1pm	Coronation Hall, DN9 1RL

Lincolnshire:

<b>Date</b>	<b>Time</b>	<b>Location</b>
9 October	1pm-6pm	Rippingale Village Hall, PE10 0TA
11 October	1pm-6pm	Billingborough Village Hall, NG34 0QH
18 October	1pm-6pm	Helpringham Memorial Hall, NG34 0RJ

Norfolk and Suffolk:

<b>Date</b>	<b>Time</b>	<b>Location</b>
16 October	2pm-7pm	Kettlestone Village Hall, NR21 0AU
19 October	2pm-7pm	Dereham Memorial Hall Meeting Room, NR19 1AD
24 October	2pm-7pm	Halesworth Methodist Church, IP19 8LR
26 October	2pm-7pm	Wymondham Central Hall, NR18 0QB
27 October	3pm-7pm	Hunstanton Community Centre, PE36 5BW
31 October	2pm-7pm	Sea Palling and Waxham Village Hall, NR12 0US

Stour Marshes:

<b>Date</b>	<b>Time</b>	<b>Location</b>
4 October	2pm-7pm	Minster Village Hall, CT12 4BU
19 October	2pm-7pm	Little Chart Village Hall, TN27 0QB
25 October	2pm-7pm	Great Mongeham Parish Hall, CT14 9LL

## **[Form: Active farmer certificate – 2017](#)**

*Updated:* Page unarchived

### **Details**

This is the certificate that some farmers may need to send to the Rural Payments Agency to confirm their active farmer status.

There is also the latest guidance for accountants about how to fill in the form, which includes an annex that sets out some of the processes they need to follow.

Farmers need to take the form, the guidance and any relevant financial documents to their accountant.

For more information about the 'active farmer rule', read the latest Basic Payment Scheme rules.

## **[News story: Asian hornet outbreak contained in Devon](#)**

A recent outbreak of Asian hornets has been successfully contained by bee inspectors who promptly tracked down and destroyed their nest in Devon.

The hornets were first discovered in the Woolacombe area in September, but the National Bee Unit moved swiftly to find the nest and remove it.

No further live Asian hornets have been seen since the nest was treated with pesticide and removed earlier this month.

Nicola Spence, Defra Deputy Director for Plant and Bee Health, said:

I am pleased our well-established protocol to contain Asian hornets

has worked so effectively in Devon.

We remain vigilant, however, and will continue to monitor the situation and encourage people to look out for any Asian hornet nests.

Members of the public are a vital tool in spotting Asian hornets and we urge people to report any potential sightings through the Asian hornet app or online.

This included a two mile surveillance zone in Devon, with bee inspectors scouring the area to track the hornets and the nest. The Animal and Plant Health Agency also opened a local control centre to coordinate the response between the various agencies and teams involved.

Asian hornets pose no greater risk to human health than a bee, though they are a threat to honey bee colonies.

The hornet prey on honeybees, disrupting the ecological role which they provide and damaging commercial beekeeping activities. This is why Defra takes quick action to identify and destroy their nests.

The species arrived in France in 2004 and is now common across large areas of Europe. It was discovered for the first time in the British Isles in Jersey, Alderney and Gloucestershire last summer.

Asian hornets can be confused with their larger native European hornet counterparts; the Asian hornet abdomen is almost entirely dark while the European hornet's abdomen is largely yellow.

It is possible Asian hornets could reappear in the UK and members of the public alongside the nation's beekeepers are urged to report any suspected sightings.

- The 'Asian hornet watch' app is available to download from the Apple and Android app stores.
- Members of the public can also report sightings by email to [alertnonnative@ceh.ac.uk](mailto:alertnonnative@ceh.ac.uk) with a photo or on the Non-native Species Secretariat website.
- Details on the appearance of an Asian hornet can be found on the Bee Base guide or the non-native species identification guide.

**[Press release: A new era for marine science: green light for new Cefas](#)**

# headquarters in Lowestoft

A new era of marine science is set to become a reality, with planning permission granted to the Centre for Environment, Fisheries and Aquaculture Science (Cefas) to redevelop its headquarters site in Lowestoft. The proposals will invest £16 million to create a leading centre for applied science by building a new and modern office facility and by refurbishing existing laboratory facilities.

The project will provide Cefas and Defra (Department for Environment, Food and Rural Affairs) with significant running cost savings, greatly enhanced scientific collaboration and innovation workspace and improved environmental performance.

Refurbishment work is planned to start in November 2017 and the new office building is planned to commence in January 2018, once final partnership funding is in place. Morgan Sindall have been appointed contractors to lead the project works which are planned to complete by March 2019.

Fisheries Minister, George Eustice said:

Cefas has always been at the forefront of marine research and innovation, and I'm pleased this new centre is one step closer to reality. Once complete it will help bolster our research and understanding of sea life – solidifying our position as a world leader in marine science and a champion of sustainable fishing.

Tom Karsten, Cefas Chief Executive said:

Since 1902, Cefas has been providing UK Government with scientific evidence and advice to support the fishing industry and to ensure the sustainable use of the marine environment. I thank Defra, local Councillors and Planners for their commitment to these exciting proposals for our new Lowestoft Headquarters. This project represents a vital step in realising our vision for Cefas; to deliver world class science for the marine and freshwater environment.

Notes:

1. The Centre for the Environment, Fisheries and Aquaculture Science (Cefas) supports governments, businesses and society in the UK and internationally to ensure that seas and rivers are healthy and productive, thereby enabling food security and sustainable development. Cefas is the UK's most diverse centre for applied marine and freshwater

science. Starting as a small fisheries laboratory in Lowestoft in 1902, Cefas now employs 550 staff between the sites in Lowestoft and Weymouth, and our offices in English ports, Kuwait and Oman.

2. Cefas is an executive agency of the Department for Food and Rural Affairs (Defra) within the UK government. It provides ministers and government officials in the UK with impartial expert advice and evidence relating to marine and closely related environments and is a provider of UK statutory monitoring and inspection services, including national emergency response capabilities.
3. For more information contact: [estates2020@cefas.co.uk](mailto:estates2020@cefas.co.uk) or visit the [Cefas Estates webpage](#).
