

[Press release: Helping north east communities be flood resilient](#)

The Environment Agency has appointed a new team of engagement officers to help communities be more resilient to flooding in the North East.

The £280,000 a year project includes four new engagement officers spread across four areas – Northumberland, Tyne and Wear, Durham and Darlington, and Cleveland.

Funded by the Northumbria Regional Flood and Coastal Committee (NRFCC) for the next four years, the officers are working alongside partner organisations to help support communities.

It includes helping businesses and residents to understand their risk of flooding and ensuring those in flood risk areas are signed up to receive free flood warnings.

They're also helping communities prepare themselves for flooding, such as supporting them to develop community flood plans and recruit volunteer Flood Wardens in at risk communities.

The Community Engagement Officers are working on behalf of the Environment Agency and local authority partners.

As well as supporting residents and businesses, working alongside schools will play a key role in helping future generations understand their risk.

Direct support for communities

Phil Taylor, from the Environment Agency's Flood Resilience Team in the North East, said:

We've seen over the last few years alone just how devastating flooding can be for communities, so it's positive news that Northumbria RFCC has agreed to fund these dedicated officers to provide direct support to communities.

In areas where the Environment Agency's free Flood Warning Service is available the officers will be working to increase sign up to the service.

They'll also be helping develop community flood plans that will detail the action each community or business can take to reduce the impact of flooding, and help them return to normal life as soon as possible should a flood happen.

And working with schools and youth groups means children can be educated about what it means to be flood resilient and ensure the

messages delivered through the project have long-term impact in flood risk areas for years to come.

To find out more about your local flood risk and sign up to the Flood Warning Service Visit [the gov.uk web pages](#)

Local Information

Durham & Darlington

Anna Caygill is the new Durham & Darlington Community Engagement Officer. Anna is working on behalf of the Environment Agency and the Durham & Darlington Civil Contingencies Unit (CCU) to increase flood resilience in areas at risk of flooding.

There are over 4,000 properties at risk from fluvial flooding across Durham & Darlington's constituencies, however fewer than 54% of properties are signed up to receive alerts and warnings in areas where the free Flood Warning Service is available.

There are also approximately 10,000 properties at risk from surface water flooding which can occur rapidly without warning. Anna said:

I'd like to hear about all of the local flooding issues in Durham & Darlington and work with the local community to see if they can put actions in place to make themselves more resilient.

Previous work has already led to Community Flood Plans being established in areas like Lanchester, Chester-le-Street, Hurworth, and Neasham and I'm hoping to help other communities put similar measures in place while continuing to support the existing volunteers.

You can contact Anna at anna.caygill@environment-agency.gov.uk or 07867 372639.

Cleveland

Sarah Pearce is the new Community Engagement Officer for Cleveland. Sarah is working on behalf of the Environment Agency and the Cleveland Emergency Planning Unit (CEPU) to increase flood resilience in areas at risk of flooding. Due to its location, areas of Cleveland are affected by flooding from a number of sources including coastal, river (fluvial) and surface water.

In Hartlepool 900 properties are considered to be at risk of surface water flooding, and in Middlesbrough 2,300 are considered to be at risk.

Across the four Cleveland local authority areas, there are over 6,000 properties at risk from fluvial flooding, however sign up to receive alerts and warnings in areas where the free Flood Warning Service is available is low, for example 11% in Redcar, 13% in Stockton, and just 3% on Hartlepool Headland. One of Sarah's aims is to increase take up of the Flood Warning service. Sarah said:

Previous work across Cleveland has led to Community Flood Warden groups being set up in communities such as Skinningrove, where a flood plan has been developed to support the community in responding to flood events.

I want to help other areas set up new groups and community plans in response to flooding, as well as supporting existing groups. I'd also like to look at the potential to appoint Flood Champions in at risk communities.

You can contact Sarah at sarah.pearce@environment-agency.gov.uk or 07867 441 697.

Northumberland

Emma Craig is the new Community Engagement Officer in Northumberland. Emma is working on behalf of the Environment Agency and Northumberland County Council to increase flood resilience in areas at risk of flooding.

Over 300 properties were flooded in Storm Desmond in 2015 but there are over 3,000 properties at risk of fluvial flooding in the county. Sign up to receive alerts and warnings in areas where the free Flood Warning Service is available is around 60%.

There are also around 17,000 properties at risk from surface water flooding.

Emma said:

Many communities in Northumberland have created plans and taken action to make themselves more resilient after experiencing significant flooding during Storm Desmond.

I'll be continuing to work in the communities which were affected as well as other areas in Northumberland that remain at risk of flooding.

You can contact Emma at emma.craig@environment-agency.gov.uk or 0208 474 9845.

Tyne & Wear

Taryn Al-mashgari is the new Community Engagement Officer in Tyne & Wear. Taryn is working on behalf of the Environment Agency, Newcastle City Council, Gateshead Council, South Tyneside Council, North Tyneside Council and Sunderland City Council in communities at risk of flooding from all sources. Taryn will help communities, businesses, and schools to develop plans which will reduce the impact of a flood.

Over five years ago many communities in the Tyne & Wear region experienced serious flooding during 'Thunder Thursday'. Surface water flooding such as this can happen with very little warning so Taryn will be aiming to get communities to take action and prepare for flooding now.

As an example, there are more than 2,800 properties at risk from surface water flooding in Sunderland and 4,100 In South Tyneside, and 1,800 in Gateshead, as well as 1,500 in Newcastle.

There are around 600 properties at risk of fluvial flooding in Tyne & Wear.

Sign up to receive alerts and warnings in areas where the free Flood Warning Service is available in Tyne & Wear is around 14%. Taryn said:

Previous work in Tyne and Wear has developed some good practice. For example a network of flood volunteers in North Tyneside provide local information to the council during periods of bad weather which helps the council direct their emergency response resources. In Gateshead a Community Flood Plan has been developed for an area prone to flooding.

I'll be hoping to replicate this sort of community activity across other areas while continuing to support existing volunteers.

You can contact Taryn at taryn.al-mashgari@environment-agency.gov.uk or 0208 474 9842.

[Policy paper: Guildford temporary defences](#)

Guidlford has been identified as a community where a temporary flood defence could help reduce the impact of flooding.

[Press release: Clampdown on illegal fishing in Lincolnshire](#)

Fifteen anglers have been served notices for fishing offences committed on the River Witham. It comes after a clampdown on illegal fishing in which 180 spot checks were carried out to ensure anglers were properly licensed and fishing within the rules.

Enforcement officers were split into 4 teams on Sunday 20 August, as part of a multi-agency operation led by the Environment Agency.

180 offences uncovered

Anglers were caught allegedly committing a variety of offences including 2 for fish theft and one for using an illegal method.

Officers also seized an offensive weapon from an angler's vehicle while another vehicle was reported for being without tax and insurance.

Multi-agency operation

The Environment Agency's enforcement team worked in conjunction with the Midlands Wildlife Crime Group including officers from Derbyshire, Humberside, Lincolnshire and Nottinghamshire police forces and the [Angling Trust](#).

Lee Watts, Fisheries Enforcement Officer East Midlands for the Environment Agency, said:

We take illegal fishing very seriously. Anyone committing offences can expect to be prosecuted and face a substantial fine.

I am happy with the results, which show our partnership commitment to making our inland waterways free from illegal fishing activities.

I'd like to offer my thanks to all officers, police staff and Angling Trust personnel who took part and made it a successful operation. It's through partnerships like this that we can take action and send clear message to those who break the law.

Not only does illegal fishing damage the sport it also poses a serious risk of spreading fish diseases and invasive species. The irresponsible and illegal actions of a few can have widespread consequences for fisheries.

Angling Trust Fisheries Enforcement Support Service National Enforcement Manager, Dilip Sarkar MBE, said:

This was a perfect example of partnership working in action – and what can be achieved by everyone working together. As always, we are most grateful to our volunteers for so public-spiritedly giving up their time to help protect fish and fisheries. We look forward to more of these operations.

Hefty penalties

Anyone fishing illegally can expect to be prosecuted and face a fine of up to £2,500, and up to £50,000 for byelaw offences.

Last year, the Environment Agency checked more than 62,000 fishing licences and prosecuted more than 1,900 anglers for rod and line offences, resulting in fines and costs in excess of £500,000.

Anyone who suspects illegal fishing to be taking place should report the matter to the Environment Agency's incident hotline on 0800 80 70 60 or to [Crimestoppers](#) on 0800 555 111.

Any angler aged 12 or over, fishing on a river, canal or still water needs a licence. A full fishing licence costs from just £30 (concessions and other types available) or is free for those aged 12 to 16. [Licences are available via GOV.UK](#), by phoning 0344 800 5386, or from a local [Post Office](#).

Money from fishing licence sales is invested in England's fisheries and is used to fund improvements for anglers including protecting stocks from illegal fishing, pollution and disease; restoring fish stocks through re-stocking; eradicating invasive species; and fish habitat improvements. The

income is also used to fund the Angling Trust to provide information about fishing and to encourage participation in the sport.
