

[Collection: Producer responsibility regulations](#)

Updated: 'Packaging producer responsibility monitoring plan 2018' added under the 'Packaging' heading.

Producer responsibility is about making sure businesses that manufacture, import and sell these products are responsible for their end of life environmental impact.

The regulations require businesses to:

- minimise waste arising from these products and promote their re-use
- ensure the waste products are treated and meet recovery and recycling targets for the waste materials
- design products by reducing material use and enhancing reusability and recyclability

Enforcing compliance: the regulators

The UK environmental regulators for producers, producer compliance schemes and treatment facilities are:

[Environment Agency \(England\)](#)

[Natural Resources Wales \(Wales\)](#)

[Northern Ireland Environment Agency \(Northern Ireland\)](#)

[Scottish Environment Protection Agency \(Scotland\)](#)

[Department for Business, Energy and Industrial Strategy \(BEIS\)](#) for the ELV regulations

[Regulatory Delivery \(RD\)](#) for placed on the market regulations for WEEE and batteries, for distributors of WEEE and batteries, producers of industrial and automotive batteries and restrictions on heavy metals in vehicles.

[Guidance: Products removed from the energy technology product list \(ETPL\)](#)

Updated: List updated to include products prior to 1 April 2016

Products removed from the ETPL before April 1 2016.

[Detailed guide: GM Inspectorate: seed audit programme](#)

Updated: Recent GMI seed audit summary report published.

Introduction

In line with [Part VI of the Environmental Protection Act 1990](#), no genetically modified (GM) seeds may be imported to and / or marketed in the UK for commercial purposes without authorisation.

Companies importing or producing conventional seed in the UK must ensure appropriate controls are in place to minimise the risk of adventitious GM presence (AGMP) in the seed.

Seed audit programme

The GM Inspectorate seed audit programme is designed to help companies comply with the rules on GMOs in seed and ensure the action they take is correctly documented. The audits include seed that is to be marketed for commercial production and seed to be used for trial purposes.

The audits are carried out on behalf of Defra and participation is voluntary.

Guidance

These documents provide further information on the audit programme and explain the information that seed producers, importers and suppliers should obtain when seeking to ensure freedom from unauthorised GM presence.

A GM Inspector will check this information during an audit.

The guidance is annually updated before the audit programme begins.

(PDF, 367KB, 8 pages)
- [Detailed audit questionnaire](#)
(PDF, 118KB, 18 pages)

- [Basic audit data gathering template](#)
(MS Excel Spreadsheet, 528KB)
- [Gathering of basic data and detailed audit visits](#)
(PDF, 58.8KB, 1 page)

Audit summary reports

After a seed audit is completed, a detailed report is submitted to Defra showing the names of varieties imported and/or produced by the company and the assurances provided by the seed company for each seed lot or batch. A summary of these audit reports are published.

- [Recent GMI seed audit summary reports](#)
(PDF, 393KB, 28 pages)

Previous reports are available on the [archived GM Inspectorate web pages](#).

Contact

For further information on the timing of seed audits or the seed audit programme, contact a member of the GM Inspectorate.

Contact the GMI if you have concerns or information about unauthorised GMOs that you believe may have been released in England or Wales.

Policy paper: Managing the risk of future flooding in Bewdley, Worcestershire

Updated: Timeline updated

This document explains the work that is happening to protect Beales Corner/Wribbenhall, Bewdley from flooding.

National Statistics: Regional Renewable Statistics

Updated: Latest annual updates published.

The tables show a variety of renewable electricity data for the devolved administrations and the regions of England.

The totals tie in with the UK level data presented in the Digest of UK Energy Statistics.

The key data shown include the number, installed capacity and actual generation by various renewable technologies. Additional information on load factors and the association with economic activity is also shown.
