

The Community Plant Variety Office launches « CPVO Headlines », the new digital newsletter of the CPVO

On 1 December 2020, the CPVO launched "[CPVO Headlines](#)", the new digital newsletter of the Community Plant Variety Office.

"We realised that the way readers look for news and digest information has changed significantly in the past few years. With this in mind, we decided to modernise the format of CPVO's newsletter and to offer our subscribers a monthly update which is more digestible, newsworthy and engaging", said Martin Ekvad, President of the CPVO.

The newsletter can also be read online: "[CPVO Headlines #1: December 2020](#)", and a printable PDF version can be downloaded at the bottom of this page.

CPVO Headlines

The digital newsletter of the
Community Plant Variety Office
Issue #1 December 2020

Welcome to CPVO Headlines!

Dear readers,

Welcome to the new digital newsletter of the Community Plant Variety Office!

The format has been modernised and it will be published more regularly so that it is up to date with our latest news. We hope that this will contribute to further engagement with you, our closest professional partners, institutional stakeholders and users of the EU plant variety protection system.

2020 has been a very challenging year for all of us because of the COVID pandemic. We are now in constant virtual meetings and we are missing the joy of being together.

If you wish to receive CPVO Headlines directly in your e-mailbox, you must subscribe by filling in the [online registration form](#). Subscribers will be able to unsubscribe at any time.

If you have any question, please contact communication [at] cpvo [dot] europa [dot] eu

Article – New EU rules: digitalisation to improve access to justice

On 23 November, Parliament adopted two proposals aimed at [modernising justice systems in the EU](#), which will help to decrease delays, increase legal certainty and make access to justice cheaper and easier.

New regulations will implement several digital solutions for cross-border taking of evidence and service of documents with the aim of making cooperation between national courts in different EU countries more efficient.

Endorsing **distance communication technologies** will lower costs and help evidence to be taken quicker. For example, to hear a person in a cross-border proceeding, videoconferencing can be used instead of requiring a physical presence.

A decentralised IT system that brings together national systems will be established so that documents can be exchanged electronically in a faster and more secure way. The new rules include additional provisions to **protect data and privacy** when documents are transmitted and evidence is being taken.

The regulations help simplify procedures and offer legal certainty to people and businesses, which will encourage them to engage in international transactions, thereby not only strengthening democracy but also the EU's internal market.

[Press release – MEPs approve deal on tap water and demand that EU water legislation be respected](#)

The [agreement with member states on the drinking water directive](#) was approved with 73 votes to 2 and 5 abstentions. The new rules will improve the quality of tap water by tightening the maximum limits for certain pollutants such as lead and harmful bacteria. They also aim to cut plastic litter by encouraging the use of tap water. This could be done by providing water free of charge in public buildings or for a low service fee, and to customers in restaurants, canteens, and catering services.

Comply with EU water legislation by 2027

The Committee also adopted a resolution on the implementation of EU water legislation with 68 votes to 2 and 10 abstentions.

While MEPs agree with the Commission's assessment that the Water Framework Directive (WFD) is fit for purpose and should not be revised, they strongly regret that half of the bodies of water in the EU are still not in good condition and that the objectives of the WFD have not yet been reached. This is mainly due to inadequate funding, particularly slow implementation, and

insufficient enforcement. The precautionary and polluter-pays principles are not being implemented properly, and many member states are using exemptions too broadly, they say.

The resolution underlines that the WFD objectives need to be better integrated into sectoral policies, particularly in agriculture, transport and energy in order to be fully compliant with the WFD and for all surface and ground waters to achieve 'good status' by 2027 at the latest.

MEPs urge member states to reduce the use of fertiliser and pesticides and call for such targets to be integrated and implemented in the national Strategic Plans under the EU's farm policy. Additional action regarding chemicals and pollutants, water pricing policies, hydropower and urban wastewater treatment is needed, they say.

Next steps

The plenary will vote on the deal on the drinking water directive and on the resolution on the implementation of the EU water legislation during its 14 – 17 December session.

Background

[The Fitness Check](#) of EU water legislation in December 2019 concluded that the legislation is adequate but that there is room for improvement related to investments, implementation, integrating water into other policies, chemical pollution, administrative simplification and digitalisation.

While the Water Framework Directive established a framework to protect 110.000 bodies of surface water in the EU, the implementation has been lacking. Less than [half of the EU's bodies of water are in good status](#), even though the deadline for achieving this was 2015.

December 01, 2020 [About the EUIPO](#)

Alicante News November 2020

The latest edition is out now.

Alicante News

Up to date information on IP and EUIPO-related matters

The aim of Alicante News is to provide up-to-date information on EUIPO-related matters, as well as on other general IP issues, to the users of the EU trade mark and design registration systems.

In this issue:

- Enter GView
- First GI registration in ARIPO supported by EUIPO
- European cooperation: online improvements in Romania
- European Cooperation: new online services in Portugal
- Monaco and San Marino join Designclass
- European Cooperation: Slovenia completes the digitisation of its trade mark and design dossiers
- Fax Phase Out
- Webinars from the EUIPO Academy
- Case Law

[Press release – Press Conference by EP President Sassoli and Portugal’s Prime Minister Costa](#)

Wednesday 2 December – 12:40 pm

EP Press room and via Interactio

Tomorrow morning, ahead of the press conference, EP President David Sassoli and political group leaders will have a remote meeting with Portugal's Prime Minister António Costa to discuss the priorities of the Portuguese EU Council Presidency starting on 1 January 2021.

The press conference afterwards will be interpreted into Italian, Portuguese, English and French. You can follow it live from 12:40 via [Parliament's webstreaming](#) and [EbS+](#).

President Sassoli will take the floor from Parliament's Anna Politkovskaya press conference room, Prime Minister António Costa from the Centro Cultural de Belén in Lisbon.

Information for the media – Use Interactio to ask questions

Journalists who want to ask questions, can connect via Interactio by using the link <https://broadcaster.interactio.io/join?code=HIAGWR22EJPB>

Interactio is only supported on iPad (with the Safari browser) and Mac/Windows (with the Google Chrome browser).

When connecting, enter your name and the media you are representing in the first name / last name fields.

For better sound quality, use headphones and a microphone. Interpretation is only possible for interventions with video.

Journalists who have never used Interactio before are asked to connect 30 minutes before the start of the press conference to perform a connection test. IT assistance can be provided if necessary.

For more details, check the [connection guidelines](#) and [recommendations for](#)
