

[News story: Susan Park appointed as Director General, Universal Credit operations](#)

The Universal Credit Programme, led by Neil Couling, has completed the national roll-out of the Live Service, and is rolling out the Full Service to a further 5 jobcentres each month. There are now 450,000 claimants on Universal Credit, with the Full Service available in 46 jobcentre areas. The roll out of Full Service to 50 jobcentres each month begins in October.

To prepare DWP's Operations for this, Permanent Secretary Sir Robert Devereux has today announced some new operational roles.

While Neil continues to lead the overall programme, Susan Park will take on a new operational role, as Director General Universal Credit Operations with accountability for the operation of Universal Credit, across both jobcentres and service centres.

Sir Robert Devereux said:

I am delighted to announce the appointment of Susan Park.

She is an extremely talented public servant, with over 20 years in operational delivery and is uniquely placed to lead the scaled up roll out of Universal Credit Full Service from this autumn.

Director General, Universal Credit operations Susan Park said:

It's a privilege to take on the role of Director General, Universal Credit Operations.

Universal Credit is changing welfare for the better and helping people across the country to improve their lives.

I look forward to working with colleagues across the department to deliver the Full Service roll out of Universal Credit to millions of people across Great Britain.

Susan joined the Civil Service in the 1980s, and has worked for the DWP since it was established in 2001. She has a wealth of experience in operational delivery most recently as the director of the Child Maintenance Group from 2012 before taking up post as Director of Work Services in January 2015.

[Press release: Valentine's Day of action against illegal waste activity](#)

Environment Agency enforcement officers, on the 14 February, paid unannounced visits to 14 sites across Oxfordshire, Buckinghamshire, Surrey, Hampshire and West Berkshire in a bid to stamp out waste crime and protect the environment from the threat of pollution.

Named Operation Arrow, officers targeted sites suspected of operating in the waste business without the required environmental permits, flouting the law and committing crime.

Waste that ends up at unregulated sites is often stockpiled in vast quantities and for long periods of time. The waste can pose a significant risks to the environment, blighting communities with smoke fumes and causing noise and odour complaints. Illegal waste operators also undermine the work of legitimate waste companies, creating an unfair playing field for business.

Helen Page, Enforcement Team Leader at the Environment Agency said:

We want to make sure the right waste goes to the right place – to protect the environment and local communities. Site visits on our days of action are just one of the ways we are tackling waste crime to help make sure this happens.

We are really pleased with what we achieved. Of the 14 sites visited, 5 were found to be operating illegally. The information we have gathered is helping us target our work at those involved in organised environmental crime and where their activities pose the greatest risk to the environment.

Everyone can do their bit to reduce waste crime by making sure that any waste for disposal is collected by a licensed waste carrier and taken to a properly permitted, legitimate waste site.

To check if someone is registered please visit environment.data.gov.uk/public-register/view/search-waste-carriers-brokers.

Press release: Information – The King of Modern War!

Stalin was wrong! Artillery is no longer the King of War. Information technology has transformed the modern battlefield at sea, in the air and on land, and it is arguably the new King of War. In April the Defence Science and Technology Laboratory (Dstl) will help to demonstrate this as part of the Royal Navy led Information Warrior exercise.

Information Warrior builds on the impressive success of last year's Unmanned Warrior exercise. It focuses on how information can be used offensively and defensively to give the UK's armed forces a battle winning advantage.

As part of the Royal Navy's Project X programme, Dstl is working on smaller, more agile and user-friendly secure communications. This will enable new concepts of operations by delivering greater situational awareness. The Royal Marines will put this system to the test during the exercise to ensure that it allows their command to communicate effectively with troops on the ground.

Dstl's Open Architecture Combat System (OACS) is another enabling technology, making it much easier for new applications – developed by a wide range of providers – to be integrated into ships' combat systems. OACS underpinned the success of Unmanned Warrior 16, and will be used during Information Warrior to allow artificial intelligence applications such as STARTLE to be deployed.

Artificial intelligence (AI) is a major theme of Information Warrior. One of the first potential applications of AI is STARTLE. This uses AI-based reasoning to help operators analyse air movements to identify potential threats in seconds. Other Dstl projects will apply AI and Big Data to enhance the analysis of imagery from Unmanned Aerial Vehicles to assess potential landing sites and routes to support landing forces.

Cyber resilience is another major theme. Dstl's technical experts are supporting the RN to ensure that its forces are secure and resilient to cyber threats, in accordance with the national cyber security strategy. Consequently, Information Warrior will exercise the Royal Navy's ability to defend itself against cyber threats, as well as conventional threats, ensuring that our cyber defences and skills remain state of the art in this rapidly evolving area.

Better information exploitation (IX) is another priority for Information Warrior. Dstl's support in this area includes the Adaptive Tactical Information eXploitation (ATIX) and Every Platform A Sensor (EPAS) projects. ATIX uses all the available data sources, applying data analytics, machine learning and statistics to improve the commanders' understanding of complex situations. This enables them to make more effective decisions. Currently much of the data gathered by sensors is not used. EPAS will address this by extracting useful information on events, such as ship tracks, from every available source. This builds a comprehensive store of data that can be

analysed in real time, or at a later date.

Discussing Information Warrior, Dstl's Chief Executive, Jonathan Lyle, said:

"Information has transformed the face of conflict. Dstl is excited to be part of the Royal Navy's Information Warrior exercise – in which our scientists will be demonstrating and testing some of the latest innovations in cyber, information systems, Big Data and artificial intelligence research."

Regular updates on the progress of the Information Warrior exercise can be found on the Royal Navy's [website](#).

[Press release: Labour Market Statistics](#)

From:

First published:

15 February 2017

Part of:

James Brokenshire has today welcomed the latest Labour Market Statistics, which show continued stability for the Northern Ireland economy.

Secretary of State for Northern Ireland, Rt Hon James Brokenshire MP said:

I welcome today's Labour Market Statistics which demonstrate continued stability in the Northern Ireland economy. The number of people in work has increased, the unemployment rate is at an eight-year low and the number of people claiming unemployment-related benefits has fallen by 1,000 in January alone – the tenth consecutive monthly decrease.

As the UK leaves the EU and forges a new role in the world, this Government is determined to continue building a stronger economy and a Northern Ireland that works for everyone.

Keith Taylor MEP: European Commission 'final warning' reveals the need for a new UK Clean Air Act

Green Party

15 February 2017

Keith Taylor MEP: 'The government has been exposed, yet again, as failing in its duty to take even the most basic action to combat an air pollution crisis that needlessly claims the lives of more than 50,000 people in Britain every year.'

Keith Taylor, Green MEP for the South East, has slammed the Government's 'repeated failures' on air pollution as the European Commission issues a '[final warning](#)' to the UK over air quality breaches.

The European Commission has sent a "final warning" to the UK for failing to address repeated breaches of legal air pollution limits in 16 areas including London, Birmingham, Leeds, and Glasgow.

The notice is being served just 24 hours after a [new poll](#) revealed 58% of Britons believe air pollution levels across the UK are damaging to their health while 65% support ClientEarth's campaign for a new Clean Air Act.

Keith, a vocal air quality campaigner and a member of the European Parliament's Environment committee, said:

"The government has been exposed, yet again, as failing in its duty to take even the most basic action to combat an air pollution crisis that needlessly claims the lives of more than [50,000 people in Britain every year](#). It's no surprise that two-thirds of the public want the Prime Minister to do more to combat the toxic air they are forced to breathe."

"The failure highlighted by the European Commission is as much moral as it is legal; Ministers have displayed an extremely concerning attitude of indifference towards their duty to safeguard the health of British citizens."

"That the European Commission is having to hold to account this government for a public health crisis that costs the British public more than [£20bn a year](#) is a shameful indictment of the Conservatives' irresponsible and deadly apathy."

“Theresa May’s administration is failing to do the bare minimum, as required by EU laws the UK itself helped to set, to improve the quality of the air we all breathe. The bare minimum. Where embraced and enforced, EU air pollution limits are helping to [prevent thousands of deaths every year](#) and saving [billions of pounds in direct health costs](#). This government readily acknowledges that it is EU law that has been the [driver of positive air quality action](#) in the UK. But the Prime Minister’s plans for an extreme Brexit puts those vital EU safeguards at risk.”

“The government must finally face up to its moral and legal responsibility for tackling Britain’s air quality crisis. Ministers must now be forced to make a firm commitment to abiding by and fully implementing EU air quality laws. Theresa May must also make a new Clean Air Act a means to maintain and strengthen these vital protections as Britain prepares to leave the EU.”

Keith is a co-signatory of a motion which will be presented at the Greens’ Spring Conference in Liverpool which calls on the Party to formally back ClientEarth’s Clean Air Act proposal.
