

[Speech: Why I'm giving education a huge boost: article by Theresa May](#)

As we leave the European Union and begin a journey to a brighter future for our country, the mission of this government is not just to [negotiate the right deal for Britain with Europe](#), but to deliver a better deal for ordinary working families at home.

So at the heart of our [Plan for Britain](#) is a bold domestic agenda of genuine economic and social reform that will lay the foundations for a stronger, fairer and better Britain. Crucially it will ensure future generations of young people from every background and in every part of our country are ready and able to make the most of the opportunities ahead.

Wednesday's [Spring Budget](#) will not just maintain our economic stability and increase our economic resilience, as vital as those measures are, it will focus on giving our young people the skills they need to secure the high-paid, high-skilled jobs of the future. It will ensure British businesses have the future workforce to succeed and support a [Modern Industrial Strategy](#) that spreads growth and prosperity to all sections of society and all regions of the country.

To achieve this requires ambitious and far-reaching reform. Today the UK is placed 16th out of the world's 20 developed economies when it comes to how many people have a technical education. So tomorrow this government will set out the biggest overhaul of post-16 education in 70 years with a multi-billion pound drive to improve technical training, including new technical versions of A levels and 900 hours of teaching each year.

But to give every young person in Britain the best possible start in life also requires a solid ground in academic subjects from the very beginning. So this Spring Budget will continue [my mission to make Britain the world's great meritocracy](#) with a good school place for every child.

Today almost 1.8 million more pupils are taught in good or outstanding schools than in 2010, with 89% of schools in England rated good or outstanding, the highest proportion ever recorded.

Yet despite the progress we have made, there are still 1.25 million children attending primary and secondary schools in England which are rated by Ofsted as requiring improvement or inadequate. And if schools across the north of England and the Midlands had the same average standards as those in the south, nearly 200,000 more children would be attending good schools.

The brutal and unacceptable truth is that for far too many children in ordinary working class families, the chance they have in life is determined by where they live or how much money their parents have. It is selection based on house prices and parental income, because when you are working 2 jobs and struggling to make ends meet, it is no good being told that you can

choose a better school for your children by moving to a different area or paying to go private. These are not choices you can make – and they are not choices you should have to make.

That is why I have made it a personal mission to increase the capacity and diversity of the school system so that there is a good school place that caters to the individual needs and abilities of every single child, whatever their background and wherever they live.

This begins with free schools. I was the Shadow Education Secretary who first argued for their introduction, and I remain a passionate advocate. It is the expansion of academies and the creation of free schools that have been the biggest driver of increased diversity and progress in our school system over the last seven years. And our Schools White Paper, which will be published in the coming weeks, will take this expansion further by asking universities and private schools to do more to provide new good school places, including by sponsoring new free schools. It will remove the barriers that prevent more good faith-based free schools from opening, and it will enable the creation of new selective free schools so that the most academically-gifted children get the specialist support to fulfill their potential regardless of their family income or background.

So Wednesday's Spring Budget will provide hundreds of millions of pounds so that free schools will continue to open well into the next Parliament. It will confirm funding for up to 140 new schools creating well over 70,000 new places. This will include funding for specialist maths schools, like the brilliant [King's College London Maths School](#) that I visited on Monday – a great example of a free school, supported by a university, providing a stretching and tailored education for the most able young people irrespective of their background.

Wednesday's Budget will also remove another gross inequity in the system. Today free travel to school for children from disadvantaged backgrounds is restricted to children attending non-selective schools, meaning that transport costs can become a barrier to these children attending selective schools. That completely undermines the meritocracy we are seeking to build, so on Wednesday we will extend this financial support to cover selective schools too.

If we are to give our children and grandchildren a fair chance to succeed in an ever more competitive world, we have to build a future where every child can access a good school place. That means decisively shifting Britain's education system and building a great meritocracy so that children from ordinary working families are given the chances their richer contemporaries take for granted. Wednesday's [Spring Budget](#) takes the next steps in making this a reality and building a country that truly does work for everyone.

News story: Defence Minister launches new Army apprentice awards

As the largest provider of apprentices in the UK, the Ministry of Defence is celebrating the tenth National Apprenticeship Week by honouring its apprentices right across the country and across the services.

To kick start the week, the British Army announced they will host their first ever Apprenticeship Awards in 2018.

Announcing the awards at Gibraltar Barracks in Camberley, Defence Minister Mark Lancaster introduced some of the highest performing soldier apprentices who have recently qualified in their field, including Margate-born Lance Corporal Tristan Willis, who is pursuing a career in the infantry.

Defence Minister Mark Lancaster said:

As the UK's largest apprenticeship provider, we are delivering a huge range of training and skills right across defence, and it's great to see the likes of Tristan taking advantage of that. I'm sure the awards launched today will motivate more like him to excel in their field and help the military to continue leading the way for British apprenticeships.

24 year-old Army apprentice Lance Corporal Tristan Willis of the 1st Battalion, Mercian Regiment said:

I came into the Army to gain some qualifications. So far I've done my level 1 and 2 in both Maths and English, have also gained a Public Services Apprenticeship and I'm currently enrolled to do an Engineering apprenticeship, despite not having any experience with cars or anything like that.

The RAF Apprenticeship Awards, now in its sixth year, will also take place today at RAF Honington. The annual event is a chance for the RAF to promote and celebrate the achievements of their valued apprentice mechanics, technicians and engineers.

Elsewhere, in London this week, the Navy will be celebrating their apprentices on-board the Type 23 frigate HMS St Albans which is docked alongside Thames Quay at West India Dock this week.

Two apprentices from each service, along with one of the MOD's many civilian apprentices, will be attending an exclusive lunch reception at the House of Commons on Thursday in an event aimed at recognising the esteem in which apprenticeships are held.

Together with industry, the MOD is working to achieve three million apprenticeship starts by 2020 as part of the Government's manifesto.

Budget representations

I have made representations for more money for social care and for local schools in West Berkshire and Wokingham. I have also urged action to reduce excessive business rate rises, where the government has now indicated its intention to take some helpful measures tomorrow. I look forward to the budget to see what results.

Water supply and floods

Yesterday I met Thames Water and reaffirmed the need for more action to be taken to ensure adequate water supplies for the south-east by adding to reservoir capacity. I also urged more retention of water in reservoirs or areas where it can be stored during periods of heavy rainfall and swollen rivers to reduce the flood risk.
