

Ministry of Women & Child Development leads social media campaign #WeAreEqual for International Women's Day

Leading up to International Women's Day on March 8, 2017, the Ministry of Women and Child Development has

"I will miss Gordon's smile, his laugh, and his energy"

3 February 2017

Gordon Aikman, who raised £500,000 for MND research and successfully campaigned for a doubling of the number of MND nurses in Scotland, has died. Gordon worked for the Labour Party in the Scottish Parliament and was the Director of Research at Better Together, making a massive contribution to Scotland. You can donate to MND Scotland [here](#).

Below is a comment from Kezia Dugdale following the announcement of Gordon's death:

"I am utterly bereft. Although we all knew time was precious, Gordon's death comes as a shock.

"I have lost a best friend and the world has lost a man who made it a better place. I will keep Gordon's husband Joe and all his family in my thoughts and prayers. The wedding of Gordon and Joe was one of the happiest days of my life. I will treasure those memories.

"I will miss Gordon's smile, his laugh, his energy, his brilliant dance moves and terrible singing voice, and his positive outlook on life despite the hand he was dealt towards the end. I will miss his advice and I will miss campaigning with him to advance the causes dear to us. But most of all I will miss just spending time with my friend.

"All of us in the Labour Party will be forever grateful for his commitment to our movement, particularly during his time working in the Scottish Parliament and his pivotal role in the Better Together campaign. His death will be mourned by all those who had the pleasure to work alongside him.

“Although we grieve for Gordon, we must not allow our sadness to erase the many happy memories we have of his time with us. To respond to his MND diagnosis by raising more than £500,000 for research into this horrible disease so that others don’t have to suffer like he did should inspire us all.

“Gordon’s constant determination to do good for others was an antidote to a world so full of fear and anger. I hope that will be his legacy.”

Press release: Milestone reached for Ipswich Flood Barrier scheme

The cofferdam, which is a structure that can be pumped dry to enable construction of the barrier to take place below the river bed level, is now in place.

Over the last few months, VBA the contractors working for the EA, have installed the cofferdam, pumped it dry and they have now excavated the river silts and gravel.

The next stage is to pour the base slab, which is more than 700 cubic metres of reinforced concrete. At the moment the steel reinforcement is being placed by a team of 20 people and the first pour of the base slab will be completed in the next couple of weeks.

The actual tidal gate is being fabricated in Holland and will be delivered later in the year when the concrete structure and control building have been completed.

Progress has been made elsewhere on the site, with the foundations for the flood walls and the control building now installed.

The project, which will reduce the risk of flooding to 1,608 homes and 422 businesses and support key infrastructure, has been partnership funded by: the Environment Agency, Ipswich Borough Council, Department for Communities and Local Government, the Haven Gateway Partnership, and the New Anglia Local Enterprise Partnership.

EA project manager Andrew Osborne said:

The integrated team at the barrier are making good progress and are on programme to complete the works in spring 2018.

I am really looking forward to the next key milestone, which is the

delivery of the tidal gate from Holland later in the summer.

Nick Culshaw, VBA operations director, said:

It has been a real honour to be working with and supporting the EA on this vital project in Ipswich. In order to protect around 2,000 properties, both commercial and residential, within the town from flooding in the future, a 20m wide tidal barrier gate, along with the relevant controls, will be installed.

The barrier, along with additional flood defences undertaken by VBA, will prevent any surge tides and allow the control of fluvial flow as required in the future.

The scheme is due to be completed in 2018.

If you're worried about the risk of flooding to you or a vulnerable person check your flood risk and other information here: <http://ow.ly/SWdMz>.
