

Applications for Chevening Scholarships open 2 August 2022

Applications for Chevening Scholarships to study in the UK are open between 2 August and 1 November 2022, with applications to be submitted via [Chevening.org/apply](https://chevening.org/apply)

Chevening Scholarships are awarded to individuals from all backgrounds who can demonstrate that they have the commitment and skills required to create positive change, and can show how a UK master's degree will help them do that. The scholarship offers full financial support for scholars to study for any eligible master's degree at any UK university whilst also gaining access to a wide range of exclusive academic, professional, and cultural experiences.

Since the programme was created in 1983, over 50,000 professionals have had the opportunity to develop in the UK through Chevening. There are more than 1,500 scholarships on offer globally for the 2023/2024 academic year, demonstrating the UK's ongoing commitment towards developing the leaders of tomorrow.

Head of Scholarships at the UK Foreign, Commonwealth and Development Office (FCDO), Naomi Rayner, said:

As the world continues to tackle major global issues such as climate change, international cooperation is more essential than ever. Chevening seeks to build an international community of people who are committed to working together to drive positive change. We do this by bringing together incredible people from around the world and supporting them, through education, to achieve their goals.

In the UK we are proud of our world class universities and we know that our learning environments are enriched by the wide diversity of cultures, experiences and viewpoints represented on our campuses. Chevening scholars make a significant contribution to these communities, as well as becoming an important part of our network of over 50,000 alumni.

Chevening represents the very best of the UK, welcoming people from across the world to study, grow, and thrive. Being a part of the Chevening network instils a strong sense of pride and responsibility. I am consistently inspired by the passion and commitment of those in the Chevening community and I look forward to hearing from this year's applicants.'

British Ambassador to Thailand, Mark Gooding, said:

If you are someone who is passionate about driving change, whether on a local or global scale, if you want to be the best at what you do and if you have the imagination to inspire others, then a Chevening scholarship could be the perfect opportunity for you.

There is no such thing as a 'typical' scholar. Your age, race, gender, religion and cultural background do not matter to us. We want to see that you have energy, curiosity, compassion a clear vision for your future and the ability to achieve your goals. If this sounds like you, then you are very likely to fit in with our community of over 50,000 alumni worldwide.

Our alumni network is full of dynamic influencers who have shared the same experience that you will. They can offer encouragement, mentorship, advice, and contacts. When you return home after your studies you should feel well-equipped to start making a real difference professionally or socially.

There is a lot to gain from submitting a thoughtful application, so if you have what it takes to be a Chevening Scholar, I would encourage you to apply before the 1 November deadline.

The call for new applicants follows the selection of 21 scholars from Thailand, who won an award to study at a UK university this year. Successful applicants have been sharing their stories through the #ChosenForChevening hashtag on [Twitter](#) and Instagram.

ENDS

Notes to editors

Chevening Scholarships are the UK Government's global scholarship programme, funded by the Foreign, Commonwealth and Development Office (FCDO), partner organisations, and partner universities. The scholarships support study at UK universities – mostly one year taught master's degrees – for individuals with demonstrable potential to become future leaders, decision-makers, and opinion formers.

Chevening began in 1983 and has developed into a prestigious international awards scheme. Chevening Scholars come from over 160 countries and territories worldwide, and over the past five years we have awarded almost 10,000 scholarships. There are over 50,000 Chevening Alumni around the world who comprise an influential and highly regarded global network.

The name 'Chevening' comes from Chevening House in Sevenoaks, Kent – currently the joint official residence of the UK's Foreign Secretary. More information is available at chevening.org

[CMA provisionally clears NortonLifeLock / Avast merger](#)

NortonLifeLock and Avast both offer cyber safety software to consumers under a variety of different brands. Products include antivirus software (also known as endpoint security software), privacy software (such as VPNs) and identity protection software. The companies announced plans to merge in a £6 billion deal in August 2021.

The Competition and Markets Authority (CMA) referred the merger for an in-depth Phase 2 inquiry in March 2022, after identifying competition concerns during an initial Phase 1 investigation.

Following a more detailed Phase 2 investigation, the CMA has now provisionally concluded that the deal does not raise competition concerns in the UK.

The CMA's investigation has found that the supply of cyber safety software to consumers is rapidly evolving. Providers of both paid-for and free services are continually developing and improving their products over time to meet different and changing customer needs.

While the CMA's Phase 1 decision raised concerns about the extent of competition that the merged business would face, a more detailed analysis of the deal has found that the merging businesses face significant competition. This comes from McAfee – their main rival – plus a range of other suppliers that currently have a smaller market position in the UK.

The CMA also found that security applications provided by Microsoft, which holds a unique position in the market as the owner of the Windows operating system, are increasingly important alternatives for consumers.

In recent years, Microsoft has improved its free built-in security application so that it now offers protection which is as good as many of the products offered by specialist suppliers. In addition, applications recently launched by Microsoft for its customers bring its cyber safety offering closer to those of the merging businesses and are likely to further strengthen Microsoft as a competitor going forward.

On this basis, the CMA considers that the merging businesses will continue to face sufficient competition after the deal completes and has provisionally concluded that the merger does not raise competition concerns.

Kirstin Baker, chair of the CMA inquiry group, said:

Millions of people across the UK rely on cyber safety services to keep them safe online.

After gathering further information from the companies involved and other industry players, we are currently satisfied that this deal won't worsen the options available to consumers. As such, we have provisionally concluded that the deal can go ahead.

The CMA welcomes responses from interested parties to its provisional findings by 24 August. These will be considered ahead of the CMA issuing its final report, which is due by 8 September 2022.

[Ground-breaking fishing research projects given funding boost](#)

Projects to help minimise the impact of lost fishing nets on the environment and innovative research into new trawl designs to reduce the number of other species accidentally caught by fishermen (bycatch) are among those to receive funding from the £100 million [UK Seafood Fund](#), the UK Government announced today (Wednesday 3 August).

The Fisheries Industry Science Partnerships (FISP) scheme – which is part of the £100m UK Seafood Fund – brings together industry and researchers to deliver pioneering projects which promote the sustainable management of the UK's fisheries and help equip the fishing industry for the future.

So far over £4 million has been made available by the UK Government to fund projects under the scheme. From today, a new funding round for the FISP is opening, with increased awards of up to £1 million for two-year projects and new eligible funding areas, allowing for a wider variety of more ambitious projects to receive support. The UK Seafood Fund will also be extended from 2024 until 31 March 2025 to help longer-term projects to succeed by giving them more time to use the investment.

In Shetland, one of the largest fishing communities in the UK which landed around £100 million of fish in 2019, Fisheries Minister Victoria Prentis today visited projects supported through the scheme and heard directly from local fishermen.

Fisheries Minister Victoria Prentis said:

Our world-class fishing and seafood sectors are packed full of expertise and innovation, and the UK Seafood Fund is making sure these excellent schemes have the financial backing needed to succeed.

We are already seeing tangible results – from LED lights in fishing nets to attract target species and deter bycatch through to novel whelk pot designs.

I want our fishing industry to thrive, to be more sustainable and to invest in the people who will make it a success for decades ahead – so I encourage everyone to bring forward their pioneering ideas.

UK Government Minister for Scotland Malcolm Offord said:

It's fantastic to see four Scottish projects benefiting from nearly £270,000 of UK Government investment. It will not only cement our fishing industry's reputation as one of the best in the world, but also elevate its potential even further.

From research into maximising cockle stocks by the University of Glasgow to monitoring Ling on Shetland with the University of the Highlands and Islands, there is so much hard work going on in Scotland to benefit the industry everywhere.

And this is only the start. With the extension of the UK Seafood fund into 2025, I want to encourage more Scottish innovators to present their plans for funding.

Following the initial launch of the FISP scheme in 2021, when approximately [£1.4 million was allocated](#), a number of ground-breaking projects are already underway and making significant progress.

For example, SafetyNet Technologies is exploring a new type of fishing net using LED lights as an effective tool to deter unwanted fish and prevent bycatch. FISP funding has been used to host workshops with scientists based in Aberdeen and to conduct sampling trips ahead of starting commercial trials on lobster and squid vessels this month.

Successful bidders from FISP Round 2, announced today, include:

- CEFAS will work with a group of skippers in the Farn Deep's nephrops (langoustine) trawl fishery off the north-east coast of England to test selective trawls, chosen from designs that have demonstrated potential to reduce unwanted catches in limited scientific trials.
- The Holderness Fishing Industry Group are partnering with the University

of Hull to help identify practices to reduce the impact of lost shell fishing gear (LSG) and assess hidden costs to the industry and individuals.

- Bangor University and partners will research the impact of towed fishing gear – such as scallop dredging and beam trawling – on blue carbon in seabed sediments.

Dr John A. Terschak, Project Leader of the Yorkshire Ghostfishing Initiative, said:

The Holderness Fishing Industry Group is pleased to have received Defra support towards our industry-led efforts to address the factors that contribute to static gear loss; reveal the impacts of lost gear to the environment, the industry, and the wider economy; and identify practices and measures that could potentially reduce the chances of losing gear in the future.

Our Yorkshire Coast fishers are committed to ensuring the marine environment remains healthy and productive in order to continue to provide for their families as they have for generations past.

Larissa Kunstel-Tabet, Project Manager at Safety Net Technologies said:

The successful outcomes of our workshops and agreed sampling protocols have paved the way for an exciting project and the trials ahead. Working closely with the skippers and scientists, there is a building excitement to get out on the boats, begin the trials and collect the data.

The [UK Seafood Fund](#) supports infrastructure improvements, research and innovation around the UK coastline and is made up of four funding pillars: science and innovation, infrastructure, skills and training, and exports support.

Round 1 of the [Skills and Training Scheme](#) will also launch today, with up to £5 million to be made available to invest in training to develop and improve courses to upskill the industry in essential skills. Round 2 of the Infrastructure Scheme, which seeks to build capability across the UK fishing sector supply chain, will open in September. All projects will benefit from the extension of the UK Seafood Fund until March 2025.

[Foreign Secretary welcomes extension](#)

of truce in Yemen

Press release

The Foreign Secretary has welcomed the two-month extension of the truce in Yemen, which has been agreed today 2 August 2022.

Foreign Secretary Liz Truss said:

The UK welcomes the extension of the truce in Yemen.

This is a significant achievement and further step towards the lasting peace in Yemen.

This truce must now lead to a permanent ceasefire

Since the truce came into force on 2 April the number of civilian casualties is at a seven-year low and regional security has been strengthened.

The truce has delivered tangible benefits to Yemeni civilians, such as decreased fuel costs due to the flow of fuel into Hodeidah Port and an agreement to restart flights out of Sana'a, as well as the stopping of cross-border attacks by the Houthis into Saudi Arabia and the United Arab Emirates.

The UK hosted a Quint meeting on 18 July, bringing together representatives from the Sultanate of Oman, Kingdom of Saudi Arabia, United Arab Emirates, and United States. The group affirmed our full support for UN efforts to extend the truce and reiterated our commitment to stand by the people of Yemen.
