

## Press release: Not-for-profit music enterprise boss banned for second time

The Music Hub Plus was incorporated in April 2015 as a Community Interest Company, with Ashford's Kathryn Holton (39) appointed a director at the same time.

The company was set-up to provide music courses and a unique space for musicians in the local area. But two years later, The Music Hub Plus entered into creditors voluntary liquidation in April 2017 due to loss of contracts and increased creditor pressure.

Kathryn Holton resigned as a director in August 2016 before the company went into liquidation eight months later. Nevertheless she continued to act as a director as The Music Hub was winding down.

However, she was strictly forbidden from running companies for seven years as she had accepted a disqualification undertaking in October 2016 in connection with two other companies that had entered into insolvency proceedings.

And during her time as a director of The Music Hub Plus, Kathryn Holton was remiss in her director duties as she caused the company to fail to maintain adequate records and / or deliver such records as were maintained to the liquidators.

This failure has meant the liquidators have been unable to determine The Music Hub Plus's final assets, liabilities and deficiencies, as well as the legitimate nature of payments out of the community interest company's account totalling more than £62,000.

These payments included more than £10,000 worth of expenditure on the company credit card, as well as close to £9,000 paid to the community interest company's landlord, when the lease was held in the names of a former director and former employee.

Within the undertaking, Kathryn Holton did not dispute that she had failed to ensure The Music Hub Plus maintained adequate accounting records and deliver them up to the liquidators, and that she had also contravened restrictions imposed upon her following a previous directorship disqualification.

Effective from 5 March 2019, Kathryn Holton is banned for ten years from directly or indirectly becoming involved, without the permission of the court, in the promotion, formation or management of a company.

Peter Storm Aldridge (20), from Ashford, the formally appointed director of The Music Hub when it entered Liquidation, also signed a disqualification undertaking in respect of the failures regarding the company's accounting records. His ban is effective from 18 February 2019 for six years.

Anthea Simpson, Chief Investigator for the Insolvency Service, said:

Not only did Kathryn Holton disregard her duties as a director of a community interest company but she defied a disqualification undertaking she had personally signed-up to when she continued to run The Music Hub Plus.

Ten years is a significant ban and should serve as a warning to others who run community interest companies that you are not immune from acting within the law when it comes to being a responsible company director.

Kathryn Holton is of Ashford and her date of birth is May 1979

Peter Storm Aldridge is of Ashford and his date of birth is December 1998

THE MUSIC HUB PLUS CIC (Company number 09569673)

A disqualification order has the effect that without specific permission of a court, a person with a disqualification cannot:

- act as a director of a company
- take part, directly or indirectly, in the promotion, formation or management of a company or limited liability partnership
- be a receiver of a company's property

Disqualification undertakings are the administrative equivalent of a disqualification order but do not involve court proceedings.

Persons subject to a disqualification order are bound by a [range of other restrictions](#).

The Insolvency Service administers the insolvency regime, investigating all compulsory liquidations and individual insolvencies (bankruptcies) through the Official Receiver to establish why they became insolvent. It may also use powers under the Companies Act 1985 to conduct confidential fact-finding investigations into the activities of live limited companies in the UK. In addition, the agency deals with disqualification of directors in corporate failures, assesses and pays statutory entitlement to redundancy payments when an employer cannot or will not pay employees, provides banking and investment services for bankruptcy and liquidation estate funds and advises ministers and other government departments on insolvency law and practice.

Further information about the work of the Insolvency Service, and how to complain about financial misconduct, is [available](#).

# [News story: UK government delivers key strand of international transparency agenda](#)

This group is a partnership of industry, civil society and government.

[Read the 2017 report](#)

- Although a voluntary initiative, 58 UK companies (39 oil and gas and 19 mining and quarrying) participated in the 2017 UK EITI process
- in 2017 industry gross value added was £22 billion and net receipts from taxation was £847 million
- the sector is directly responsible for 40,000 jobs, with an estimated total of 280,000 jobs, often highly skilled, supported by the UK upstream oil and gas industry
- exports were £617 million in 2017
- all payments for 2017 have been fully reconciled by an Independent Administrator.

EITI is a global standard to promote open and accountable management of natural resources. It is designed to improve accountability and public trust for the revenues paid and received for a country's oil, gas and mineral resources.

The UK is a major supporter of EITI's work across many developing nations, helping those countries manage their natural resources for the long-term benefit of their citizens.

In October 2014, the UK was successfully admitted as an EITI candidate country and is one of 51 implementing countries. The UK is currently undergoing validation to assess whether EITI implementation in the UK is consistent with the EITI Standard. The initial results of the validation will be available shortly.

## [Press release: IT supplier closed after continuing work of wound-up companies](#)

Bradwell Communications Limited was wound-up in the public interest on 15 February 2019 at the High Court (Manchester). The Official Receiver has been appointed liquidator of the company.

In setting out the basis for the petitions to wind-up the company, the court heard that Bradwell Communications was incorporated in October 2015 and supplied IT equipment.

The company was investigated as a result of connections identified between Bradwell Communications and two associated companies, Direct United (Services) Ltd and Fibre Tex Ltd that were investigated in an earlier case.

Direct United (Services) and Fibre Tex were closed down by the courts in April 2018 after they were found to have operated with a lack of transparency and had traded in an improper manner that resulted in both companies incurring significant liabilities.

Following more recent enquiries, investigators discovered that Bradwell Communications had continued the trade and operations of Direct United (Services) Ltd and Fibre Tex Ltd despite having been wound-up by the courts.

Enquiries into Bradwell Communications were hampered because the company and those that ran it lacked transparency and failed to produce books and records, which meant that investigators were unable to establish who was in control of the company or from where it was trading.

Investigators were also unable to substantiate the company's filed accounts, which purported to show significant assets and retained profits, or verify transactions passing through the company's bank accounts with a value of circa £270,000.

David Hope, Chief Investigator for the Insolvency Service, said:

Bradwell Communications and those individuals in control of it paid scant regard to their obligations and have sought to abuse the privileges that limited liability offers.

This should serve as strong warning that we will act swiftly to protect the public and business community by investigating and shutting down companies that abuse the corporate regime.

All public enquiries concerning the affairs of the company should be made to: The Official Receiver, Public Interest Unit, 2 Floor, 3 Piccadilly Place, London Road, Manchester, M1 3BN or email: [piu.north@insolvency.gsi.gov.uk](mailto:piu.north@insolvency.gsi.gov.uk)

Bradwell Communications Ltd – company registration number 09811443 – was incorporated on 6 October 2015. The company's registered office is at 56 Halford Street, 2nd Floor, Leicester LE1 1TQ.

The petition was presented under s124A of the Insolvency Act 1986 on 21 December 2018. The order was made by Deputy District Judge Carter.

Company Investigations, part of the Insolvency Service, uses powers under the Companies Act 1985 to conduct confidential fact-finding investigations into the activities of live limited companies in the UK on behalf of the Secretary of State for Business, Energy & Industrial Strategy (BEIS). # [Press release: Willesden's landmark yellow cranes make way for new HS2 Rail Logistics Hub](#)

The 22 metre high cranes, weighing up to 290 tonnes, have stood above the track next to the busy west coast mainline for almost 30 years. Each one had to be lifted up and moved 100 metres to the side, so they could be safely dismantled away from passing trains.

The removal of the 3 cranes was one of the most complex engineering challenges the project has faced so far, requiring thousands of hours of planning and preparation.

[Watch as one of the cranes is dismantled](#)

Once complete, 16 freight trains a day are expected to serve the planned Rail Logistics Hub, delivering equipment and construction materials and taking out material excavated by the tunnel boring machines digging the tunnels east to Euston and west to the outskirts of the capital.

In total, the vast 150,000 square-metre rail hub is expected to process more than 6 million tonnes of excavated material, the equivalent of taking 300,000 HGVs off the roads.

Welcoming the progress, HS2 Project Director, Colin Thomas, said:

Once up and running, the Rail Logistics Hub will be the beating heart of our construction activity in the capital, enabling us to deliver equipment and materials and take out huge amounts of excavated material by rail.

The safe and efficient removal of the Willesden cranes is the first step to making that possible, and a very visible reminder of the progress we are making in the delivery of Britain's new high speed line.

HS2's enabling works contractor, a Costain Skanska joint venture (CSjv), working with JF Hunt Ltd (Demolitions) and ALE Heavy Lift used a mobile crane, itself weighing 550 tonnes, to move the first 2 container cranes last year.

The third, and heaviest of the container cranes, was moved by the same team over the Christmas break using a specialist moving motorised jacking system. It was brought down to ground level on the 6th February, in a controlled collapse.

After weakening the structure of the crane, the team used a 49 ton excavator to pull the whole thing down onto specially built crash mats. This crane has now been disassembled at ground level, with 95% of the structure set to be recycled.

Neal Carter, PMO Director at Costain Skanska Joint Venture (Csjv), said:

Costain and Skanska are making strong progress in preparing the area between Euston and the Colne Valley for the new HS2 route. The demolition of the third and largest crane marks the high point of a busy 12 months on site at Willesden.

Our thanks goes to the whole team who safely delivered this challenging piece of work, including working over Christmas Day to move a crane so that no rail customers were disrupted.

Originally known as Willesden Euro Terminal, the site was built to handle container traffic through the Channel Tunnel. The first scheduled freight train to cross the channel departed from Willesden on 27th June 1994, 4 months before the first Eurostar.

A fourth container crane, at the north-west end of the site, will be left in position.

The work is part of HS2's early works programme, with more than 1,000 people at work across London, clearing the way for the start of construction. At Euston, demolitions are well underway alongside the project's pioneering archaeology programme, while clearance of Washwood Heath, site of the project's future rolling stock depot, is also in full swing.

Work to clear the concrete slab covering the site of the new Birmingham Curzon Street station is also underway. In total more than 7,000 jobs are supported by the HS2 project, both directly and in the UK-wide supply chain.
