

Press release: 34,000 households previously capped have moved into work

Since the introduction of the cap in April 2013, 150,000 households have had their benefits capped. Around 81,000 of these are no longer capped, with 34,000 households having moved into work.

Work and Pensions Secretary David Gauke said:

It is right that people who are out of work are faced with the same choices as those who are in work and these figures show that the benefit cap has been a real success. But behind these figures are thousands of people who are now better off in work and enjoying the benefits of a regular wage.

With record levels of employment and over three quarters of a million vacancies at any one time, even more people have the opportunity to change their lives for the better.

The benefit cap incentivises work, including part-time work, as anyone eligible for Working Tax Credit (or the equivalent under Universal Credit) is exempt.

The benefit cap is set at £20,000 a year outside London and £23,000 in Greater London to reflect higher rent costs.

Anyone working and receiving Working Tax Credit is exempt from the cap, as are households where someone receives Disability Living Allowance (DLA), Personal Independence Payment (PIP), or the support component of Employment and Support Allowance (ESA). Those claiming Carer's Allowance or Guardian's Allowance are exempt from the cap.

Speech: "The Arms Trade Treaty will remain central to the United Kingdom's approach to preventing irresponsible

trafficking in arms"

Thank you Mr President.

And I would like to begin by expressing my thanks to Jieyi and his team for a very successful Presidency last month. And to welcome Vassily to the Security Council; our new Russian colleague. And I'd like to wish you, Amr, all the very best for the month ahead as President of the Council.

And you've certainly got us off to a flying start with the unanimous adoption of Resolution 2370 today which the United Kingdom is very pleased to support.

And I hope that you have started the month as you mean to go on, because there is a lot to do together and we need to maintain the unity and activism of this morning as we grapple the challenges of the month ahead. And there is no greater challenge, Mr President, than the unrelenting scourge of terrorism.

It is a threat that we all face; a threat that we must all unite to defeat. Through this text, we have committed to take practical steps to do just that, first by stopping terrorists' deadly use of explosive devices, and second by stopping their illegal supply of small arms and light weapons.

We need only look to Mosul, Mr President, to its ruined buildings and ruined lives, to see that these weapons and explosives are crucial enablers of the brutality of groups like Daesh.

Over three years Daesh used small arms and light weapons and explosive devices to impose their sick ideology on the people of Mosul, systematically persecuting anyone who dared to stand in their way. Three years on, thanks to the bravery of the Iraqi Security Forces, Daesh have now been defeated in Mosul. But not content with years of brutality, Daesh have left behind a bitter, bloody legacy for those returning home; a city littered with booby traps and other improvised explosive devices.

Make no mistake the indiscriminate use of these devices goes against the basic tenets of International Humanitarian Law and the basic tenets of human decency.

And that's why the United Kingdom is committed to developing practical approaches that reduce the use and availability of improvised explosive devices. It's why we've committed to spend \$129 million over the next three years to tackle the problem of IEDs, explosive remnants of war, and landmines. And it's why we're committed to developing an effective and informed network across the international community; one that helps track key components and prevents the manufacture of these devices.

In parallel, we need to do more to combat the illicit trafficking, and crucially, the diversion, of small arms and light weapons. It's not enough to just investigate and dispose of illicit weapons. We must also prevent the moment when a legal weapon becomes diverted for illegal use.

The Arms Trade Treaty remains the most important instrument at our disposal to do that. It's a robust, effective, legally-binding Treaty; one that took years to agree. We must utilise it to its fullest extent, drawing on its transparent and consistent standards to regulate the global arms trade.

So I strongly urge all States to join the Arms Trade Treaty. This Council has already made a call to the international community to consider signing and ratifying this vital instrument, captured in the most comprehensive resolution adopted on small arms and light weapons; 2220.

I deeply regret that we were unable today to repeat unanimously that call. But rest assured; the Arms Trade Treaty will remain central to the United Kingdom's approach to preventing irresponsible trafficking in arms.

Before I give up the floor, Mr President, I think it's important to recognise that the words in this resolution are only as good as their implementation outside this chamber.

As an example, it's simply not good enough to express our support for arms embargoes mandated by the Security Council in this resolution if we are unwilling to make them a reality in areas of genuine need around the world.

If you look at South Sudan, last year this Council had a real chance to take steps to lessen the carnage caused by the uncontrolled flow of weapons there. And yet, when we voted to impose an arms embargo, we failed. The United Kingdom maintains that it is long past time for us to return to that issue. And when we do, I hope that we will channel some of the fervour for arms embargoes that we've found in this resolution today.

Thank you.

[News story: Government fire safety testing programme continues](#)

The second in the government's series of fire safety tests of cladding and insulation combinations has been completed by the Building Research Establishment (BRE).

This test was of a wall cladding system consisting of Aluminium Composite Material (ACM) cladding with a polyethylene filler (category 3) with stone wool insulation.

The government's expert panel advises that the results show this combination does not meet current building regulation guidance.

111 buildings are currently known to have this combination of materials in

their wall cladding systems – 90 of which are local authority or housing association owned or managed.

Cladding samples from all these buildings had already been tested and failed earlier combustibility tests conducted by BRE. Building owners were advised to take immediate action by implementing interim safety measures and working with their local fire and rescue service to complete a fire safety audit.

Today's (2 August 2017) test results reinforce the evidence already provided to these building owners about fire risks.

Adding to earlier advice provided to them following the initial tests, [further detailed advice](#) has been issued to building owners. They need to act on this advice to ensure the safety of residents. The government is working closely with all affected building owners to ensure the advice is being followed.

Last week (28 July) the government [announced the independent review](#) of building regulations and fire safety. It will examine the regulatory system around the design, construction and on-going management of buildings in relation to fire safety as well as related compliance and enforcement issues.

The government's fire testing programme continues and further test results will be published when they are available.

[News story: GC team thanked for leading interactive DNA extraction workshop](#)

Dr Malcolm Burns represented the UK at the European Network of GMO Laboratories (ENGL) Steering Committee meeting held at the end of June

[Dr Malcolm Burns](#), Principal Scientist and Special Advisor to the GC, represented the UK at the 33rd ENGL Steering Committee meeting held at the JRC-Ispra (Italy) site in June.

Malcolm gave a presentation to the ENGL Steering Committee, summarising the outcome and action points resulting from the [DNA extraction workshop](#) he had helped organise and chair in early June. The ENGL Chair and Head of Unit of Food and Feed Compliance (EC Directorate F), Prof. Hendrik Emons, personally thanked Malcolm for the model approach to organising such an interactive workshop, citing all of the positive feedback he had received from participants in attendance at the event.

As a result of the workshop, the ENGL Steering Committee approved a draft proposal to establish a new Working Group in this topical area and asked Malcolm to contribute to the mandate of the Working Group. Malcolm was also asked to spearhead any publications from the workshop, and to consider leading on any official EU/ENGL guidance in the area.

For more information on our work on the GMO area contact us.

Press release: New export partnership with Turkey to boost UK trade

The government's export credit agency, UK Export Finance (UKEF) and its Turkish counterpart, Export Credit Bank of Turkey (ECBT) have signed the agreement as the government increased its support for UK businesses trading with Turkey.

UKEF and ECBT will partner to identify and promote opportunities for UK-Turkey trade. They will also now be able to co-finance projects in other countries, combining their financial support to help UK and Turkish exporters secure major global contracts.

This comes as UKEF support for exports to Turkey doubles to up to £3.5 billion, making an additional £1.75 billion available for UK companies selling to Turkey and for Turkish investors buying British products and services. UKEF financing is also now [available in Turkish Lira](#), along with 40 other global currencies, making it easier for Turkish companies to buy UK products using their local currency.

International Trade Minister, Greg Hands, said:

This partnership is a boost to our trading relationship and businesses in both countries. Working with Turkey to secure contracts for UK and Turkish exporters, and increasing our support for UK businesses trading with Turkey, will open new opportunities, not only in Turkey, but across the world.

Adnan Yildirim, General Manager, Export Credit Bank of Turkey, said:

I am very excited about this partnership, as the opportunity for stronger ties between UK and Turkish businesses will have huge benefits for both countries' continued growth and prosperity. This agreement lays the groundwork for significant engagement and will act as a strategic tool to enhance the already robust economic relations between the two countries who are longstanding close

allies. I expect that both sides will start to reap the fruits of the agreement in the shortest time.

The UK and Turkey already shared £11.9bn worth of trade in 2016, up 70% on 2009. The UK and Turkey are committed to further strengthening this relationship in coming years.

1. [UK Export Finance](#) is the UK's export credit agency and a government department, working alongside the Department for International Trade as an integral part of its strategy and operations.
2. It exists to ensure that no viable UK export should fail for want of finance or insurance from the private market. It provides finance and insurance to help exporters win, fulfil and ensure they get paid for export contracts.
3. UKEF can support companies of any size and in any sector, from goods to services and intellectual property.
4. UKEF has a [regional network of export finance managers](#) supporting export businesses.
5. UKEF supports exporters with a range of products that include:
 - Bond insurance policy
 - Bond support scheme
 - Buyer & supplier credit financing facility
 - Direct lending facility
 - Export insurance policy
 - Export refinancing facility
 - Export working capital scheme
 - Letter of credit guarantee scheme
6. Find the latest information on [UKEF's country cover positions](#).
