

[News story: Winners of Pensions Dashboard Techsprint revealed as FinTech Week 2017 draws to a close](#)

The event, hosted at Aviva's Digital Garage in Hoxton, brought together over 20 leading technology firms with consumer groups and industry experts to develop the best ideas for how pension dashboards can revolutionise retirement planning for ordinary pension savers.

Using the Pensions Dashboard prototype unveiled by the Pensions Dashboard Project Group on Wednesday morning as a starting point, the participants worked overnight to develop their ideas.

The winners were:

- Wobi, Sigma, Pension Portal and Pension Hub – the 'Consumer Champion' award for their personal pension timeline combined with life event nudges
- Bravura, MyFuture Now and True Potential – the 'Eureka' and 'People's Choice' awards for their 'Act Your Age' financial age comparison tool
- Digital Space, GBST, NEST, Sprint Enterprise and SSP Advisor – 'Speed-build' award for their 'Lifeline' holistic savings tool incorporating pensions alongside other finances

The TechSprint was part of [FinTech Week 2017](#) which saw thousands of firms, investors, regulators and authorities from around the globe meet in London to celebrate the UK's world leading FinTech industry.

The Economic Secretary to the Treasury, Simon Kirby, said:

I am delighted at the success of FinTech Week 2017. It has been fantastic to see how Britain is leading the way in this crucial sector. I am clear that the government will do everything it can to help firms seize the opportunities FinTech presents as we forge a bold new role for ourselves in the world and build the highly skilled, highly productive economy we all want.

I want to congratulate the TechSprint winners on their fantastic ideas and thank everyone for taking part. It is great to see the potential FinTech has to help consumers now and in the future.

Team 'Act Your Age', the winners of two TechSprint awards, said:

A fantastic event which showed what a group of strangers can achieve in one day if they are collaborative and open. Our approach to give people more information about their pension was to keep it

simple – and keep it effective.

FinTech Week 2017 ran from Monday to Thursday with events organised by government, regulators, trade bodies and industry. It underlined the UK's status as the best place in the world to build a FinTech firm and showcased the country's most cutting-edge FinTech firms – and the impact they have on real people.

On Wednesday over 800 people attended the government's first ever International FinTech Conference. Over 100 UK FinTech firms mixed with hundreds of investors from every continent, in a bid to increase investment in the sector.

[Video highlights of the International FinTech Conference 2017](#)

Speakers travelled from far and wide to attend the event, including Adrienne Harris, special assistant to President Obama for economic policy, flying from the United States of America.

The conference featured a series of workshops covering topics like payments, open-banking, how to co-invest with the BBB, roboadvice, cyber security and financial inclusion. It closed with 14 UK firms, including Plum, Disperse and Onfido, pitching directly to hundreds of investors on the main stage.

Opening the International FinTech Conference, Chancellor Philip Hammond highlighted the importance of exciting new sectors like FinTech and artificial intelligence in driving a modern, productive economy.

The Chancellor said:

We can't remain the number one place for FinTech and other technologies of the fourth industrial revolution by simply relying on our ingenuity, talent and openness, we have to go out and get the business.

Responsible for innovations like contactless payments, banking apps and online crowd funding, the sector is worth nearly £7 billion to the UK economy and employs over 60,000 people in the UK.

It is changing the way we bank and, thanks to Britain's entrepreneurial spirit and our world leading financial sector and regulatory environment, independent experts rank the UK as the best place to start and grow a FinTech firm anywhere in the world.

Further information on Pension Dashboard:

- pension dashboards have the potential to revolutionise retirement planning by allowing people to see all of their pension savings in one place
- at the moment there is no easy way for people to see the value of all of

their pensions, with people having to track down their data themselves, locate missing records and wait for up to date estimates

- research has shown that over a third of people approaching retirement find it difficult to keep track of their pension pots and there is currently around £400 million worth of pension pots laying unclaimed
- pension dashboards should change this by helping people access their pensions information more easily

News story: New maritime exam centre opens on Tyneside

The Maritime and Coastguard Agency (MCA) has officially opened the new North East Exam Centre, which is based at South Tyneside College. The centre will provide a location for Deck, Engineering and other Oral Examinations for the maritime community.

Speaking at the opening, Katy Ware, Director of Maritime Safety and Standards at the MCA said: 'The Marine School at South Tyneside College is a world-renowned centre of excellence for marine education and training, and so we are delighted that the college is now also home to this new exam centre, the first of its kind in the UK.'

'This new centre not only represents a significant change in the way the MCA delivers our Survey and Inspection responsibilities, but it also means maritime students no longer need to spend time and money travelling to a Marine Office for an examination, everything they need to get qualified is right on their doorstep.'

The Exam Centre has been opened as part of a new way of working for the MCA's Survey and Inspection, replacing the Tyne Marine Office which closed on 3rd March. Surveyors who worked at the Tyne Marine Office are now working remotely, a move which follows a period of extensive consultation in 2016

Press release: Waste scam now sees Boston targeted

This time a Boston farmer faces the cleanup bill for 250 tonnes of waste after being approached and asked if he wanted tarmac road planings that can be used to repair roads and farmyards on their land.

The Environment Agency issued a [warning last week](#) after 2 farmers in the Grantham area suffered the same fate, with one of them facing an estimated bill of £300,000 to dispose of the waste after they found baled rubbish on their land instead of the promised tarmac road plannings.

In the recent Boston case, a neighbour made the farmer aware of the scam warnings issued last week after the initial 250 tonnes of waste were left, and this ensured that no further waste was dumped on the site.

The Environment Agency is urging all landowners to be wary and not become the next victim of illegal waste disposal and dumping.

Advice from the Environment Agency includes:

- use reputable agents and brokers
- carry out suitable checks and due diligence, i.e. get the individuals details, vehicle registration, ask where the waste is coming from (address, permit number, waste carriers registration)
- inform them you'll be contacting the Environment Agency or call us whilst they are there
- don't agree to accept any waste until you have carried out some checks and had a cooling off period to fully consider the offer

Peter Stark, Senior Enforcement Officer, said:

Waste criminals can be very convincing and persuasive, sometimes offering £1000s in cash up front. Don't be tempted by quick money because you could end up with not only a massive disposal bill but also harm to the environment, flies, polluting liquids running out of bales of waste and increased risk of fire.

We will investigate the illegal waste incidents fully and take enforcement action where necessary. The recent case shows that farmers in the region are particularly at risk of this scam.

However, the landowners may have to pay significant sums to remove the waste legally. Waste crime is a serious issue diverting as much as £1 billion per annum from legitimate businesses and Treasury.

Although these specific incidents occurred in Lincolnshire, we want landowners and farmers everywhere to be vigilant.

The Environment Agency provides impartial advice to customers, individuals and businesses to help them grow. Our local officers will be happy to talk to you, can make public register checks whilst you are on the phone or you can make checks on the [GOV.UK website](#) for free, or you can call the Environment Agency's customer contact centre on 03708 506 506.

The Highways Agency and county council's highways department and their contractors will always use legitimate waste carriers and sites for the reuse or disposal of waste. They may approach farmers and landowners to see if they

want to reuse tarmac road planings or crushed rubble and concrete to repair road and yard areas, but farmers need to register the [Ul waste exemption](#) with the Environment Agency and abide by the rules.

The vast majority of waste sites that the Environment Agency regulate are well run and provide essential waste management services. The Environment Agency are there to help the legitimate businesses. Waste stored inappropriately can create issues for neighbours like smells and pests. It can also have a detrimental effect on the environment and impact on rivers and streams. There is a high risk of waste fires due to the waste not being stored in the correct manner.

Everybody has a part to play to help solve the waste crime problem and make sure waste is managed responsibly. If you see or suspect illegal waste activities, report it anonymously to [Crimestoppers](#) or call 0800 555 111.

[News story: Defence Secretary agrees closer cooperation with India](#)

Sir Michael attended today the first meeting as part of the 2015 Defence and International Security Partnership (DISP), with his Indian counterpart Arun Jaitley.

The pair discussed UK-Indian defence industries, upcoming exercises and global security among other topics. The Defence counterparts jointly set out their ambitions to design, make, exercise, transform, train and co-operate together. They reaffirmed their intent for a stronger, deeper, wider relationship that delivers growth and jobs in the UK and India, improves

regional security and supports both nations' interests globally.

UK Defence Secretary Sir Michael Fallon said:

As Britain steps up globally, we continue to develop our close security partnership with India. Our countries are recognised globally as leaders in defence and we remain steadfast in our commitment to regional security, growing our defence industries and supporting our mutual interests.

Our nations face the same threats and we will work closely together to harness British expertise and Indian brain power to develop cutting edge technologies and equipment that benefit both of our Armed Forces.

The Defence Secretary visited Mumbai and Delhi over three days. During the visit Sir Michael laid a wreath at the Taj Mahal Palace Hotel in Mumbai to commemorate the 2008 terror attacks, visited an Indian Naval ship, delivered speeches at two think tank events and laid a wreath at Delhi's India Gate to honour Indians who fought and died in the First World War.

Defence Secretary Sir Michael Fallon laid a wreath at India Gate to honour the 74,000 Indians who served and died in the Second World War. Crown Copyright.

Today's meeting between the Defence Ministers marked the inaugural annual UK-India Strategic Defence Dialogue, as laid out in the DISP. The DISP agreed to Capability Partnerships to help collaborate with Indian industry under the Make in India agenda and Defence Minister Harriett Baldwin addressed the Make in India Conference in February this year.

Over the past decade, the UK has exported £2.15 billion of defence equipment and services to India. From learning from each other on joint aircraft carrier journeys, to collaboration on defence science and technology projects, the UK and India are elevating their partnership, bringing greater opportunities for their respective defence industries and Armed Forces.
