

[Press release: Boeing to open new production facility in Sheffield](#)

Boeing Sheffield will enable the aerospace company to bring the manufacture of key high-tech actuation components and systems in-house. These include components for [Boeing's](#) next-generation 737, 737 MAX and 777 aircraft. This should enhance production efficiency and reduce costs.

Locating the plant alongside the [University of Sheffield's](#) world-class [Advanced Manufacturing Research Centre \(AMRC\)](#) will also allow Boeing to initiate a major research and development programme. Specifically the aerospace company will look to innovate new techniques in manufacturing.

New jobs are also expected to be created in 2018.

Boeing is a co-founder of the AMRC. It is a member of the [high value manufacturing \(HVM\) Catapult Centres](#), supported by Innovate UK.

Sir Michael Arthur, President of Boeing Europe and Managing Director of Boeing UK and Ireland, said:

The UK provides Boeing with the talent and infrastructure we need to grow and maintain a high level of productivity and quality to meet our significant order book.

We are proud to expand our relationship with the UK still further with Boeing Sheffield. Our decision to start manufacturing high-value components in the UK is a step-change in our engagement and a further example of Boeing's commitment to grow here, supporting the UK's long-term prosperity.

The Boeing Sheffield news follows the recently announced [partnership between the AMRC and McLaren Automotive](#).

Ruth McKernan, Innovate UK's Chief Executive said:

This significant further investment and partnership by Boeing in Sheffield and the AMRC is excellent news for the region. It is testament to world-class expertise and facilities provided by the AMRC, and the high value manufacturing Catapult, supported by Innovate UK.

It comes off the back of McLaren Automotive's recent announcement that it will open a £50 million composites technologies centre next to the AMRC, illustrating the strength of advanced manufacturing

innovation in the UK.

[News story: Warm welcome for UK diabetes prevention programme in Dubai](#)

Healthcare UK secured the first commercial Letter of Intent to participate in a new diabetes prevention programme in the Middle East. The programme has been developed in partnership with NHS England, Public Health England, and Diabetes UK.

Diabetes is an urgent public health challenge shared by the UK and the Gulf countries. A commercial organisation in Qatar is now working with UK health organisations to scope and roll out the prevention programme in Qatar.

Our approach with the diabetes programme has been to take an existing UK capability and make the learning from it available overseas. This is a model that we are looking to replicate in other areas.

Growing demand for UK healthcare in the Middle East

[Arab Health](#) is an important event for Healthcare UK as there is growing demand for healthcare in the Middle East. Healthcare UK has now widened its strategic focus to include Qatar and Oman, alongside Saudi Arabia, the United Arab Emirates and Kuwait.

The Healthcare UK team works closely with:

- our partners in UK embassies and consulates across the region
- the International Healthcare Management Association (UKHIMA) – established by Healthcare UK to help UK suppliers respond to high-value opportunities by bringing together consortia of exporters

Minister Blackwood puts the spotlight on mental health and innovation

The UK presence at Arab Health was headed up by [Nicola Blackwood](#), Parliamentary Under Secretary of State at the Department of Health.

The minister had a packed programme, leading a large number of high-level discussions with ministries of health in the region. Several of these discussions were about mental health and innovation, areas in which the minister has a particular interest.

The minister highlighted the NHS digital health initiative, [Improving Access](#)

[to Psychological Therapies](#), and also attended a demonstration of 3D tools that can be used for surgical training.

Value of building strategic partnerships

Through seminars, meetings and the HealthCare UK stand, we established several new links between UK suppliers of healthcare services and interested buyers at Arab Health 2017.

Together with UKHIMA, we ran a series of seminars showcasing the best of UK healthcare in fields that are in greatest demand in the Middle East: disease prevention and healthcare innovation. Sessions included breakthroughs in gene therapy and the latest advances in paediatric radiology.

Healthcare UK worked with the investment company, Ashmore, to run an event aimed at promoting the value of strategic partnerships to the UK organisations attending Arab Health. The event highlighted the benefits of partnerships between funders, NHS organisations, and local organisations in ensuring business success.

The Healthcare UK team at their stand in the heart of the Arab Health trade show.

Arab Health

Arab Health is the largest gathering of healthcare professionals in the MENA region with:

- 4,400 of the world's leading healthcare companies
- exhibitors from 70 countries
- 102,000 visitors over the 4 days
- attendees mainly from the Gulf and the Middle East region, with significant numbers from China, India, and South America

[Press release: Defence Secretary confirms £1.7bn investment in Scottish military bases](#)

Sir Michael Fallon outlined how Scotland will be home to several additional key Defence capabilities by 2020 to the Board and recognised its unique contribution to UK national security.

Defence Secretary Sir Michael Fallon said:

Scotland is on the frontline of defending the United Kingdom from growing threats at sea, in the air, and on land. Our commitment to the future of defence in Scotland is underlined by increasing investment in better infrastructure for the Armed Forces helping to keep us safe.

Scotland's 14,000 military regular and reserve personnel and 3,930 MOD civilians are set to benefit from:

- £1.3 billion investment into upgrades to HM Naval Base Clyde's waterfront, engineering support, accommodation and physical security ahead of the Dreadnought class of deterrent submarines arriving in Scotland from the early 2030s;
- £400 million investment at Lossiemouth as one of the RAF's three fast jet bases – upgrading its runways, taxiways and accommodation for the nine new

Poseidon P-8 Maritime Patrol Aircraft and an additional Typhoon squadron;

· Being home to a versatile Army Adaptive Force Brigade, which specialises in operations, works alongside partner nations abroad, and provides resilience support to Scottish civil authorities and communities. Further, Leuchars Station will be expanded to become the main 'hub' for Army activity in Scotland.

The £178 billion Defence equipment programme supports 11,000 Scottish industry jobs and accounts for over 10% of the country's industrial base.

Scottish business is developing key military capabilities: the Queen Elizabeth Carriers being built in Rosyth; Offshore Patrol Vessels and Type 26 Global Combat Ships being built in Govan and Scotstoun; a new Active Electronically Scanned Array Radar for RAF Typhoons being built in Edinburgh.

[Press release: Payback for illegal waste crimes](#)

A skip hire boss has been found to have benefited from his illegal activity by almost £1million.

Raymond Shepherd could have to pay back £980,207 under the Proceeds of Crime Act – the agreed sum of his criminal activities – if he comes into future assets.

It's a debt for life for the 61-year-old, of Rookhope in County Durham. He ran Albert Hill Skip Hire in Darlington and was jailed for 18 months when he appeared at Teesside Crown Court for sentence on December 12, 2013.

He was also disqualified from being a company director for 10 years.

He was convicted following two separate trials of operating a waste facility without a permit, depositing waste without a permit and failing to comply with a suspension notice.

Environment Agency officers then began proceedings to make him pay back a sum of money which reflected the gain from his criminal activities.

Court hearing

On Thursday 23 February, following a 4-day confiscation hearing at Teesside Crown Court under the Proceeds of Crime Act, Shepherd was given a confiscation order to pay back £14,000 of available assets.

He could face up to six months in prison if he fails to pay.

And if he comes into future assets he will have to pay back more of the near £1million agreed benefit sum.

Shepherd contested the application arguing that the activities at the sites were carried out lawfully.

The result comes on the back of a large-scale investigation by the Environment Agency, called Operation Bachelor, which started in 2008. It has also resulted in two other men receiving suspended prison sentences and Albert Hill Skip Hire Ltd being fined £100,000.

A previous Proceeds of Crime hearing in August 2015 in relation to the same investigation saw Shepherd's son, Tony Shepherd, 41, of Winston, Darlington, ordered to pay back £350,000.

He was subsequently jailed for 3 years in May 2016 for failing to pay the sum. He still has to pay back the money, and potentially up to £1.2 million if he comes into future assets.

Debt 'will follow' Shepherd

Oliver Harmar, Area Director for the Environment Agency in the North East, said:

This is a debt that will follow Raymond Shepherd around for the rest of his life. It sends out a message to the industry that waste crime does not pay and not only will we hit people with court action but we'll then hit them in the pocket.

Shepherd's illegal waste operations were carried out in the interests of profit, unfortunately at the expense of the environment. Not to mention by not complying with regulations, he undermined legitimate businesses.

And the impact on the community must not be overlooked, including two major fires which took place at Dodsworth Street. The site is now cleared of waste.

It's been an extensive and long-running investigation by our officers and shows just how seriously we take waste crime. We'll continue to take action against those operating outside of the law and the regulations.

Long-running investigation

The Environment Agency worked closely with other organisations including Durham County Council, Darlington Borough Council, Durham Police, Durham and Darlington Fire and Rescue Service and the Health and Safety Executive during the long-running investigation.

The jurors at Raymond Shepherd's trials heard how the company's premises at

Dodsworth Street were full with illegally-held waste.

Between July 2008 and May 2010 he and his company, Albert Hill Skip Hire Ltd, operated an illegal waste transfer station at Whessoe Road in Darlington.

He did the same at Dodsworth Street from July 2008 until the site got a permit in April 2009, but by November 2009 the first enforcement notice had been served on the company requiring that he operate legally within the terms of his notice.

In 2010 enforcement notices were served, in 2011 a suspension notice was served and in 2012 the permit was revoked. Investigations found the company had been depositing and storing waste on an access road, and cement-bound asbestos was also found on the site.

Following conviction, the waste carrier's registration was revoked. The site is now clear of all waste.
