

Company fined as stunt performer sustains life-changing injuries during filming of Fast and Furious movie

A production company has been fined after a stunt performer was injured during the filming of Fast and Furious 9: The Fast Saga.

Joe Watts, from Surrey, sustained life-changing injuries after he fell approximately 25 feet at Warner Bros. studios in Leavesden, Hertfordshire on 22 July 2019.

He had been filming a fight scene for the action movie.

Mr Watts fell 25 feet onto the concrete floor below when the line on his stunt vest became detached.

The stunt vest Mr Watts was wearing

As a result of his fall, Mr Watts suffered a fractured skull and a severe traumatic brain injury, which has resulted in permanent impairment and disability.

A Health and Safety Executive (HSE) investigation found several failings by

FF9 Pictures Limited. FF9 Pictures Limited's risk assessment failed to address the potential issue of a rope snap or a link failure, there was no system for double checking that the link had been properly engaged and tightened. There was also no system for checking the link for signs of deformation or stretching between takes, the manufacturer's website stated that the link used was forbidden for use as PPE and shock loading should be avoided. On top of that, six-monthly inspections of harnesses were required but Mr Watts' harness had not been inspected in the last six months and FF9 Pictures Limited did not extend the crash matting needed to mitigate the consequences of an unintended fall following changes to the set and the sequence of the stunt.

The incident took place at Warner Brothers' studios in Leavesden

FF9 Pictures Limited, of St. Giles High Street, London, pleaded guilty to breaching Section 3(1) of the Health and Safety at Work etc. Act 1974. The company was fined £800,000 and ordered to pay £14,752.85 in costs at Luton Magistrates' Court on 24 November 2023.

HSE inspector Roxanne Barker said: "Mr Watts' injuries were life-changing and he could have easily been killed. In stunt work, it is not about preventing a fall but minimising the risk of an injury."

This prosecution was brought by HSE enforcement lawyer Rebecca Schwartz and supported by HSE paralegal officer Gabrielle O'Sullivan.

Sentencing, district judge Talwinder Buttar stated Mr Watts is fortunate to be alive and added that she was astonished that the crash matting was not adequate.

[Farmer fined after cow attack left man fearing for his life](#)

A retired chartered surveyor said he feared for his life after being attacked by cows while walking his dog on a public footpath in Devon.

The farmer responsible has been prosecuted by the Health and Safety Executive (HSE) as a result.

Patrick Atherton and his 13-year-old Border Collie 'Lad' had been dropped off at Birdcage Farm, in Ottery Saint Mary, by his wife on 12 June 2022. The 70-year-old, who moved to the South West from West Kirkby on The Wirral more than 30 years ago, was a regular user of the footpath and said it was 'ironic' that Lad had been on his lead that fateful day.

Patrick Atherton and his dog were attacked by cows as they walked on a public footpath in Devon

“I’ve been a trainer of Border Collies for many years.

“It was ironic that for the first time I had kept Lad on his lead as I had noticed two young calves in the field and thought if he was walking by my side they wouldn’t really notice.

“Unfortunately, one black cow did and it charged at us, knocking me down by the hedge that bordered the path.

“I tried to stand up and let Lad off his lead but they kept on knocking me over.

“There was about seven cows involved, but it was the very aggressive black cow that was trying to kill my dog.

“I thought we were going to die.”

The traumatic ordeal only came to an end after Mr Atherton said he heard a call – who he presumed to be from the farmer – and the cattle moved away from the pair and ran back to the farm.

“I had been powerless to do anything,” he added.

“We were both surrounded by cattle.

“I could hear Lad shrieking in pain as he was repeatedly kicked and stamped on.

“He was never the same dog after what happened and he sadly passed away in September this year.

“I just want to make other people aware of the risks when out enjoying

popular footpaths such as this one.”

The retired chartered surveyor said he feared for his life during the incident

Mr Atherton escaped with cuts and bruises following the attack, while Lad was badly injured had to take veterinary medication for the remainder of his life.

The HSE investigation found that cattle with young calves , which are known to be protective and unpredictable, were being kept in a field with a public right of way across it. They can pose a risk to walkers, especially to those with dogs.

Where possible farmers should:

- avoid putting cattle, especially cows with calves, in fields with public access.
- do all that they can to keep animals and people separated, including erecting fencing (permanent or temporary) e.g. electric fencing.
- Assess the temperament of any cattle before putting them into a field with public access.
- Consider culling any animal that shows signs of aggression.
- Any animal that has shown any sign of aggression must not be kept in a field with public access.
- Clearly sign post all public access routes across the farm. Display signage at all entrances to the field stating what is in the field (cows with calves / bulls).

John Hallett of Birdcage Farm, Ottery St Mary, Devon pleaded guilty to breaching Section 3(2) of the Health & Safety at Work etc Act 1974 and was fined £2,000 and ordered to pay costs of £4,500 at Exeter Magistrates' Court.

HSE inspector Simon Jones said: “It is fortunate that the injuries sustained by Mr Atherton weren't life threatening, however given the nature of the

attack the end result could have been far worse.

“Public knowledge – and concern – is increasing about how dangerous cattle can be. On this occasion Mr Atherton took the right precautions and HSE has taken action against the farmer in question.

“Cattle are extremely protective of their calves and even calm cattle can become aggressive if they think the calves may, in any way, be threatened, even by members of the public walking past.

“Farmers should not place cattle with calves in fields where members of the public have a legal right to walk.

“Had John Hallett followed this simple rule, then this incident could have been prevented.”

[Food company fined £360,000 after worker loses consciousness](#)

A company in Fife which grows and prepares vegetables has been fined £360,000 after a worker was dragged into a machine and lost consciousness.

Remigiusz Cyrek, a hygiene operative at Kettle Produce Limited, was undertaking a routine clean of a machine that makes carrot batons on 22 June 2018. The 37-year-old was trapped by a giant roller after being dragged into the machine at the company’s premises at Orkie Farm, in Freuchie.

Mr Cyrek had been cleaning part of the conveying machinery which had not been isolated from the power supply. The hood of his waterproof jacket became entangled in a moving power driven roller, causing it to tighten around his neck and resulting in him losing consciousness. The incident left the Polish

national unable to work for six months afterwards.

An investigation by the Health and Safety Executive (HSE) found that Kettle Produce Limited had failed to provide a safe system of work for employees who were cleaning the machinery. A safe system of work should ensure that cleaning activities are not carried out whilst the machinery was moving, and that all parts were isolated and locked-off from the power supply.

HSE guidance on [working safely with machinery](#) is available.

Kettle Produce Limited, of Balmalcolm Farm, Cupar, Fife, pleaded guilty to breach Section 2(1) and Section 33(1)(a) of the Health and Safety at Work etc Act 1974. The company was fined £360,000 at Dundee Sheriff Court on 23 November 2023.

HSE inspector Kerry Cringan said: "This incident could so easily have been avoided by simply carrying out correct control measures and safe working practices.

"While cleaning is an essential part of food processing, hygiene operatives should not be exposed to risks from unguarded moving parts.

"Companies should be aware that we will not hesitate to take appropriate enforcement action against those that fall below the required standards."

[Entertainment company fined after worker dies from fall](#)

A company in the entertainment industry has been fined £16,000 following the death of a worker.

Russell Bowry, a self-employed rigger, was working at ELP Broadcast and

Events Ltd's Cardington Hangar Studios in Bedfordshire when he fell from height on 13 March 2018.

The 52-year-old, from Lower Stondon, Bedfordshire, was part of an assembly team for a project that required the building of a temporary rehearsal stage.

This stage was a water and wind proof cube for a musical that was due to be performed at the studios.

Mr Bowry was working on the roof of the cube when he fell through the structure and landed 10 metres below. He died from his injuries three days later.

The roof which Mr Bowry was working on

A Health and Safety Executive (HSE) investigation found that ELP Broadcast & Events Ltd had failed to plan and implement a safe system of work. The company also failed to implement its own health and safety policy or ensure there was adequate supervision.

HSE guidance can be found at: [Work at height – HSE](#)

ELP Broadcast & Events Ltd, of Bedford Technology Park, Thurleigh, Bedfordshire pleaded guilty to breaching Section 3(1) of The Health and Safety at Work etc Act 1974. The company was fined £16,000 and ordered to pay £2,968.70 in costs at Luton Magistrates' Court on 22 November 2023.

HSE enforcement lawyer Samantha Wells said: "This tragic incident should not have happened. It is vital the entertainment sector has safe systems of work

so when it puts on a good show, the workers behind the scenes are protected at all times.”

This prosecution was brought by HSE enforcement lawyer Samantha Wells and supported by HSE paralegal officers Kirsty Crapper and Imogen Isaac.

[Mother’s grief after only son killed while working for major egg supplier](#)

A mother has spoken about her grief after her only child was killed while working at ‘Sunrise Eggs’ in Loughborough.

Nineteen-year-old Ben Spencer had only been working for Sunrise Poultry Farms for two weeks when he was crushed between a heavy goods vehicle (HGV) and a wall on 12 April 2021.

His mum Tracy says she would like nothing more but to ‘curl up in a ball’ after his death at the site in Sileby.

Nineteen-year-old Ben Spencer was killed while working for Sunrise Poultry Limited

“My life revolved around Ben, because it has always been just me and him,” she said.

“I used to go out every day, even if it was just for a walk, and we used to go on family holidays, all of us with a caravan.

“Now I’ve got no life. Sometimes I walk the dog at eleven o’clock at night to avoid running into people, I just can’t face getting into a conversation with them.

“I find myself keeping my distance from everyone, I just can’t cope with the idea of feeling close to someone, even my family.

“My dreams are of Ben when he was younger and I just yearn to be back there. Those years standing on the edge of a football pitch watching him in the freezing cold and now I’d just go back there in heartbeat.”

The HGV was attempting a complex manoeuvre towards a narrow thoroughfare at the Seagrave Road premises as Ben Spencer was walking towards it.

HSE inspector Alex Nayar at the scene of the tragedy

An investigation by the Health and Safety Executive (HSE) found that measures in place for segregating pedestrians and moving vehicles were wholly inadequate.

Sunrise Poultry Farms, of Seagrave Road, Sileby, Loughborough, pleaded guilty to breaching Regulation 17 of the Workplace (Health, Safety and Welfare)

Regulations 1992 and was ordered to pay a fine of £233,000 plus costs of £8,841 at a hearing at Leicester Magistrates' Court on 22 November 2023.

Ben's tragic death continues to have a significant impact on the lives of Tracey, as well as his friends and family.

"I still can't go in Ben's bedroom," Tracy said.

"It's still the same as the last day he went to work. I can't bring myself to make the bed and have tied the door shut so the dog can't go in there. I have tried to make myself go in there, but I just can't walk across the threshold.

"I cry when I leave the house and I cry when I get back, because he's not here. I hear noises and look up expecting to see Ben coming round the back.

"Sunrise Poultry was Ben's first real job and with it came a conversation about the future, his own home, learning to drive and saving.

"If I could just curl up in a ball I would."

Speaking after the hearing, HSE Enforcement Lawyer Andy Siddall said:

"The company admitted failing to segregate vehicles and pedestrians at its workplace in Sileby and that resulted in the tragic death of Ben.

"Accidents like this simply shouldn't happen and a mother shouldn't have to hold the hand of her son as he lies dying in the workplace.

"So please check your workplace transport risk assessments, think carefully, and ensure that everybody goes home safely."

HSE inspector Alex Nayar said: "Our thoughts today are with Ben's family and friends.

"He was at the start of his working life. He should have returned home safely to them at the end of his working day, but because of the failings of Sunrise Poultry Farms Limited, he did not.

"Ben's death could have easily been prevented if they had adequately assessed and controlled the risks associated with workplace transport, a leading cause of death in the workplace."
