[Nature and Technology](#)

From what nature has felled within our arboretum, **welters** have created a number of Woodland inspired products. No two products are the same and can be utilised for a number of different purposes. The examples shown have been hewn into Memorial 'Orbs' from hardwood, with each orb housing up to 2 sets of cremated remains. A peaceful tribute to our loved ones.

[The Art of Timber Engineering](#)

In the wake of the great storm which has hit our ancient woodlands within our land holdings, we look to the future and the true and exciting potential for the manufacture of timber products, utilising the vast resource of incredible timber that is now available to us. We will address any requirements and enquiries with artistic enthusiasm.

[Nature & Technology](#)

As has been part of our practise for many years, **welters**[®] focus with determination to embrace nature, and the environment, in our products and philosophies. This is achieved through the use of UK resources and facilities and includes the use of reconstituted materials within

our manufacturing processes. We endeavour to maintain our 'Made in Britain' ethos and develop product designs that are in keeping with our natural habitat.

welters[®] has always attempted to minimise imports, especially of non-environmentally friendly material, and particularly when exported from the opposite side of the globe and produced by nations which may pay less attention to environmental issues. **Welterstone** was created as a solution to this issue, producing products manufactured locally from indigenous quarried material. As a result of the success of **Welterstone**, **welters**[®] has not imported any material for several years.

We look forward to the continuation of the development of our range of products and materials and embrace the future wholeheartedly.
