

News story: Queens Park Rangers sign the Armed Forces Covenant

The club, which has pledged to help service leavers and veterans achieve their goals and find jobs with its Community Trust work skills programme, run in conjunction with the Royal British Legion, signed the covenant during their match with fellow Covenant members Wigan on Tuesday.

The scheme, which helps personnel prepare for life after the military, has already helped half of its previously unemployed participants find work.

Defence Minister Mark Lancaster, who attended the signing, with the Chief of Defence People Lt General Richard Nugee, said:

It is great to see that QPR are signing the Armed Forces Covenant. The success of their employability programme shows how a football club can help service leavers and veterans improve skills and find jobs.

I encourage other clubs to support the covenant and ensure all those who serve or have served, and their families, are treated fairly.

QPR have also pledged to work with the Ministry of Defence's Career Transition Partnership (CTP) to provide a career pathway for personnel leaving the Armed Forces, and to support club employees who are training or deployed as Reservists.

QPR's CEO Lee Hoos said:

I'm very proud that we are the first London club to sign the Armed Forces covenant. This will build on the strong relationship the club already has with the local Armed Forces community, including 4 PARA and the White City cadets, as well as the employability programme we recently ran with the Royal British Legion for Armed Forces veterans.

The Armed Forces Covenant is a commitment from the nation, enshrined in law, that those who serve or have served, and their families, are treated fairly.

Over 1,440 businesses and organisations across the UK have already signed, making practical pledges that have made a difference across the Armed Forces community.

[News story: MOD signs £146 million contract to upgrade RAF's long-range missile](#)

The shared deal with MDBA will see the UK's Storm Shadow and France's SCALP missiles updated so they remain fit for purpose and ready for operational use.

During an inward visit by Laurent Collet-Billon, the Minister confirmed the strong partnership with France in a series of meetings at Lancaster House. The collaboration is providing a £50 million saving for both sides.

The contract will keep the missile in service for the next decade and beyond and help to sustain around 60 UK jobs. Storm Shadow is a combat-proven, long-range, precision cruise missile, already in service with RAF Tornados, deployed recently against Daesh in Iraq.

Minister for Defence Procurement, Harriett Baldwin said:

Storm Shadow is a proven and vital missile for the RAF, and this £146 million upgrade will ensure it is always ready for whenever our Armed Forces might need it to defend our way of life.

This contract is an important part of the Government's £178 billion plan to ensure our armed forces have the right equipment at the right time.

Defence Minister Harriett Baldwin with her French counterpart Laurent Collet-Billon. Crown Copyright.

The midlife refurbishment programme has been developed in co-operation with the French Government who will be updating their own similar missile known as SCALP.

By taking advantage of the similarities, this collaboration not only reaffirms the strong defence relationship as outlined under the Lancaster House Agreement, but has also resulted in a £50 million saving for both the UK and France.

The regeneration will consist of a midlife refurbishment of current missile parts such as the turbo-jet engine, an upgrade of the navigational system, and a like for like replacement of items such as the cabling, seals and gaskets.

The work will sustain around 60 jobs at MBDA in Stevenage and Bolton, in a variety of roles including software and systems engineering. Over 40 jobs will also be sustained through the supply chain.

Chief Executive at the MOD's Defence Equipment and Support Organisation, Tony Douglas said:

The contract to regenerate Storm Shadow, a combat-proven, all-weather precision missile, provides a clear example of the MOD and UK industry working effectively together with our counter parts in

France; providing our UK Armed Forces with the best equipment possible while sustaining dozens of UK jobs.

Two Storm Shadow missiles on a Tornado GR4. Crown Copyright.

Storm Shadow is designed to target substantial buildings and structures, such as military facilities, control centres, bunkers, missile sites, airfields and bridges, which might otherwise require the use of several aircraft over the course of numerous missions.

France is the UK's most important European Ally, with both countries' defence budgets together account for almost half of all European defence spending. This deal is the most recent example of collaboration in a long history of cooperation on defence and security. The £146 million investment in Storm Shadow will sustain the missile until its planned out of service date in 2032.

Laurent Collet-Billon, Délégué Général pour l'Armement said:

This deep-strike missile mid-life update was jointly prepared. It represents a new step in the Franco-British cooperation roadmap and strengthens the Franco-British strategic partnership in the armament field.

[News story: Defence Secretary meets Apprentices working on nuclear submarines as new Training Facility announced](#)

BAE Systems announced today that the new training facility will provide a tailored learning environment for an estimated 1,000 craft and technical apprentices currently in training.

Mr Fallon met apprentices working in a range of areas, and toured the Devonshire Dock Hall where Audacious, Anson and Agamemnon, the fourth, fifth and sixth of seven Astute class nuclear-powered submarines, are under construction.

Defence Secretary Sir Michael Fallon said:

This investment demonstrates the benefits that our growing defence budget brings for highly skilled jobs in the North West and across the country.

It will ensure we have people with the skills necessary to deliver one of the most complex programmes in the world that will help modernise our fleet of nuclear submarines.

Apprentices at BAE Systems already work on our cutting-edge Astute Submarines, the most powerful attack submarines ever operated by the Royal Navy, as well the Dreadnought Programme, the new fleet of four Dreadnought Ballistic Missile submarines that will carry our nuclear deterrent.

The new modern facility is due to open next year and will include a teaching block, classrooms, offices, craft workshops and welfare facilities. It is planned that the facility will include to-scale 'submarine mock-up sections' which will allow apprentices to gain hands-on experience in a controlled environment and help them develop skills working to the tolerances required to build submarines.

Following a £1.3 billion [investment](#) by Defence, construction has started on the Dreadnought submarines. Backed by a rising Defence budget and £178 billion equipment programme, both Astute and Dreadnought programmes secure thousands of highly skilled jobs in Barrow and right across the UK.

Tony Johns, Managing Director of BAE Systems Submarines, said:

The design and build of a nuclear-powered submarine is one of the world's most complex and technically demanding engineering challenges. It's vital we have right people with the right skills to deliver these programmes and this investment underlines our commitment to the future. The new facility will provide a modern learning environment to supplement the training our apprentices already receive.

The MOD is committed to delivering more high quality apprenticeships and work experience for young people right across Defence, and encouraging our industry partners to do the same. As the largest provider of apprenticeships in the UK, the MOD successfully completes more than 10,000 apprenticeships a year and we are setting a target to deliver 50,000 military apprenticeships during this parliament.

Whilst in Barrow, the Secretary of State also visited Allan Webb Ltd, a specialist in Defence Technical Documentation and Supportability Engineering to review aspects of the support provided to the MOD. Allan Webb Ltd has a strong reputation in the Defence Sector for quality and innovation having over 50 years' experience in the industry.

Allan Webb Ltd works in conjunction with BMT Defence Services, to increase the MOD's capability with training and logistical support. BMT Defence Services has a strong reputation in the naval design market, having provided the winning designs for Royal Navy's MARS Fleet Tanker, the Queen Elizabeth Class (QEC) aircraft carrier, and the Astute submarine

The Defence Secretary, Sir Michael Fallon said:

Allan Webb Ltd and BMT Defence Services operate a strong and efficient partnership that provides the MOD with world-leading service helping us to keep Britain safe.

During his visit, the Defence Secretary discussed the latest innovations in how technical equipment handbooks are produced for the MOD and the benefits of this modernisation in order to meet the needs of engineers across the Armed Forces.

Our work with companies of all sizes shows Defence's determination to do its part to deliver a bold, long term Industrial Strategy that builds on our strengths and prepares the UK for the years ahead. We are working with SMEs and businesses of all kinds to innovate and build mutual security to ensure an economy that works for everyone.

Defence investment supports high-wage, high-skills jobs across the UK and backed by our rising Defence budget, £178bn Equipment Plan, and £800m Innovation Initiative, we are delivering the jobs, apprenticeships, infrastructure, and economy of the future.

[News story: Welsh company wins £82M contract on global stage](#)

The deal with Qioptiq in St Asaph, North Wales, will see battle-winning handheld equipment – including night-vision goggles and day and night weapon sights – maintained over the next six years, to ensure they are available to our personnel around the globe.

This good news for Wales, as the UK prepares to celebrate St David's Day, follows the recent announcement that North Wales will be a global repair hub providing maintenance services for F-35 components, in a move worth millions for the region.

Speaking at the IDEX trade show, Minister for Defence Procurement Harriett Baldwin said:

It's a pleasure to announce this £82 million contract here at IDEX. This deal will provide our troops with the equipment they need to stay safe, while also delivering £47 million of savings.

This contract is made possible by our £178 billion equipment plan, supported by a Defence budget that will rise every year until the end of the decade.

Work under the new Surveillance Target and Acquisition Support (STAS) contract will create eight new positions at the company, which employs around 560 at its St Asaph and Bodelwyddan sites. By merging 20 individual support contracts into one deal, the MOD will save £47 million for the tax payer over the next six years.

Secretary of State for Wales Alun Cairns said:

This massive contract for Qioptiq underlines Wales' reputation as a world leader in the defence technology sector, coming hot on the heels of the choice of DECA Sealand as the global repair hub for the F35 aircraft.

This enormous vote on confidence in the Welsh economy demonstrates that we offer the highly skilled workforce and facilities that investors need. It is also clearly great news for employment in the region.

The contract covers equipment used right across the Armed Forces, from frontline infantry and Royal Marine soldiers, to military specialists such as bomb disposal experts, including infantry periscopes, laser aimers and target locating equipment.

Chief Executive Officer of the MOD's Defence Equipment and Support organisation, Tony Douglas said:

This new deal with Qioptiq has reduced costs by a third, demonstrating how we are constantly striving to build innovation and value into Defence procurement and support. Crucially, the STAS contract, will deliver improved support to Her Majesty's Armed Forces.

IDEX is a biannual international defence exhibition and conference dedicated to unmanned systems held in Abu Dhabi, the capital of the United Arab Emirates. The United Kingdom has supported IDEX since its inception and this year a Royal Navy Mine Counter Measure Vessel, HMS Penzance, will be attending.

Mrs Baldwin and the UK team will be working to develop closer links with a range of Governments and industrial partners in the Gulf. British companies are promoting a range of innovative world leading technologies, many suitable for armed forces in the region.

They are keen to share technology, offer value for money solutions supported by training and logistical support, and build joint venture partnerships on land and maritime border security; maritime mine detection and countermeasures; and chemical, biological, radiation and nuclear and biological and chemical defence.

News story: Defence Secretary: Britain committed to leading European security

Sir Michael told the annual Munich Security Conference that while Britain is leaving the European Union, the UK would not be stepping back from its role in European security.

Britain's leadership this year is demonstrated by two new major commitments to the NATO Alliance:

- Leading NATO's Very High Readiness Joint Task Force, otherwise known as the 'spearhead force'. This UK-led NATO Brigade is ready and willing to respond to any threat the Alliance faces and shows how NATO is

strengthening its collective defence and deterrence.

- Deploying a battle group of around 800 personnel to lead in Estonia NATO's Enhanced Forward Presence, another way in which NATO is stepping up to deter threats. Britain will deploy as part of the battle group the United States is leading in Poland, with over 100 troops.

The Defence Secretary also met with his German counterpart, Ursula von der Leyen, where he discussed the unprecedented level of cooperation between the two countries. Sir Michael also welcomed Germany's commitment to increase its defence spending.

Sir Michael, along with the Foreign Secretary Boris Johnson, yesterday [launched](#) Britain's new strategy for engaging more internationally in defence activity.

The International Defence Engagement Strategy is the way in which all defence activity, short of combat operations, work abroad to prevent conflict, build stability and gain influence internationally.

Speaking at the Munich Secretary Conference, Defence Secretary Sir Michael Fallon said:

Britain is committed to Europe's security, and we're stepping up our engagement internationally. Whether defeating Daesh in Iraq and Syria, deploying with our NATO Allies to deter threats, or engaging globally to help countries develop their security, Britain is playing a major role – and will continue to do so.

The Defence Secretary also confirmed that Britain would keep the momentum up in the fight against Daesh. In Iraq and Syria, the RAF are flying day and night to defeat Daesh.

The RAF hit over 300 targets as part of recent operations to liberate eastern Mosul, and is now focussing efforts on the approaches to the west of the city, where it is expected the liberation operation will begin within days.
