

News story: Army's future is secure in Brecon

Sir Michael confirmed that the Brecon Infantry Battle School will remain open, providing world-class training to 3,500 infantry soldiers each year who are preparing to become future Army leaders.

During the visit he also announced that the Regimental Museum of The Royal Welsh is likely to remain in its current location for at least a decade as the Ministry of Defence discusses a long-term lease for the site.

Defence Secretary Sir Michael Fallon said:

Brecon has a long Army history. The Infantry Battle School and Sennybridge Training Area will stay and continue to be a vital location for training and exercises for thousands of soldiers every year.

Today was an opportunity to review our plans for the Barracks and Regimental Museum with Chris Davies and others to ensure that we help attract jobs and investment when we leave the Barracks by 2027

With a brigade headquarters and combat units continuing to be based in Wales, Wales' long term future as a key defence location is secure.

The Armed Forces has a strong connection to Wales, and the Defence Secretary also revealed figures showing that Defence spent £870 million with Welsh industry in 2015/16, amounting to around £280 per person and supporting 5,250 jobs. Wales is also home to one of the Army's major UK training areas at Sennybridge, which is used for various exercises throughout the year.

As part of the MOD's Better Defence Estate strategy, Brecon Barracks will be released, opening up a prime town centre site for redevelopment with the potential to bring economic opportunities and job creation to the area. By selling sites such as these, the MOD is investing £4 billion over 10 years to provide accommodation and facilities better suited to our modern Armed Forces and their families.

160 Brigade will continue to be based out of Wales, as well as the RAF's fast jet pilot training school at RAF Valley. Around 2180 regulars are based across the country plus a thousand of MOD civilian staff, demonstrating Defence's continued long-term commitment to Wales.

Sir Michael's announcements came as he met Rangers and Riflemen from 160th Infantry Brigade and presented two members of the Royal Irish Regiment with St Patrick's Day shamrocks.

News story: Closer partnerships needed to fight serious and organised crime

Ben Wallace, speaking to an audience of law enforcement and public and private sector representatives at the Home Office's Serious and Organised Crime Conference in Birmingham, said officers needed to share more intelligence with local government representatives in an effort to tackle crime bosses.

The Minister underlined how multi-agency partnerships around the country could help to dismantle serious and organised crime groups, with effective joint working already taking place between local authorities, police forces and sectors within the Government Agency Intelligence Network, such as HMRC and the Environment Agency.

But he called for the level of information sharing and collaboration to be taken to new heights.

The Security Minister said:

We know that crime bosses will look to exploit any avenue that they can tap into in order to make massive profits or launder their dirty money.

Our own research indicates organised crime groups are now looking to benefit from public sector contracts and we must do everything possible to clamp down on this abuse.

That's why I'm asking each police force around the country to work more closely than ever with local authorities and other important partners in their patch – sharing information on known crime groups, identifying attempts to profit from public sector contracts and closing down bogus suppliers.

The Security Minister referred to a Home Office pilot which saw local authorities and police forces in seven areas collaborate to examine the extent to which major crime groups are looking to exploit public sector contracts.

This pilot not only identified the areas particularly at risk of being targeted by crime groups, but also demonstrated how effective partnerships between local authorities and forces could be in disrupting those involved.

Ben Wallace referenced the work as he asked forces to carry out more detailed assessments of the crime groups operating in their area and to share these with local authorities so links can be found with suppliers who bid for

public procurement contracts.

The Minister explained this level of information sharing could significantly improve the fight against serious and organised crime.

Press release: Environment Agency shortlisted for UK River Prize 2017

The Environment Agency has been praised for an ambitious restoration project on Hampshire's famous River Avon.

The agency's 'whole river approach' to restoration and natural flood management impressed judges who voted it the best entry in the 'catchment category' of the 2017 UK River Prize, a national competition that celebrates the most innovative and successful river projects across England, Scotland and Wales.

As category winner, the Hampshire Avon project automatically qualifies as a finalist. The Environment Agency is up against three other finalists – each winners of separate categories – vying for the top UK River Prize. The overall winner will be announced at a special ceremony in Brighton next month and presented with a trophy and cash prize.

Russell Spencer for the Environment Agency:

This is well earned recognition for the efforts of many people and organisations working together to help realise the vision for the Avon catchment – and a great springboard for the next phase of the programme, where we would like many more to be involved.

The River Avon Restoration Project was set up to restore the River Avon Special Area of Conservation (SAC) to a natural river system supporting chalk stream habitats and wildlife to meet the government's obligations under the EU Water Framework and Habitats Directive.

The aim of the project was to restore reaches of the river most damaged in the past by man-made physical changes including the straightening or dredging of the river channel and construction of weirs and sluices. Various methods have been used to improve habitats and restore natural flows and functions including the removal, modification and bypassing of structures and re-alignment of the river to more natural positions in the floodplain.

Led by the Environment Agency, the project is supported by a number of organisations including Natural England, Wiltshire Wildlife Trust, Wessex Chalk Streams and Rivers Trust, Wessex Water, Wiltshire Fishery Association,

National Farmers Union and Hampshire & Isle of Wight Wildlife Trust.

The restoration started in 2012 and will culminate in the completion of Phase 1 of the project later this year. Further work is needed to restore the remaining 185km of river and enable the catchment to respond and adapt to climate change.

Notes to Editor:

The UK River Prize celebrates the achievements of individuals and organisations who improve the health of our rivers and catchments and recognise the importance of healthy rivers and the benefits they bring to society. It is run by the The River Restoration Centre who will announce the overall winner of the UK River Prize at its annual dinner and conference in Brighton on April 4.

In 2009, the need for a strategic approach to catchment river restoration was identified by the European LIFE funded Strategic Restoration and Management (STREAM) partnership. This led to the creation of the River Avon Restoration Programme (RARP).
