Press release: Tamworth angler fined for obstruction after fishing illegally

On 7 March 2017 at Nuneaton Magistrates' Court, Michael Hawkeswood of Ealingham, Wilnecote was fined £286 for wilfully obstructing a constable in the execution of his duty, with costs of £172 and a victim surcharge of £30 imposed after a prosecution by the Environment Agency.

Mr Hawkeswood also faced charges of fishing without a rod licence, failing to state his name when addressed by an Environment Agency enforcement officer and using behaviour that is likely to cause harassment, alarm or distress. Mr Hawkeswood received no additional penalty for these charges.

The offences took place on 21 August 2016 at Pooley Park Pools, Polesworth. Mr Hawkeswood was convicted in his absence.

Andrew Eardley of the Environment Agency said:

The majority of anglers fish legally and purchase a rod licence. With an annual licence costing £30 it seems ridiculous that anglers risk a significant fine.

The minority of anglers that fail to buy a rod licence are cheating their fellow anglers and the future of the sport. Rod licence cheats risk a criminal conviction, a significant fine and could lose their fishing equipment.

It's good to see that the courts take instances of obstruction against enforcement officers seriously and that offenders are prosecuted.

Money from rod licence sales is invested in England's fisheries and is used to fund a wide range of projects to improve facilities for anglers including protecting stocks from illegal fishing, pollution and disease; restoring fish stocks through re-stocking; eradicating invasive species; and fish habitat improvements. Rod licence money is also used to fund the Angling Trust to provide information about fishing and to encourage participation in the sport.

You need a valid Environment Agency Rod Licence to fish for salmon, trout, freshwater fish, smelt or eel in England. Buying a rod licence is easy, simply visit www.gov.uk/fishing-licences/buy-a-fishing-licence.

Anyone witnessing illegal fishing incidents in progress can report it directly to the Environment Agency hotline, 0800 80 70 60. Information on illegal fishing and environmental crime can also be reported anonymously to Crime stoppers on 0800 555 111.

China to build undersea lab

China's deep-sea manned submersible Jiaolong conducts scientific exploration in the southwestern Indian Ocean in December.[Photo/Xinhua]

China will build an undersea lab that can contain dozens of people. "China's manned deep-sea submersible Jiaolong can hold a few people and stay under water for 12 hours. Our future deep-sea lab station can stay under the sea for half a month or even months," said Yan Kai, an NPC deputy and director of National Key Lab for Deep-Sea Manned Equipment.

Wan Gang, minister of Ministry of Science and Technology of China, said that deep-sea lab station was listed as a key project in China's Science and Technology Innovations 2030 Project during a national science and technology conference in January.

According to Yan Kai, the difficulty of building a deep-sea lab station is almost the same as building a space station. Yan said that scientists can cultivate and research deep-sea creatures, explore deep-sea mineral, oil and

gas resources and research the genes of deep-sea creatures for medical use.

Yan said the deep-sea lab station will use fuel cell or nuclear power because it will stay under the sea for a long time.

The material used for the deep-sea lab station is a major technical problem. "The submarine pressure in 1,000 meters deep sea is 100 times than the pressure of the atmosphere, which means even a tiny nail will bear the pressure of 100 kilograms," said Yan.

Therefore, special material with light weight and high pressure resistance will be a must if the deep-sea lab station needs to stay under 1,000 meters of water. Moreover, the problems of deep-sea navigation and communication, precise control and manipulation in lab station also need to be accounted for.

UN chief Guterres unveils proposals to end 'scourge' of sexual exploitation and abuse

9 March 2017 — Underscoring that the United Nations should not be, in any way, associated with the vile and vicious crimes of rape, sexual violence, exploitation and abuse, Secretary-General António Guterres has outlined a new victim-centred approach to prevent and respond to such abuses committed by those serving under the UN flag.

“Such acts of cruelty should never take place. Certainly no person serving with the United Nations in any capacity should be associated with such vile and vicious crimes, ” said Mr. Guterres in a message announcing his report released today on 'Special Measures for Protection from Sexual Exploitation and Abuse: A New Approach.'

“Let us declare in one voice: We will not tolerate anyone committing or condoning sexual exploitation and abuse. We will not let anyone cover up these crimes with the UN flag, ” he added.

The Secretary-General's report, Special measures for protection from sexual exploitation and abuse: a new approach, outlines a victim-centred strategy that is rooted in transparency, accountability and ensuring justice.

Noting that exploitation is also deeply rooted in gender inequality and discrimination, Mr. Guterres said that promoting gender equality throughout the UN system, including its missions and peacekeeping forces, would help advance parity and at the same time decrease incidents of abuse.

“Let us do so in the name of all who look to the UN for life-saving protection and support – and on behalf of the tens of thousands of UN personnel around the world who deliver that assistance with courage and commitment to the highest ideals, ” he stressed.

VIDEO: A New Approach — How the United Nations is responding to sexual exploitation and abuse

Four-track, victim-centred approach

Based on four tracks, the approach documented in the report focuses on the rights and dignity of victims; ending impunity for those guilty of crimes and abuses; drawing on the wisdom and guidance of all those who have been affected, civil society, local communities and others to strengthen and improve UN's efforts; and to raise awareness and share best practices to end the vicious scourge.

The report also emphasizes the need to engage with UN Member States and calls for a high-level meeting on sexual exploitation and abuses in 2017 on the margins of the general debate of the 72nd session of the General Assembly.

The report further notes that the UN chief would seek Member States support to establish a system-wide consolidated confidential repository of case information to be placed under the supervision of the Special Coordinator on Improving UN Response to Sexual Exploitation and Abuse.

It also includes a detailed list of actions and recommendations, along with the relevant UN entity that would be responsible for consultation with relevant stakeholders, as well as provides data on allegations of sexual exploitation and abuse across the UN system and by non-UN international forces authorized by a Security Council mandate, covering the period 1 January to 31 December 2016.

Peacekeeping initiatives in actionAddressing Sexual Exploitation and Abuse

Yemen: UNICEF vaccination campaign reaches 5 million children

9 March 2017 — Amid escalating violence, the United Nations humanitarian agency for children and its partners have completed the first round of a nationwide door-to-door vaccination campaign reaching 5 million children under the age of five with oral polio vaccine and vitamin A supplementation.

“In the last two years, more children have died from preventable diseases than those killed in the violence, ” said Meritxell Relaño, the UN Children's Fund (UNICEF) Representative in Yemen, in a press release. “This is why vaccination campaigns are so crucial to save the lives of Yemen's children and to secure their future. ”

In the first campaign of its kind this year, 40,000 vaccinators spread across Yemen to provide children with polio vaccine and vitamin A supplements. Mobile health teams have reached children wherever they are, including in places where access to health services has been cut off by the fighting. Health workers have shown heroic resolve in crossing frontlines, mountains and valleys to vaccinate children.

UNICEF says that the campaign comes at a critical time. Children in Yemen are living on the brink of famine and widespread malnutrition has drastically increased their risk of disease. More than half of Yemen's medical facilities are no longer functional and the health system is on the verge of collapse.

UNICEF is scaling up its humanitarian response, including support for the treatment of 323,000 children against severe acute malnutrition, and the provision of basic healthcare services to one million children and over half a million pregnant and breastfeeding mothers.

“Children are dying because the conflict is preventing them from getting the health care and nutrition they urgently need. Their immune systems are weak from months of hunger, ” said Dr. Relaño, calling on all parties to the conflict to find a political solution to this crisis.

UN refugee agency issues renewed funding plea for Syria, as conflict enters seventh year

9 March 2017 — Unless drastic measures are taken to share up peace and security in Syria, the situation – which marks its sixth anniversary next week – will worsen, the United Nations refugee agency today said urging the international community to redouble its support for the 13.5 million people in need of aid.

“Funding won't end the suffering. But it is one thing we can do as poverty and misery intensify. The resources currently available simply don't come close to meeting all the challenges, ” said Filippo Grandi, the UN High Commissioner for RefugeesFunding won't end the suffering. But it is one thing we can do as poverty and misery intensify..

His message comes ahead of 15 and 16 March, when in 2011 authorities clamped

down on demonstrations in Damascus, setting off protests calling for the overthrow of President Bashar al-Assad.

Since then, nearly 6.3 million people were displaced and an additional 4.9 million people – mostly women and children – were forced to seek refuge, according to UN figures. Nearly 3 million Syrians under the age of five have grown up knowing nothing but conflict.

“Ultimately, Syria's conflict isn't about numbers – it's about people, ” Grandi added. “Families have been torn apart, innocent civilians killed, houses destroyed, businesses and livelihoods shattered. It's a collective failure. ”

One of those people is Wafaa Keyari, an eight-year-old girl from the battered Sakhour district of eastern Aleppo.

Living now in a temporary shelter on the outskirts of Aleppo, Wafaa was severely burned on her face and body when her house was shelled two years ago.

“I was taken to hospital. I was awake and they treated me,” Wafaa told UNHCR.

“You know I was wearing wool clothes, like the ones I am wearing now, they got stuck to me. When they took me to the hospital, they were pulling them off my skin. It hurt so much, they didn't even use anaesthetic – they just pulled it off.”

Asked whether the incident had changed her at all, she paused for a moment before replying with a smile: “No. I am still the same nice girl.”

In the shadow of the sad anniversary, the international community is preparing for a conference in Brussels in early April to assess the country's future. The UN is seeking \$8 billion for this year to meet the needs of Syrians in the country and those living abroad.

According to UNHCR, the request follows commitments made at the 2016 London Conference, especially on education and livelihoods.

“Syria is at a crossroads, ” Mr. Grandi said. “Unless drastic measures are taken to shore up peace and security for Syria, the situation will worsen. ”
