

[News story: Licence variation for South West disposal](#)

This follows the announcement that the new disposal site is open for marine licence applications for the disposal of dredged material.

The Defence Infrastructure Organisation's (DIO) licence has now been [varied to change disposal activities to Plymouth Deep](#). The variation changed the disposal site from Rame Head and conditions referencing Rame Head South have been amended.

No changes to the dredging methodology have been made. The marine licence for the maintenance dredge at HMNB Devonport allows DIO to complete one maintenance dredge campaign of the dockyard's critical areas between now and the end of March 2017.

[News story: UK's research and innovation bodies welcome budget](#)

The spring budget announced an initial investment of £270 million in 2017 to 2018. This is to kick-start the development of disruptive technologies that

have the potential to transform the UK economy.

First challenges announced

Following engagement with experts in academia and industry, the budget announced the first wave of challenges funded through the ISCF, part of the [Industrial Strategy](#). These include:

- leading the world in the development, design and manufacture of batteries that will power the next generation of electric vehicles, helping to tackle air pollution
- developing cutting-edge artificial intelligence and robotics systems that will operate in extreme and hazardous environments, including off-shore energy, nuclear energy, space and deep mining
- accelerating patient access to new drugs and treatments through developing brand new medicine manufacturing technologies, helping to improve public health

Investing in skills

The budget also announced plans to build the pipeline of high-skilled research talent necessary for a growing and innovative economy. There will be an investment of £250 million over the next 4 years including:

- £90 million to provide an additional 1,000 PhD places in areas aligned with the Industrial Strategy. Around 85% will be in STEM disciplines, and 40% will directly help strengthen collaboration between business and academia through industrial partnerships
- £160 million to support new fellowships for early and mid-career researchers in areas aligned to the Industrial Strategy

Research and innovation leaders respond

Dr Ruth McKernan, Chief Executive of Innovate UK, said:

The Chancellor's announcement today is a great example of how the Industrial Strategy challenge fund will deliver the science that business needs.

The first 3 challenge areas are developing revolutionising battery technology, getting innovative medicines to patients more quickly and developing robots for use in hazardous environments. The UK has scientific expertise in these areas. We have excellent companies ready and willing to translate the technology into business growth across the UK.

The challenge fund is like nothing we have seen before, and it has enormous potential to deliver. These challenges announced today are just the start. Innovate UK and the research councils are already working together, building on the evidence we've gathered from

organisations across the country to look at how we can get the UK's researchers and businesses working together and firing on all cylinders.

Professor Philip Nelson, Chair of Research Councils UK, said:

The Chancellor's announcements are most welcome. Long-term funding for research and developing high-skilled research talent is vital to the UK's future as a science power, continuing to feed the pipeline that transforms research into products and services. The UK is at the fore in many aspects of these fields, but countries across the globe are putting effort and resource in too, so these investments are strategically significant.

Press release: £120 million funding boost for incoming NI Executive

The Chancellor Philip Hammond has today set out his plans to make the most of the opportunities ahead by laying the foundations for a stronger, fairer, better United Kingdom outside the European Union – a country that works for everyone.

Included in his first Budget were numerous measures to ensure that economic growth is shared across every part of the country, including additional funding for Northern Ireland.

Employment in Northern Ireland is at a record high, and average wages have grown faster than in any other part of the UK since 2010.

Decisions to invest in social care, skills, schools and health will bring a £120 million funding boost for an incoming Northern Ireland Executive, following last week's Assembly election.

This means that a new Executive's resource budget will be boosted by £90 million through to 2019-20 and its capital budget by £30 million through to 2020-21. It can spend that funding on its own priorities to help create a brighter, more secure future for the country.

Researchers in Northern Ireland could benefit from a new £270 million Industrial Strategy challenge fund which brings together business and academia to focus on productivity-boosting solutions for industries of the future. The first challenges set by the Chancellor today – are artificial intelligence and robots, electric vehicle batteries and speeding up the process of making new medicines. The country will also benefit from the new

UK-wide National 5G Innovation Network, as part of the digital infrastructure package.

Northern Ireland will also benefit from recent action taken more widely, including:

- The rolling out of Tax-Free Childcare for working families with children under twelve, providing up to £2,000 a year per child to help with childcare costs and up to £4,000 for disabled children under seventeen.
- The freezing of fuel duty for the seventh successive year, saving the average driver in Northern Ireland nearly £10 every time they fill up their car.
- The raising of the National Living Wage from £7.20 to £7.50, giving people in Northern Ireland a well-deserved pay rise.
- Confirmation that the personal allowance and higher rate threshold will increase to £12,500 by 2020-21, which will reduce the income tax bill for 800,000 individuals in NI in 2017-18, and take 35,000 individuals out of income tax altogether.

Chancellor Philip Hammond said:

The Government's focus at this time is working with the parties in discussions aimed at forming a new Northern Ireland Executive. We want to see a new Executive setting a budget for 2017-18 as one of its early priorities – and it will have the opportunity to incorporate the new funding being made available today into its planning, when it does so. My Budget offers a further boost in ensuring that people across Northern Ireland can share the benefits of economic growth across the country.

Secretary of State for Northern Ireland, Rt Hon James Brokenshire MP said:

I welcome the Chancellor's budget that underlines the Government's determination to build a country that works for everyone. The Budget reinforces this Government's commitment to strengthening the economy right across the UK. Northern Ireland will continue to benefit from the stability of being part of a strong UK economy.

We are committed to strengthening the economy through investing in skills and increasing prosperity right across the UK. Since 2010, there are record numbers of people in employment in Northern Ireland and this Budget builds on that success.

The £120 million increase in funding for Northern Ireland in this Budget will give an incoming Northern Ireland Executive the freedom to invest in its priorities. This underlines the need for a

functioning Executive in Northern Ireland, which can make the right decisions for Northern Ireland's economy. I am determined to continue working intensively with the parties to ensure the resumption of a strong, stable and inclusive Executive in Northern Ireland.

Recent initiatives important milestones towards greater peace in Mali, say UN, regional partners

8 March 2017 – Commending recent progress, including the launch of interim authorities in Kidal, northern Mali, the United Nations together with regional blocs urged the parties to the peace agreement in the African nation to overcome the difficulties which are impeding the establishment of such authorities in the Taoudéni and Timbuktu regions.

The UN, the African Union (AU), the Economic Community of West African States (ECOWAS), and the European Union (EU) – in their capacity as members of the Mediation Team supporting the implementation of the Agreement on Peace and Reconciliation in Mali resulting from the Algiers Process – also welcomed the successful conduct by the parties of the first mixed patrol in Gao on 23 February, within the framework of the Operational Coordination Mechanism, and called on them to extend the patrols in Kidal and Timbuktu without delay.

“[These] initiatives represent important milestones towards the successful implementation of the Agreement and towards greater peace and stability and the return of state services,” read a joint declaration issued by the four organizations.

Noting the important steps still to be taken, the organizations further invited parties to the Agreement to continue to honour the commitments made, in particular at the high-level meeting of the Agreement Monitoring Committee held in the capital, Bamako, last month, as well as to implement all the provisions of the Agreement for the interim period so as to support in a consensual manner the ongoing State reform and the new political and security architecture.

“In that regard, [we] call on the parties to establish without delay the National Commission for Disarmament, Demobilization and Reinsertion, the Integration Commission, and the National Council for Security Sector Reform which are key to advancing the peace process,” added the joint declaration.

Also in the declaration, the organizations also welcomed the establishment of a consultative framework involving all parties as well as the international Mediation Team, as well as commended progress towards preparing for a national conference, the *Conférence d'entente nationale* and called for broad and inclusive participation for its preparation and organization.

The organizations, however, noted concern at the recent increase in attacks and clashes, particularly in north and central regions of Mali, such as those in Boulkessi, in Timbuktu as well as terrorist attacks in border areas in Burkina Faso and Niger, and underlined the need to bring the perpetrators to justice.

They also called on the parties to the Agreement to work closely together to improve intercommunal relations, share information about security threats, and take concrete steps to prevent and counter violent extremism and terrorism and spill-over into the region.

"In this regard, [we] welcome the initiative of the G5 Sahel Member States to more effectively fight violent extremism in support of the Malian parties," said the parties.

They also reiterated their commitment to support, in coordination with the lead and the other members of the Mediation Team, the implementation of the Agreement as well as their determination "to counter those who take actions to obstruct or threaten the implementation of the Agreement."
