

Press release: Historic WTO agreement will reduce exporting red tape and boost UK trade

The first multilateral agreement successfully negotiated through the WTO, and now ratified by more than 110 countries, will come into force immediately and will see WTO members benefit from greater trade by cutting burdensome red tape associated with goods exporting.

Once fully implemented, the global economy could see a benefit of £70 billion.

International Trade Secretary, Dr. Liam Fox, said:

We have fully supported this historic agreement which will remove some of the barriers to cross-border trade and could benefit the UK economy by up to £1 billion. We will now work with other WTO members to ensure economies, both developed and developing, fully realise the benefits it will bring to their citizens.

The UK has long supported initiatives that will make trade across borders easier, but despite the work that has already been done on border controls until now goods have continued to be delayed at borders slowing trade flows and adding costs to business which in turn might be passed on to consumers. We welcome this WTO success story.

Over three-quarters of the WTO's members are either developing or transitioning into market economies. The Trade Facilitation Agreement (TFA) will have the greatest impact for the economies of the world's poorest nations – to sub-Saharan economies this could be upwards of \$10 billion per year.

As a result of the TFA, those countries that have ratified will be required to:

- publish fees and charges online
- introduce a 'fast track' for perishable goods – reducing the amount of food that rots while waiting to cross borders
- allow pre-arrival processing of documentation
- allow the use of copies of documents, rather than originals
- allow for the right to appeal customs decisions

By helping to improve transparency, predictability and consistency, the TFA should lead to reduced trade costs and create the environment for small and

medium sized enterprises to play a greater role in the international supply chain.

Studies suggest the agreement – which largely concerns the cost of clearing goods for import and export – will greatly reduce costs, time and the number of documents required for goods to cross borders. They also suggest the TFA could add over £70 billion to the global economy, of which the UK is expected to benefit by up to £1 billion and could reduce worldwide trade costs by between 12.5% and 17.5%.

Negotiations on the Trade Facilitation Agreement were concluded at the WTO's Bali Ministerial Conference in December 2013 and since then work has been under way to reach the two-thirds of WTO Members ratifications required for the TFA to come into force.

It has long been shown that trade lifts countries out of poverty and the UK will continue to work with developing countries to help them ratify and implement the agreement to ensure they benefit from reduced trade costs and waiting times.

[Diane Abbott response to Supreme Court's judgement on legality of minimum income threshold for UK citizens who seek to bring families here](#)

Diane Abbott MP,

Labour's Shadow Home Secretary,

following the publication of the Supreme Court's judgement on the legality of the minimum income threshold for UK citizens who seek to bring families here, said,

"The

Supreme Court accepted the legitimacy of the Government measures, but it also held that Home Office rules unlawfully fail to take account of requirements to safeguard children's welfare.

"These

rules cause hardship for thousands of families, prevent UK citizens being united with their families and clearly discriminate against women, BAME communities, and people on lower incomes.

"These

measures were drawn up as part of Theresa May's failed policy to reduce net migration. Labour opposes rules that are clearly discriminatory. We will implement a fair and balanced immigration system which does not split families apart."

[News story: MOD signs £146 million contract to upgrade RAF's long-range missile](#)

The shared deal with MDBA will see the UK's Storm Shadow and France's SCALP missiles updated so they remain fit for purpose and ready for operational use.

During an inward visit by Laurent Collet-Billon, the Minister confirmed the strong partnership with France in a series of meetings at Lancaster House. The collaboration is providing a £50 million saving for both sides.

The contract will keep the missile in service for the next decade and beyond and help to sustain around 60 UK jobs. Storm Shadow is a combat-proven, long-range, precision cruise missile, already in service with RAF Tornados, deployed recently against Daesh in Iraq.

Minister for Defence Procurement, Harriett Baldwin said:

Storm Shadow is a proven and vital missile for the RAF, and this £146 million upgrade will ensure it is always ready for whenever our Armed Forces might need it to defend our way of life.

This contract is an important part of the Government's £178 billion plan to ensure our armed forces have the right equipment at the right time.

Defence Minister Harriett Baldwin with her French counterpart Laurent Collet-Billon. Crown Copyright.

The midlife refurbishment programme has been developed in co-operation with the French Government who will be updating their own similar missile known as SCALP.

By taking advantage of the similarities, this collaboration not only reaffirms the strong defence relationship as outlined under the Lancaster House Agreement, but has also resulted in a £50 million saving for both the

UK and France.

The regeneration will consist of a midlife refurbishment of current missile parts such as the turbo-jet engine, an upgrade of the navigational system, and a like for like replacement of items such as the cabling, seals and gaskets.

The work will sustain around 60 jobs at MBDA in Stevenage and Bolton, in a variety of roles including software and systems engineering. Over 40 jobs will also be sustained through the supply chain.

Chief Executive at the MOD's Defence Equipment and Support Organisation, Tony Douglas said:

The contract to regenerate Storm Shadow, a combat-proven, all-weather precision missile, provides a clear example of the MOD and UK industry working effectively together with our counter parts in France; providing our UK Armed Forces with the best equipment possible while sustaining dozens of UK jobs.

Storm Shadow is designed to target substantial buildings and structures, such as military facilities, control centres, bunkers, missile sites, airfields and bridges, which might otherwise require the use of several aircraft over the course of numerous missions.

France is the UK's most important European Ally, with both countries' defence budgets together account for almost half of all European defence spending. This deal is the most recent example of collaboration in a long history of cooperation on defence and security. The £146 million investment in Storm Shadow will sustain the missile until its planned out of service date in 2032.

Laurent Collet-Billon, Délégué Général pour l'Armement said:

This deep-strike missile mid-life update was jointly prepared. It represents a new step in the Franco-British cooperation roadmap and strengthens the Franco-British strategic partnership in the armament field.

BBC announces major investment in Scotland

22 Feb 2017

Significant investment in news and programming in Scotland by the BBC has been welcomed by the Scottish Conservatives.

Shadow culture secretary Jackson Carlaw said the additional £20 million injection would provide viewers north of the border with exactly what they wanted, while not jeopardising access to UK-wide programming.

The corporation's director general, Tony Hall, announced today there would be a new BBC channel for Scotland.

Broadcast every evening, it will have an initial budget of £30 million and carry news and entertainment programmes.

It will also provide the opportunity for journalists and programme-makers in Glasgow to work on wider BBC projects, creating 80 new jobs.

Despite the benefits set out today, SNP MP John Nicolson still found fault with the news, saying the Beeb had "missed an opportunity to deliver for the people of Scotland".

Scottish Conservative shadow culture secretary Jackson Carlaw said:

"This is an extremely welcome announcement.

"It's good for jobs, journalism, scrutiny and programming.

"It also ensures those who still prefer the UK-wide BBC news at 6pm, and other programming on BBC1, get to keep that too.

"It's no surprise, despite this fantastic investment, to see SNP MPs complain about it.

"Only they, with their inherent and serial grievance agenda, could find fault

with this.

“The fact Scottish-based journalists will now have a chance to showcase their work elsewhere across the network is also a development which should be applauded.”
