

Press release: Defence Secretary confirms £1.7bn investment in Scottish military bases

Sir Michael Fallon outlined how Scotland will be home to several additional key Defence capabilities by 2020 to the Board and recognised its unique contribution to UK national security.

Defence Secretary Sir Michael Fallon said:

Scotland is on the frontline of defending the United Kingdom from growing threats at sea, in the air, and on land. Our commitment to the future of defence in Scotland is underlined by increasing investment in better infrastructure for the Armed Forces helping to keep us safe.

Scotland's 14,000 military regular and reserve personnel and 3,930 MOD civilians are set to benefit from:

- £1.3 billion investment into upgrades to HM Naval Base Clyde's waterfront, engineering support, accommodation and physical security ahead of the Dreadnought class of deterrent submarines arriving in Scotland from the early 2030s;
- £400 million investment at Lossiemouth as one of the RAF's three fast jet bases – upgrading its runways, taxiways and accommodation for the nine new Poseidon P-8 Maritime Patrol Aircraft and an additional Typhoon squadron;
- Being home to a versatile Army Adaptive Force Brigade, which specialises in operations, works alongside partner nations abroad, and provides resilience support to Scottish civil authorities and communities. Further, Leuchars Station will be expanded to become the main 'hub' for Army activity in Scotland.

The £178 billion Defence equipment programme supports 11,000 Scottish industry jobs and accounts for over 10% of the country's industrial base.

Scottish business is developing key military capabilities: the Queen Elizabeth Carriers being built in Rosyth; Offshore Patrol Vessels and Type 26 Global Combat Ships being built in Govan and Scotstoun; a new Active Electronically Scanned Array Radar for RAF Typhoons being built in Edinburgh.

Press release: Payback for illegal waste crimes

A skip hire boss has been found to have benefited from his illegal activity by almost £1million.

Raymond Shepherd could have to pay back £980,207 under the Proceeds of Crime Act – the agreed sum of his criminal activities – if he comes into future assets.

It's a debt for life for the 61-year-old, of Rookhope in County Durham. He ran Albert Hill Skip Hire in Darlington and was jailed for 18 months when he appeared at Teesside Crown Court for sentence on December 12, 2013.

He was also disqualified from being a company director for 10 years.

He was convicted following two separate trials of operating a waste facility without a permit, depositing waste without a permit and failing to comply with a suspension notice.

Environment Agency officers then began proceedings to make him pay back a sum of money which reflected the gain from his criminal activities.

Court hearing

On Thursday 23 February, following a 4-day confiscation hearing at Teesside Crown Court under the Proceeds of Crime Act, Shepherd was given a confiscation order to pay back £14,000 of available assets.

He could face up to six months in prison if he fails to pay.

And if he comes into future assets he will have to pay back more of the near £1million agreed benefit sum.

Shepherd contested the application arguing that the activities at the sites were carried out lawfully.

The result comes on the back of a large-scale investigation by the Environment Agency, called Operation Bachelor, which started in 2008. It has also resulted in two other men receiving suspended prison sentences and Albert Hill Skip Hire Ltd being fined £100,000.

A previous Proceeds of Crime hearing in August 2015 in relation to the same investigation saw Shepherd's son, Tony Shepherd, 41, of Winston, Darlington, ordered to pay back £350,000.

He was subsequently jailed for 3 years in May 2016 for failing to pay the sum. He still has to pay back the money, and potentially up to £1.2 million if he comes into future assets.

Debt 'will follow' Shepherd

Oliver Harmar, Area Director for the Environment Agency in the North East, said:

This is a debt that will follow Raymond Shepherd around for the rest of his life. It sends out a message to the industry that waste crime does not pay and not only will we hit people with court action but we'll then hit them in the pocket.

Shepherd's illegal waste operations were carried out in the interests of profit, unfortunately at the expense of the environment. Not to mention by not complying with regulations, he undermined legitimate businesses.

And the impact on the community must not be overlooked, including two major fires which took place at Dodsworth Street. The site is now cleared of waste.

It's been an extensive and long-running investigation by our officers and shows just how seriously we take waste crime. We'll continue to take action against those operating outside of the law and the regulations.

Long-running investigation

The Environment Agency worked closely with other organisations including Durham County Council, Darlington Borough Council, Durham Police, Durham and Darlington Fire and Rescue Service and the Health and Safety Executive during the long-running investigation.

The jurors at Raymond Shepherd's trials heard how the company's premises at Dodsworth Street were full with illegally-held waste.

Between July 2008 and May 2010 he and his company, Albert Hill Skip Hire Ltd, operated an illegal waste transfer station at Whessoe Road in Darlington.

He did the same at Dodsworth Street from July 2008 until the site got a permit in April 2009, but by November 2009 the first enforcement notice had been served on the company requiring that he operate legally within the terms of his notice.

In 2010 enforcement notices were served, in 2011 a suspension notice was served and in 2012 the permit was revoked. Investigations found the company had been depositing and storing waste on an access road, and cement-bound asbestos was also found on the site.

Following conviction, the waste carrier's registration was revoked. The site is now clear of all waste.

[Press release: Protection extended for mid Cornwall's wildlife-rich landscape](#)

Rare butterflies and birds will benefit from a much larger area of protected land in mid Cornwall from today, says Government wildlife adviser Natural England.

The new Mid Cornwall Moors site of special scientific interest (SSSI) merges the six original SSSIs which previously dotted the landscape either side of the A30 and east of Indian Queens, extending their boundaries and protecting around 50% more of the countryside. The SSSI includes several closely located patches of land, connecting important habitats and helping wildlife to withstand pressures from climate change in the future, creating a stronger refuge and network for rare plants and animals.

The countryside across the Mid Cornwall Moors is a rich and varied mix of heathland, woodland, and wildflower meadows; a vital sanctuary for wildlife, as well as an important asset for local people, visitors, and businesses. Fens and mires in the headwaters of the Fal and Par catchments also help to provide clean water and have the potential to reduce flood risk to homes and properties located further downstream.

Natural England has joined forces with landowners, the Cornwall Wildlife Trust and Butterfly Conservation, building on the successes of the Mid Cornwall Moors LIFE project to create the perfect conditions for the rare marsh fritillary butterfly, which should see its fortune improve as a result. The wet woodlands throughout the area are important for the diminutive willow tit, which has virtually disappeared from large parts of the UK and declined by an estimated 81% since the mid-1990s. The new areas added to the SSSI include important breeding sites for both of these special species.

The former A30 at Goss Moor was downgraded to recreational use for cyclists, horseriders and walkers in 2008. Natural England has been working with Highways England, the Eden Project and Butterfly Conservation to create new habitat areas for butterflies and other wildlife on land alongside the new A30 corridor, several of which have now also been included within the new SSSI boundary. With help from the Eden Project, swathes of devil's-bit scabious flowers – the main food plant for the marsh fritillary butterfly – have been grown and planted alongside the A30.

Speaking at an event at the Eden Project today, Natural England's Chief Executive James Cross said:

The Mid Cornwall Moors are incredibly important areas for wildlife as well as people, and balancing the needs of both are critical to their conservation. Today's notification builds on the success of

the LIFE project, providing protection for the much-improved breeding habitats for marsh fritillary butterflies along the A30 corridor – making it a valuable asset, not just for businesses and visitors – but also for wildlife. Mid Cornwall Moors is now one of our top wildlife sites and we are able to give it the protection it deserves.

Seán O’Hea, Mid Cornwall Reserves Manager, Cornwall Wildlife Trust said:

The Mid Cornwall Moors are special because of all of the patches of good quality wildlife habitat scattered across the landscape. This designation is very well thought out because it looks beyond the previous SSSI boundaries to consider what the wildlife really needs to thrive. It extends the protection given by SSSI status to many more important pieces of land, creating a wider network of protected sites.

Philip Hambly, Chairman of Cornwall Butterfly Conservation said:

The marsh fritillary is threatened, not only in the UK but across Europe. It is therefore essential that this rare butterfly is managed carefully and on a landscape scale so colonies remain connected. Mid Cornwall Moors protection as an SSSI will target conservation to help this butterfly’s survival across this very important area. Cornwall Butterfly Conservation’s volunteers have already worked in partnership with Natural England carrying out surveys and conservation work and very much look forward to continuing this together.

Dr Caroline Bulman, Head of Species Ecology at Butterfly Conservation, said:

Like many specialist butterflies, the threatened marsh fritillary can only survive when colonies are able to move between areas of suitable wet grassland – which provide the host plant and conditions for them to thrive. We welcome the expansion and changes to the new designation of the Mid Cornwall Moors SSSI, as this will help to protect this and other important species at a landscape-scale and help to reverse the decline, for such rapidly declining species.

The previous SSSIs now included within the Mid Cornwall Moors SSSI include Goss and Tregoss Moors, Red Moor, Retire Common, Breney Common, Tregonetha and Belowda Downs and Belowda Beacon. The area protected as a SSSI has increased by over two square miles and now covers areas totalling six and a half square miles across the wider Mid Cornwall Moors landscape.

The Mid Cornwall Moors SSSI comes into immediate effect from today, 23 February. Landowners, occupiers and interested parties have 4 months in which to make representations or objections to Natural England, who will then decide whether or not to confirm the notification.
