

Hidden groundwater resource under pressure in southern England

The UK has had less rainfall than usual over the winter, and the south and south-east have been particularly dry meaning that the risk of a drought is increased. New maps published by the BGS illustrate that people in the south and south-east of England are especially reliant on groundwater for their water supply and this provides some resilience to drought.

Jurassic Coast map drains the sea to reveal geology

Scientists from the British Geological Survey (BGS) and University of Southampton have published a seamless onshore-offshore bedrock geology map of the eastern half of the Jurassic Coast World Heritage Site.
