

Targeted stakeholder consultation of the European Commission in relation to the review of the TEN-T policy

The CoR COTER commission would like to inform you about a targeted stakeholder consultation that the European Commission is undertaking in relation to the [review of the TEN-T policy](#). Mobility and transport infrastructure are key enablers of territorial and social cohesion and therefore of key importance for local and regional authorities (LRAs). The transport system of the future will radically change in the light of decarbonisation, digitalisation and automatisisation. The TEN-T policy review must take into account those changes and LRAs must play an important role in this exercise. In line with the Action Plan on the European Green Deal, the European Commission will present the legislative proposal for a revision of the TEN-T Regulation in 2021.

Under the Commission's Better Regulation approach, a [targeted stakeholder consultation](#) has been launched, addressing directly the stakeholder concerned. We have been asked by the European Commission's Directorate for mobility and transport to contact LRAs as their input is of high value in this exercise. It is also of high value for the CoR, therefore we would kindly ask you to send us a copy of your contribution to the consultation if possible.

This consultation is available via an [online survey](#).
