

The science behind storytelling

The Science Behind Pixar exhibition at the Science Museum not only showcases some of the best animated movie characters but also helps broaden the youth's horizons in science and arts.

News.gov.hk spoke to Science Museum Director Paulina Chan and Pixar Animation Studios Character Shading Artist Maria Lee to learn more about the show and secrets of success behind Pixar's film-making process.

The story is available at www.news.gov.hk/eng/feature today (August 29) in text and video format.
