

Two companies fined after worker dies in Camden explosion

Materials Movement Ltd and P J Labour Services Ltd have been fined after a worker was killed in an explosion at a demolition site.

Westminster Magistrates' Court heard how, on 16 March 2017, 54-year-old Stephen Hampton, working at a site on Swains Lane in Camden, London, was killed when an old fuel storage tank he was cutting up exploded and the end of the vessel struck him causing fatal injuries.

An investigation by the Health and Safety Executive (HSE) found both contractors failed in their duties to effectively plan, manage and monitor control measures to address the risks associated with the demolition of a site that contained fuel tanks. The standards for this type of work are well known, established and clear.

Materials Movement Ltd of Clifton Road, Henlow, Bedfordshire pleaded guilty to breaching Regulation 15(2) of Construction (Design and Management) Regulations 2015 and has been fined £33,000 and ordered to pay costs of £7,675.38.

P J Labour Services Ltd of Technology Park, Colindeep Lane, Colindale, London pleaded guilty to breaching Regulation 15(2) of Construction (Design and Management) Regulations 2015 and has been fined £33,000 and ordered to pay costs of £7,648.18.

Speaking after the case, HSE inspector Ian Shearring said: "Mr Hampton had recently adopted two young boys and this incident leaves them, along with his wife, alone and struggling financially all for the sake of a bit more effort on both defendant's parts. Both Materials Movement Ltd and P J Labour Services Ltd have today been held to account for killing Mr Hampton after failing to take adequate action to protect the health and safety of persons working on their site".

"Neither company adequately assessed and controlled the risks of this highly dangerous work. It was left to the workers to devise their own methods of

working, which was compounded by no site management.

Notes to Editors:

1. The Health and Safety Executive (HSE) is Britain's national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise. www.hse.gov.uk
