

Two men injured after cradle falls nine floors at London tower block build

Two men working on a residential tower under construction in London were fortunate to escape death when a defective cradle they were in fell about 90 feet.

On 4 June 2020, Marcel Botnaru and Radu Baracu were working in the cradle at level nine of the Pennington Street building. The support beams for the cradle had been fitted with the wrong sized end stops, which resulted in it rolling off the end and crashing to the ground below.

- The residential tower was under construction on Pennington Street in London

Guidance on the [safe use of lifting equipment](#) is available.

Mr Botnaru suffered six broken ribs and a punctured lung while Mr Baracu was off work for six weeks, but both were extremely fortunate to escape more serious and potentially life-threatening injuries.

Two companies, which specialise in the provision and installation of access equipment, were fined a total of £240,000 when they were sentenced at Croydon Magistrates Court on 10 November 2023.

- The two men were in the cradle when it fell approximately 90 feet

The court heard how an investigation by the Health and Safety Executive (HSE) found that Zarafa Height Solutions Limited failed to ensure that the support beams they manufactured were safe to use when they left their factory in Grantham. A second company, Giraffe Access Company Limited, who installed the cradle and support beams at the London Dock site failed to identify that they were defective during their safety checks prior to commissioning.

Both companies of Hungate, Pickering, North Yorkshire, are part of the Zarafa Group and pleaded guilty to breaching Section 3(1) of the Health and Safety at Work etc Act.

- The cradle fell from level nine of the residential tower building

Zarafa Height Solutions Limited was fined £120,000 and was ordered to pay £3,987 costs and Giraffe Access Company Limited was fined £120,000 and was ordered to pay £3,996 costs.

After the hearing, HSE inspector Kevin Smith said: "This incident could have

ended in a double tragedy.

“Both of these men suffered injuries but were fortunate to escape with their lives.

“The fines imposed on these two companies should underline to everyone in the construction industry the importance of ensuring that rigorous safety checks are carried out on equipment before it is put to use.

“We will not hesitate to take action against companies which do not do all that they should to keep people safe.”

This prosecution was supported by HSE enforcement lawyer Samantha Crockett.

Notes to editors:

1. [The Health and Safety Executive](#) (HSE) is Britain’s national regulator for workplace health and safety. We prevent work-related death, injury and ill health through regulatory actions that range from influencing behaviours across whole industry sectors through to targeted interventions on individual businesses. These activities are supported by globally recognised scientific expertise.
