

UK growth accelerated in the fourth quarter of last year

The fourth quarter saw UK growth speed up to 0.7% for the three months. The quarterly pattern last year according to the ONS was 0.2% in Q1, 0.6% in each of Quarters 2 and 3, and 0.7% in Q4. The ONS says this amounts to 1.8% growth for the year as a whole, though the four quarters as reported gives you a figure of 2.1%. What is clear from these figures is the economy grew faster after the Brexit vote than before by a decent margin, the opposite of the official and expert forecasts at the time.

As the ONS rightly said "In the fourth quarter the UK experienced the strongest rate of growth among European groupings and G7 countries". Let's hope the Treasury adjust their forecasts for our economy in the Budget statement, as their recent forecasts have been far too low.
