## [Dounreay to hold emergency exercise on 8 and 9 June 2021](#)

News story

The site will hold a routine emergency exercise on the evening of 8 June and during the day on 9 June.

An emergency exercise will take place at Dounreay on the evening of 8 June and during the day on 9 June. The site alert will be sounded during the course of the exercise.

This notice is to inform the public not to take any action when the alarm sounds.

Any queries in relation to this notice should be made to the emergency arrangements team on 01847 802535.

## Port of Tilbury flood defence gates project

Work is progressing on this project of national importance to install new dual function lock gates on the Thames Estuary in Tilbury.

The £34 million scheme is a project between the Environment Agency and the Port of Tilbury that will better protect thousands of homes and businesses in the local area from flooding.

The project will see 3 pairs of lock gates at the entrance lock to the port replaced. Each gate is approximately 15 metres tall and 19 metres wide; the equivalent approximately of 3 double decker buses high and the length of a cricket pitch wide.

The outer gates will be raised in height and tie into the adjacent flood walls so that they perform the dual function of a navigational and flood risk management asset.

Overview of lock, outer and middle gates and construction areas at outer gates

Since work started in January 2021 the main highlights include:

- the locating and identification of multiple electric cables to be diverted around the works areas
- installation and testing of 2 x 36 metre long test piles to inform the foundation design for the new outer gate ram pits
- construction of the replacement control buildings foundation slabs
- a rolling programme of refurbishments of the sluices which control water levels between the gates

Construction of draw pit chambers for cable diversions

Fabrication of the new middle and inner gates is underway in Holland, and detailed design work is continuing on the new gate control systems.

John Curtin, Environment Agency Executive Director for Local Operations, said:

It has been great to have visited the construction site at Tilbury

Port and to meet the team delivering this nationally important collaborative project. It is a complex project, involving construction activities around the busy port entrance – but I've been really impressed by the professional approach of the joint team with the ongoing support of Tilbury Port staff as we make important strides to better protect over 2,500 properties from flooding.

Helena Henao-Fernandez, Environment Agency Team 2100 Deputy Programme Director, said:

The Tilbury dual function lock gates project is a perfect example of collaborative working between different organisations to tackle the effects of climate change. By working together, we are providing better protection against the risk of flooding to the local communities as well as delivering a suite of wider outcomes and benefits.

Paul Dale, Port of Tilbury's Asset and Site Director, said:

We are pleased that the construction work for this important project is well underway. It is vitally important that we get this new engineering solution in place to provide flood defences for homes and businesses for the future. It is great to welcome the Environment Agency team to the port today for an overview of the progress of the project so far.

Pictured left to right are David Housden, Head of Engineering & Procurement, the Port of Tilbury; Paul Dale, Asset and Site Director, the Port of Tilbury; John Curtin, Executive Director for Local Operations, Environment Agency, and Mark Johnson, Area Flood and Coastal Risk Manager, Environment Agency.

Once completed the new dual function lock gates will ensure a high standard of flood protection for Tilbury along with the new navigation lock for operations at the port.

Jack for pile testing

Formwork and shuttering for new machine house foundation slabs

New timber sluice gate paddles

This scheme is part of the Government's long-term investment in flood and

coastal defences. Since 2015 it has invested £2.6 billion to better protect the country from flooding and coastal erosion meeting the target of better protecting 300,000 homes this March.

Earlier this year, the Government announced a record £5.2 billion investment in flood and coastal defences and the National FCRM Strategy will help build a better prepared and more resilient nation.

## **Further information**

Work started in January 2021 and is expected to last for 18 months with the new lock gates planned for installation in late 2021/early 2022.

Once the work is completed it will ensure a high standard of flood protection for Tilbury and provide a new navigation lock for operations at the busy port.

Planning for this project has been underway with the [Environment Agency](#) and the [Port of Tilbury](#) for several years.

With total scheme costs of around £34 million, the Port of Tilbury London Ltd (PoTLL) is providing a multi million pound contribution to the project and will take responsibility for operation and maintenance of the new dual function structure. Funding has also been secured from the Anglian (Eastern) Regional Flood and Coastal Committee.

The Environment Agency's [Thames Estuary Asset Management 2100 Programme](#) (TEAM2100) will deliver the works in partnership with a number of contractors including [Jacobs](#) and [Balfour Beatty](#).

## **Port of Tilbury and Thames Estuary flood defences**

The Environment Agency Tilbury Barrier forms part of the Thames defences that reduce flood risk to the Purfleet, Grays and Tilbury flood cell along with The Port of Tilbury. The Port of Tilbury is the largest multi modal port in the south east. Sitting on the north bank of the Thames just 22 nautical miles east of central London, it is perfectly placed to handle cargo for London and the rest of the south east, with easy access to the M25 and 18 million people within 75 miles.

The port has an annual throughput of 16 million tonnes per annum, estimated to have a value around £8.7 billion. The varied cargoes are spread across an estate in excess of 1,000 acres and are imported and exported by a variety of short and deep sea vessels. Offering operational support for different cargoes, the port can support ro-ro, container, forest products, grain and bulks as well as passenger cruises.

The current Tilbury Barrier was installed in 1981 and has already passed its designed maximum number of closures and had a number of required modifications. The Port of Tilbury London Limited (PoTLL) in planning the replacement of 2 sets of lock gates was keen to partner with the Environment Agency and install an outer set of gates, which can act in both an

impoundment function and flood defence function.

The site area falls within the Thames Estuary 2100 strategy, which was approved by the Environment Agency Board in 2010 and by Defra and HM Treasury in 2012. The strategy sets out recommendations for managing tidal flood risk across the estuary until the end of the century and beyond. In January 1953, over 2,500 properties flooded in Tilbury in a tidal surge that claimed 307 lives in England.

## **The Thames Estuary Asset Management 2100 (TEAM2100) programme**

The TEAM2100 programme pioneers a new asset management approach for the Environment Agency, investing early to maintain the condition of flood defence assets to reduce the risk of failure. The programme aims to ensure that the tidal walls, embankments, and barriers along the Thames Estuary continue to protect 1.4 million people and £321 billion of property from tidal flooding.

The programme of work includes detailed engineering investigation, repair and refurbishment work to flood defence assets across the estuary. This work will maintain or improve the condition of current flood defences and the standard of protection they offer.

The programme started in 2014 and is being jointly delivered by the Environment Agency, Jacobs and Balfour Beatty, along with other suppliers. It is the UK's largest single programme of flood risk management work, valued at over £300 million in total, and is one of the Government's top 40 major infrastructure projects.

## **About Forth Ports/Port of Tilbury and Tilbury2**

Forth Ports Limited owns and operates Tilbury, alongside 7 other commercial ports on the Firth of Forth and the Firth of Tay: Grangemouth, Dundee, Leith, Rosyth, Methil, Burntisland and Kirkcaldy.

The Port of Tilbury is the number one UK port for forestry products, construction materials, paper, grain, recyclables and warehousing space. The port has a strong market presence in bulk commodities, ro ro, cars and cruise vessels. The port's London Container Terminal handles a mix of short and deep sea services, is the UK's number 4 port for containers and has the greatest reefer (refrigerated container) point connectivity in Europe.

Tilbury's strategic location makes it a natural point for distribution, with nearly 20 million people living within 75 miles. Serving the UK's market, the port offers customers excellent transport links to and from the UK's capital and across the south east where over 50% of the population lives and works. The port is a diverse multi modal hub, covering around 1,100 acres (850 acres and the London Distribution Park, in addition to the Tilbury2 site) and is well positioned to access the M25 orbital motorway and the rest of the UK's national motorway network. In addition, there are direct rail connections

within the port and dedicated barge facilities.

## [Record number of doctors and nurses working in the NHS in England](#)

For the third month running, there are record numbers of NHS doctors and nurses working in England according to the latest statistics published today (Thursday 3 June).

The provisional figures show that as of March 2021, there are a total of 124,078 doctors and 304,542 nurses working in the NHS. Compared to the same time last year, there are over 5,600 more doctors and over 10,800 more nurses working in the NHS. There are also record numbers of hospital and community health staff overall (1,197,747).

Health and Social Care Secretary Matt Hancock said:

It is hugely encouraging to see the number of doctors and nurses has peaked yet again, with over 124,000 doctors and 304,000 nurses working in our NHS.

Our expanding NHS workforce will help to provide safe care to patients and continue the success of the vaccination programme, as we work to tackle backlogs and build back better.

I'd like to thank all health and social care staff across the country for their tremendous work and commitment this past year.

The government is committed to delivering 50,000 more NHS nurses by the end of this Parliament.

The latest NHS People Plan, published in July 2020, is about making sure we put the right measures in place to support and grow the workforce. It puts NHS staff wellbeing at its heart with a new recruitment, retention and support package. It sets out practical support for wellbeing such as safe spaces to rest and recuperate, wellbeing guardians and support to keep staff physically safe and healthy.

We recognise the enormous pressure this pandemic has put on all of our staff. To support their wellbeing, we invested £30 million in mental health and occupational health support last year, and a further £37 million this year for mental health hubs, a helpline and a 24/7 text support service.

There has also been a 34% increase in applicants to study nursing this year, and all eligible nursing, midwifery and allied health professional students

will benefit from a non-repayable grant from the government, worth at least £5,000 a year.

Today, NHS Digital has published its [monthly NHS workforce data for February 2021, with provisional figures for March](#).

From January 2021, NHS Digital introduced a 'provisional' section of the monthly NHS workforce statistics publication containing an early view of the figures one month in advance of those throughout the rest of the release.

Today, NHS Digital also published its [quarterly NHS workforce vacancy data for March](#). The data shows:

- vacancies have fallen by over 12,200 since last year
- there are over 1,400 fewer nursing and midwifery vacancies than last year
- there are over 1,700 fewer doctor vacancies than last year
- the numbers of doctors, nurses and vacancies refer to full-time equivalent (FTE) roles

## [Ashford sites get early morning inspection in day of action](#)

Press release

Multi-agency visits find Openreach and UK Power Network cables deposited at waste site.

Officers recovered 182 kilograms of telecom cable belonging to Openreach together with power cable owned by UK Power Network.

Waste sites around Ashford in Kent received surprise early morning visits from officers from the Environment Agency, Ashford Borough Council, British Transport Police, Kent Police Rural Task Force, Openreach and the Joint Unit

for Waste Crime.

These visits are part of a series of multi-agency days of action targeting waste businesses, focusing on metal theft including cables and catalytic converters. The visits recovered 182 kilograms of Openreach's telecom cables and a quantity of power cables belonging to UK Power Network.

The Environment Agency and partners visited 6 waste sites where, as well as the cable, they uncovered a number of incidents of poor compliance with waste permits. Investigations will now follow and appropriate action will be taken to improve compliance and the state of the sites, which could include enforcement action.

Matt Higginson, Environment Manager for the Environment Agency, said:

This should serve as a warning to those who would flout the law that we and our partners are rooting out waste crime and we won't hesitate to take action.

Unscrupulous scrap metal sites are accepting stolen catalytic converters and cabling, further fuelling their theft across the south east.

Joint investigations and enforcement will continue and if convicted, those responsible could face extensive fines and even prison sentences.

Anyone who suspects illegal waste activity is reminded to report it to our 24 hour hotline by calling 0800 80 70 60, or anonymously contacting Crimestoppers on 0800 555 111.

You can [check your waste collector's waste carriers' registration](#) or call 03708 506 506.

Earlier this year the Environment Agency and partners launched the [Joint Unit for Waste Crime](#), aiming to stop serious and organised crime in the UK Waste Industry.
