

UK and Republic of Korea set out desire to cooperate in Space

The Chief of the Air Staff, Air Chief Marshal Sir Mike Wigston, and the Chief of Staff of the Air Force, ROKAF, General Jung Sang-hwa, signed the Terms of Reference document this morning at the Royal International Air Tattoo.

This arrangement establishes a series of Space Engagement talks to strengthen defence space co-operation, integrating space capabilities as defence partners. This cooperation will cover areas such as operational knowledge sharing, collaborative exercises and training, and personnel exchanges. It also sets out a mutual desire for the sharing of space-related information, through future information-sharing agreements.

Air Chief Marshal Sir Mike Wigston, Chief of the Air Staff – Royal Air Force, said:

Space is critical to our security, our prosperity and our modern way of life. The UK and the Republic of Korea share the same determination to ensure that space is there for the benefit of all, so I look forward to the deep cooperation between UK Space Command and the ROKAF that this arrangement will enable.

General Jung Sang-hwa, Chief of Staff of the Air Force – Republic of Korea Air Force, said:

The two countries have pursued their common values, including democracy, multilateralism and human rights.

In addition, ROKAF and RAF jointly responded to various global issues through military cooperation, such as Air to Air Staff Talks.

Based on the SET established today, I am confident that cooperation and communication between the air forces will expand further into the space field.

Air Vice-Marshal Paul Godfrey, Commander – UK Space Command, said:

This agreement is the first step in developing UK Space Command's

relationship with the ROKAF Space Centre to ensure that space is safe and sustainable for future generations.

This arrangement contributes to the [UK-Republic of Korea bilateral framework for closer cooperation](#), which was agreed by the UK Prime Minister and the President of the Republic of Korea at the NATO Summit in Madrid on 30 June 2022.

UK Space Command is the Defence lead for space operations, space workforce, and space capability. It's a Joint Command, based at RAF High Wycombe, and staffed by personnel from the Royal Navy, British Army, and Royal Air Force, alongside civil servants, and contractors.

[Consultation launched to decide on future good causes to benefit from £738 million Dormant Asset Fund in England](#)

- Consultation seeks views on the social and environmental purposes of dormant assets funding in England
- £880 million for good causes across the UK, £738 million of which will be made available for England over time

The Government has launched a public [consultation](#) on what social and environmental causes should benefit from more than £700 million of dormant assets funding in England.

Currently, dormant assets funding in England is required to be spent on three causes: youth, financial inclusion and social investment. As the national recovery from the COVID-19 pandemic continues, as well as cost of living pressures, the Government believes that now is the right time to review whether these remain the right causes for where funding from dormant assets can be allocated.

It comes as the Dormant Assets Scheme was recently expanded from bank accounts to include the insurance and pensions, investment and wealth management, and securities sectors, estimated to unlock around £880 million for good causes across the UK, £738 million of which will be made available for England over time.

Dormant assets are financial assets, such as bank accounts, that have been untouched for a long period. The Dormant Assets Scheme is led by the financial services industry and backed by the government with the aim of

reuniting people with these financial assets. Where this is not possible, the Scheme unlocks this money for social and environmental initiatives across the UK.

Nigel Huddleston, Minister for Sport, Tourism, Heritage and Civil Society, said:

This consultation will allow everyone's voice to be heard so that the Scheme can make a difference where it matters. With the cost of living crisis, it is more important than ever that we hear views from communities up and down the country on what causes we should support.

I encourage everyone to participate in this unique opportunity to have your say on the future of dormant assets funding in England.

To date, the Scheme has released £892 million, including £44 million allocated in England this year to tackle youth unemployment, to support communities in deprived areas, and give people in need access to finance.

In England, the scheme has already channelled £110 million to breaking down barriers to employment for disadvantaged young people and £100 million to increasing access to fair and affordable financial products and services for vulnerable individuals. This is on top of £485 million of much-needed funding for both charities and social enterprises since the scheme's inception.

This has included investment in thousands of social enterprises and charities working in the most deprived parts of the country through [Access – The Foundation for Social Investment](#) and [Big Society Capital](#), such as £150 million of investment into 305 organisations supporting young people at risk of unemployment. Bemix CIC in Kent received £80,000 to further develop their 'Discovery Catering' Cafe, which employs the young people they support and the Single Homeless Action Initiative in Durham (SHAID) received a £150,000 investment to support young people making the difficult transition to living independently.

Now, individuals, communities, and industry participants can have their say on what causes matter most to them. One option under consideration for views is a community wealth fund proposal that would see pots of money distributed over long periods of time in local communities in England, with decisions made by residents to make a difference where it is most needed.

ENDS

Notes to editors:

- The [consultation](#) is now open for responses and will close on Sunday 9 October.
- The government encourages all those with an interest – including the public, community groups, and industry stakeholders – to help shape the direction of the Dormant Assets Scheme in England over the coming years.

- Scotland, Wales and Northern Ireland are not required to publicly consult on the broad purposes of their portions
- To have your say, please respond to the consultation using this [online survey](#).
- All responses to the consultation will be carefully considered, if you have any further questions please email dormantassetsconsultation@almaeconomics.com.

Jobcentre closures in areas with red severe weather warning

Benefit payments will be made as normal. We will make every effort to contact everyone who has an appointment on one of those days to have it over the telephone or to rearrange, so they need not contact us or worry about their claim.

Our telephony enquiry lines will be open as usual. Numbers to call can be found on www.gov.uk/contact-jobcentre-plus

Riverside Resource Recovery Facility, Belvedere Permit Variation

The operators of Riverside Resource Recovery Facility have applied to the Environment Agency to vary the site's current operational permit.

This will allow increased energy generation, an increase in the maximum amount of waste going through the system, and the use of more raw materials.

After the earlier public consultation in 2021 on their initial variation application, the Environment Agency is 'minded to' issue the permit variation. Before making its final decision, it is running a further period of public consultation for people and organisations to submit their views.

The consultation is now open and will run until Tuesday 9 August 2022.

See [further information on the permit application, with details of how to take part in the consultation](#)

Permit variation

If granted, the environmental permit variation will allow Riverside Resource Recovery Limited to:

- Amend the energy generation limit from up to 72MW to 'up to 80.5MW;
- Increase the maximum amount of waste going through the system from 785,000 tonnes per annum (tpa) to 850,000 tpa;
- Increase the annual amounts of some raw materials used.

Under the variation emission limit, values for releases to air will be reduced. This is due to the current technology of combustion control, abatement and monitoring which can achieve, and accurately monitor, much lower levels of emissions.

These changes together are called the Riverside Optimisation Project, or ROP.

An Environment Agency spokesperson said:

An environmental permit sets out stringent conditions that all waste sites must adhere to. We will not issue an environmental permit for a site if we consider that activities taking place will cause significant pollution to the environment or harm to human health.

Public consultation lets people and organisations take part in our decision making. We welcome specifically, comments on environmental and health issues and where people have particular local knowledge. We take all relevant comments into account when making our decisions.

When making permit decisions, we use information on the potential environmental and human health impacts of the activity.

In deciding whether or not to issue the permit, the Environment Agency will take into account all relevant considerations and legal

requirements.

For further information, please email KSLE@environment-agency.gov.uk

Health and Social Care Secretary accepts JCVI advice on autumn booster programme

Press release

All people aged 50 and over will be eligible for autumn Covid booster and flu vaccine

Health and Social Care Secretary Steve Barclay said:

I have accepted the independent advice of the Joint Committee on Vaccination and Immunisation to offer an autumn Covid booster to people aged 50 and over, residents and staff in care homes for older adults, frontline health and social care workers, unpaid carers, individuals aged five to 49 in clinical risk groups and household contacts of those who are immunosuppressed.

NHS staff and volunteers provided an outstanding service to the public through the biggest and fastest vaccination rollout in England's history, which saved countless lives and allowed us to live with this virus without restrictions on our freedom.

Viruses spread more easily in the colder seasons with people socialising inside, so the risk of getting Covid is higher. It is absolutely vital the most vulnerable groups receive a booster vaccine to strengthen their immunity against serious disease over winter to protect themselves and reduce pressure on the NHS.

The flu virus could also be highly infectious at this time of year, so today I am also announcing that those eligible for a free flu vaccination this year will include everyone aged 50 and over, primary school children and secondary school pupils in years 7, 8 and 9, as well as people in clinical risk groups, unpaid carers and household contacts of those who are immunosuppressed.

If you or your child are eligible for a Covid or flu vaccine, I urge you to come forward as soon as you are invited by the NHS.

BACKGROUND:

Further information is available [here](#)

Covid

- The programme is expected to start in early autumn. Details of how the programme will be delivered including how people will be invited for vaccination will be set out nearer the start of the programme.
- The definition of frontline health and social care workers is published in the [Green Book](#)
- Clinical risk groups are set out in the [Green Book](#) – Tables 3 and 4
- The definition of carers aged 16 to 49 years is set out in the [Green Book](#) – Table 3

Influenza

The groups that are now eligible for the flu vaccine this coming season are:

- all children aged 2 or 3 years on 31 August 2022
- all primary school aged children (from reception to Year 6)
- those aged 6 months to under 65 years in clinical risk groups
- pregnant women
- those aged 65 years and over
- those in long-stay residential care homes
- carers
- close contacts of immunocompromised individuals
- frontline staff employed by the following types of social care providers without employer led occupational health schemes:

- a registered residential care or nursing home
- registered domiciliary care provider
- a voluntary managed hospice provider
- Direct Payment (personal budgets) or Personal Health Budgets, such as Personal Assistants

And later in the season:

- All adults aged 50 to 64 years
- Secondary school children in years 7, 8 and 9, who will be offered the vaccine in order of school year (starting with the youngest first)
- The flu vaccine programme outlined above applies to England only
