

PM remarks for the the 40th anniversary of the liberation of the Falkland Islands

It is a great honour for me to join you today before this extraordinary gathering of so many brave, gallant individuals, so many veterans and their families, exactly 40 years after British soldiers entered Port Stanley and liberated the Falkland Islands.

If you look at the photographs of our troops raising the Union Flag over Government House, you'll see young men who had just fought their way across a desolate and freezing landscape,

and they're unkempt and unshaven, their camouflage is streaked with mud, and you sense that their stamina – even their legendary stamina, has been tested to the limit, but what strikes you most is how their eyes and their faces are filled with pride in what they have achieved.

I of course have to rely on photographs, yet many of you were actually there.

You were the spearhead of an immense national effort, whereby our country dispatched a Task Force 8,000 miles to the South Atlantic to liberate a British territory from occupation and, even more importantly, to vindicate the principle that the people of the Falkland Islands – like people everywhere – have a right to decide their own future and live peacefully in their own land.

You left behind 255 British service personnel who laid down their lives for that principle, along with three Falkland Islanders.

As we honour their memory, the greatest tribute we can pay them is that ever since the liberation the Falkland Islands have lived and thrived in peace and freedom.

Today, they are home to people of 60 nationalities, providing Britain's gateway to the Antarctic, and vital opportunities for conservation and scientific research, based on a modern partnership founded on that principle of self-determination.

None of this would have happened without the tenacity, courage and fortitude of everyone who served in the Task Force and the thousands of civilians who made it possible.

Now, in honour of your achievements and sacrifice, I would like to ask the Hon Roger Spink and the Hon Leona Roberts of the Falkland Islands Government to present Tom Herring, the Chairman of the South Atlantic Medal Association, with a scroll giving all holders of the South Atlantic Medal the Freedom of the Falkland Islands.

Heat-health alert issued by the UK Health Security Agency

Latest

Heat-health alert extended to 9am on Tuesday 16 August for England

The UK Health Security Agency (UKHSA) has extended the current heat-health alert. The alert has been in place since midday on Tuesday 9 August for all regions in England and will now last until 9am on Tuesday 16 August.

The high temperatures are not forecast to reach the record-breaking levels of the most recent heatwave. However, temperatures could reach mid-30 degrees Celsius in some parts of England on Saturday and Sunday and remain in the high 20s into the start of next week.

Western and northern regions may start to see temperatures decline from Monday.

UKHSA is reminding people of heat-health advice to help everyone stay well throughout this extended period of hot weather.

Dr Agostinho Sousa, Head of Extreme Events and Health Protection at UKHSA, said:

We want everyone to enjoy the hot weather and stay well.

Temperatures aren't forecast to be quite as hot as the last heatwave, but we are experiencing a prolonged period of high temperatures that can impact the health of the most vulnerable, particularly elderly people and those with heart or lung conditions.

The most important advice for everyone is to stay hydrated, keep cool and take steps to prevent homes from overheating. Remember to look out for anyone who could be more vulnerable during this hot weather to ensure they're following this advice.

Andy Page, Met Office Chief Meteorologist, said:

Persistent high pressure over the UK means temperatures have been rising day-on-day through this week and it is important people plan for the heat. Temperatures are expected to peak at 35°C on Friday

and possibly 36°C over the weekend.

We will also see increasingly warm nights, with temperatures expected not to drop below the low 20s Celsius for some places in the south.

Temperatures will drop early next week as the weather becomes more changeable. Heavy showers and thunderstorms are likely in some areas, but there is low confidence in the details at this time and it is impossible to say yet exactly where and when they will occur.

The top ways for staying safe during hot weather include:

- looking out for those who may struggle to keep themselves cool and hydrated – older people who may also live alone, and those with underlying conditions are particularly at risk
- staying cool indoors by closing curtains on rooms that face the sun – and remember that it may be cooler outdoors than indoors
- drinking plenty of fluids and avoiding excess alcohol
- trying to keep out of the sun between 11am to 3pm, when the UV rays are strongest
- walking in the shade, applying sunscreen and wearing a wide-brimmed hat, if you have to go out in the heat
- avoiding physical exertion in the hottest parts of the day
- making sure you take water with you if you are travelling
- checking that fridges, freezers and fans are working properly
- checking medicines can be stored according to the instructions on the packaging
- never leaving anyone in a closed, parked vehicle, especially infants, young children or animals
- taking care and making sure to [follow local safety advice](#) if you are going into the water to cool down

High temperatures also present a risk of wildfires, especially after long dry periods. People with pre-existing heart and lung conditions such as asthma are most susceptible as breathing wildfire smoke may worsen their symptoms. Children and older people may also be susceptible to health impacts.

If wildfire smoke affects your area, avoid or reduce your exposure to smoke by staying indoors with the doors and windows closed.

Where possible avoid smoky areas. If you should travel through a smoky area, ensure that the vehicle windows are closed and the air conditioning is switched to recycle or recirculate if possible.

Listen out for local news reports and information from the emergency services who will provide advice on the precautions you should take.

Previous

Tuesday 9 August 2022

With high temperatures now forecast to last throughout the weekend, UKHSA has extended the current [heat health alert](#).

The alert is now in place from midday Tuesday 9 August until 11pm Sunday 14 August.

The public are urged to look out for family, friends and neighbours who may be more vulnerable during prolonged periods of hot weather – particularly elderly people who live alone and people with underlying health conditions.

More advice on staying well in hot weather is given below.

Monday 8 August 2022

The UK Health Security Agency's (UKHSA) heat-health alert service is designed to help healthcare professionals manage through periods of extreme temperature. The service acts as an early warning system for periods of high temperatures that may affect the public's health.

The alert will be in place from midday Tuesday 9 August to 6pm on Saturday 13 August for all regions of England.

Temperatures are not forecast to reach the record-breaking levels of the most recent heatwave but are expected to rise throughout the week, potentially reaching mid-30 degrees Celsius on Friday and Saturday in the South East, London, the South West, and the East and West Midlands.

Dr Agostinho Sousa, Head of Extreme Events and Health Protection at the UK Health Security Agency (UKHSA), said:

Temperatures will feel very warm again this week, particularly in southern and central parts of the country.

We want everyone to enjoy the warm weather safely when it arrives but remember that heat can have a fast impact on health. It's important to ensure that people who are more vulnerable – elderly people who live alone and people with underlying health conditions – are prepared for coping during the hot weather.

The most important advice is to ensure they stay hydrated, keep cool and take steps to prevent their homes from overheating.

Met Office Deputy Chief Meteorologist, Tony Wardle, said:

Heatwave criteria look likely to be met for large areas of the UK later this week, with the hottest areas expected in central and southern England and Wales on Friday and Saturday. Temperatures could peak at 35°C, or even an isolated 36°C on Saturday.

Elsewhere will see temperatures widely into the high 20s and low 30s Celsius later this week as temperatures build day-on-day through the week due to an area of high pressure extending over much of the UK.

Coupled with the high daytime temperatures will be continued warm nights, with the mercury expected to drop to only around low 20s Celsius for some areas in the south.

UKHSA has also published advice for the public on [how to stay healthy during periods of drought](#).

Tuesday 19 July 2022

Following a record period of hot weather in recent days, all 9 regions of England will no longer be under a Level 4 heat-health alert as of Wednesday 20 July.

On Tuesday, temperatures of over 40°C were recorded by the Met Office at a number of locations across the country, the first time temperatures have reached and exceeded that figure in history.

The East Midlands, East of England and Yorkshire and Humber regions will remain under a Level 3 alert until 9am on Thursday 21 July. It is therefore important to carry on following public health advice in these regions, as the weather will remain warm.

However, we are unlikely to see temperatures for the rest of the week reach beyond 30°C as the country begins to cool down.

Dr Agostinho Sousa, Head of Extreme Events and Health Protection at the UK Health Security Agency (UKHSA), said:

The very high temperatures have peaked for this week but they have been a wake-up call about the very real effects of climate change and the serious impacts it will have on our health.

For more information on the [common signs and symptoms](#) of heat exhaustion and heatstroke, visit NHS.UK.

Read our [COVID-19 and summer temperatures blog post](#) for advice on how to stay well in hot weather.

Monday 11 July 2022

The UK Health Security Agency (UKHSA) and the Met Office have today issued a Level 3 heat-health alert for the East Midlands and South West regions.

This alert follows the Level 2 alert issued on Friday and confirms that the Met Office's threshold temperature for an alert will be reached in 5 regions from 9am on Monday 11 July.

London, the East of England and the South East were placed under a Level 3 alert on Friday 8 July. The Yorkshire and Humber, West Midlands and North West regions remain under a level 2 alert.

The alert is in place until 9am on Friday 15 July, with temperatures across the country set to be high across the duration of this week.

For more information on the [common signs and symptoms](#) of heat exhaustion and heatstroke, visit NHS.UK.

Read our [COVID-19 and summer temperatures blog post](#) for advice on how to stay well in hot weather.

Friday 8 July 2022

The UK Health Security Agency (UKHSA) and the Met Office have issued a Level 2 heat-health alert for the South West, East Midlands, West Midlands, North West and Yorkshire and the Humber regions.

A Level 3 alert has also been issued for the East of England, South East and London regions, which were all placed under a Level 2 alert yesterday (Thursday 7 July).

Both alert levels are currently in place from 9am on Monday 11 July until 9am on Friday 15 July, with warm weather forecast across the country throughout the course of next week.

Dr Agostinho Sousa, Head of Extreme Events and Health Protection at UKHSA, said:

Heat-health alerts have now been issued to the majority of the country, with temperatures set to remain consistently high throughout the duration of next week.

Most of us can enjoy the hot weather when it arrives, but it is important to keep yourself hydrated and to find shade where possible when UV rays are strongest, between 11am and 3pm.

If you have vulnerable family, friends and neighbours, make sure they are aware of how they can keep themselves protected from the warm weather.

The top ways for staying safe when the heat arrives are to:

- look out for those who may struggle to keep themselves cool and hydrated – older people, those with underlying conditions and those who live alone are particularly at risk
- stay cool indoors by closing curtains on rooms that face the sun – and remember that it may be cooler outdoors than indoors
- drink plenty of fluids and avoid excess alcohol
- never leave anyone in a closed, parked vehicle, especially infants, young children or animals
- check that fridges, freezers and fans are working properly
- try to keep out of the sun between 11am to 3pm, when the UV rays are strongest
- walk in the shade, apply sunscreen and wear a wide-brimmed hat, if you have to go out in the heat
- avoid physical exertion in the hottest parts of the day
- make sure you take water with you if you are travelling
- take care and make sure to [follow local safety advice](#) if you are going into the water to cool down
- check medicines can be stored according to the instructions on the packaging

More information on the [common signs and symptoms](#) of heat exhaustion and heatstroke are available on NHS.UK.

UKHSA's [Beat the heat](#) checklist identifies suitable actions people can take to protect themselves during periods of hot weather.

Read our [COVID-19 and summer temperatures blog](#) for advice on how to stay well in hot weather.

Thursday 7 July 2022

A Level 2 health-alert in 3 regions of the country has today been issued by the UK Health Security Agency (UKHSA), with the Met Office forecasting high temperatures throughout next week.

The alert is in place from 9am on Monday 11 July until 9am on Friday 15 July, and covers the East of England, South East and London regions.

Dr Agostinho Sousa, Head of Extreme Events and Health Protection at UKHSA, said:

We want everyone to enjoy the hot weather when it arrives, but also to check in on their vulnerable family, friends and neighbours to make sure they are prepared for the warm conditions ahead.

High temperatures are predicted for a prolonged period, so make sure to follow our simple health advice to [beat the heat](#), such as covering windows exposed to direct sunlight and making sure that fridges, freezers and fans are working properly.

David Oliver, Deputy Chief Meteorologist at the Met Office, said:

We're at the start of a stretch of warm weather for much of England and Wales, that could last for much of next week.

In the short term, many can expect temperatures in the mid to high 20s Celsius over the weekend and then in the low 30s Celsius during the start of next week. Much of next week will remain warm for the time of year, as well as dry and sunny.

To prepare for the warm weather ahead, you can:

- shade or cover windows exposed to direct sunlight – external shutters or shades are very effective, internal blinds or curtains are less effective but cheaper and easier to install
- check that windows or vents can be opened
- if applicable, check mechanical ventilations systems are switched on and operating in summer mode
- check that fridges, freezers and fans are working properly
- check medicines can be stored according to the instructions on the packaging

More information on the [common signs and symptoms](#) of heat exhaustion and heatstroke are available on NHS.UK.

Read our [COVID-19 and summer temperatures blog](#) for advice on how to stay well in hot weather.

Thursday 16 June 2022

The UK Health Security Agency (UKHSA) and the Met Office have today issued a Level 3 heat-health alert for London, East of England and the South East.

This alert follows the Level 2 alert issued on Tuesday and confirms that the Met Office's threshold temperatures for an alert will be reached in 3 regions from Friday. A Level 2 alert remains in place for the East Midlands and South West.

Temperatures in these regions are expected to rise throughout the week and peak on Friday 17 June, with the alerts remaining in place until midnight on Saturday 18 June.

For more information on the [common signs and symptoms](#) of heat exhaustion and heatstroke, visit NHS.UK.

Read our [COVID-19 and summer temperatures blog post](#) for advice on how to stay well in hot weather.

Tuesday 14 June 2022

This is the first [Level 2 heat-health alert](#) of the year, with high temperatures expected across the Midlands and the south of the country later this week.

The alert, which comes into place at midnight on Thursday 16 June until midnight on Saturday 18 June, covers the East Midlands, East of England, London, South East and South West regions.

Dr Agostinho Sousa, Head of Extreme Events and Health Protection at UKHSA, said:

High temperatures are expected in some parts of the Midlands and the south on Friday. We want everyone to enjoy the hot weather safely when it arrives and be aware of good health advice for coping with warmer conditions.

During periods of hot weather, it is especially important to keep checking on those who are most vulnerable, such as older people and those with heart or lung conditions. Make sure to look out for signs of [heat exhaustion](#) and follow our simple health advice to beat the heat.

Dan Rudman, Deputy Chief Meteorologist at the Met Office, said:

Temperatures will continue to rise as we go through the week, becoming well above-average by Friday, when many parts of the southern half of the UK are likely to exceed 30°C or even reach 34°C in some places.

This is the first spell of hot weather this year and it is unusual for temperature to exceed these values in June. Many areas will also see some warm nights with minimum temperatures expected to be in the high teens or even low 20s for some overnight.

The top ways for staying safe when the heat arrives are to:

- look out for those who may struggle to keep themselves cool and hydrated – older people, those with underlying conditions and those who live alone are particularly at risk
- stay cool indoors by closing curtains on rooms that face the sun – and remember that it may be cooler outdoors than indoors
- drink plenty of fluids and avoid excess alcohol
- never leave anyone in a closed, parked vehicle, especially infants, young children or animals

- try to keep out of the sun between 11am to 3pm, when the UV rays are strongest
- walk in the shade, apply sunscreen and wear a wide-brimmed hat, if you have to go out in the heat
- avoid physical exertion in the hottest parts of the day
- make sure you take water with you if you are travelling
- take care and make sure to [follow local safety advice](#) if you are going into the water to cool down

More information on the [common signs and symptoms](#) of heat exhaustion and heatstroke are available on NHS.UK.

Boost in activities and food pledged to support children

Supermarkets and sport groups are today showcasing the valuable support they give to disadvantaged children and families in their communities, including through the government's Holiday Activities and Food (HAF) programme.

Meeting with representatives from UK businesses and the Cost of Living Business Tsar David Buttress today (Tuesday 14 June), Education Secretary Nadhim Zahawi encouraged organisations to boost their support for the holiday scheme, which supported thousands of children last summer after it was expanded to run nationally.

The call to arms for more support comes as the government announced it will also increase the per-pupil funding rate for universal infant free school meals. Approximately £18 million of new funding for universal infant free school meals will help schools provide for the 1.25 million children in reception, Year 1 and Year 2 with a free, healthy and nutritious lunch, in recognition of the rising cost of living.

Education Secretary Nadhim Zahawi said:

We are increasing our funding for universal infant free school meals because we know that more can be done in the face of rising costs.

Today I chaired a hugely productive roundtable with representatives from supermarkets and sport organisations, because Government

cannot act alone in how we support the most vulnerable.

I've seen some incredible support from organisations across the country for our Holiday Activities and Food programme, and I wanted to celebrate the action they are already taking in local communities to support disadvantaged children and their families. Together I have no doubt that we can do more.

The meeting celebrated the successes of the [Holiday Activities and Food](#) programme since its expansion in last year's spending review and the way in which organisations are already providing community support and facilitating partnerships.

Examples of contributions so far include:

- Organisers behind **UEFA Women's EURO 2022** have been working with charitable partners, including HAF, on a Women's EURO ticketing invitation to ensure everyone gets a chance to be part of the biggest women's sporting event in European history this summer. They have gifted tickets to selected children and families to attend games as part of their pledge to make this tournament the most accessible and inclusive football tournament to date;
- The **John Lewis Partnership** (including Waitrose and John Lewis) has committed £1 million to support local good causes helping children and families over the summer. The shops are linking in to the Holiday Activities and Food Programme in areas across the UK providing funding for food, places at activity camps and trips plus equipment for fun activities;
- **Morrisons** who have been supporting families on the programme in a range of areas, including food donations to holiday clubs in Northumberland, and food parcels for families in areas including Bexley, Birmingham, Somerset and Hertfordshire; and
- **Co-op** supporting holiday clubs through providing recipe boxes in Walsall, ingredients and recipe boxes in Dudley, 2,800 meals via food boxes to vulnerable families in Shropshire and more.

The roundtable discussion also covered wider possibilities for how costs for families can be reduced, including on school uniform. New government statutory guidance published last year requires schools to make sure families get value for money on school uniform and PE kit, including by limiting branded items – which can be more expensive – and allowing families to buy most items from high street retail options, including from supermarkets.

Support from external organisations builds on Government investment in the Holiday Activities and Food (HAF) programme, which is backed by over £200 million each year to 2025, to support disadvantaged children in every area across the country in major school holidays.

Over 600,000 children attended HAF clubs last summer, benefitting from nutritious meals and enriching activities, which are targeted towards those who are eligible for free school meals.

The roundtable, chaired by the Education Secretary, included representatives from the Department for Education, Department for Environment, Food & Rural Affairs, and Department for Digital, Culture, Media and Sport. Other attendees included the Government's new Cost of Living Business Tsar David Buttress, and representatives from Morrisons, Co-Op, the John Lewis Partnership (including Waitrose and John Lewis), M&S, the English Football League Trust, Daily Mile, Swim England, Dallaglio Rugby Works, Lawn Tennis Association, Sport England, StreetGames, and Football Association.

Schools will receive the uplifted universal infant free school meals funding, backdated to 1 April 2022. This will raise the rate per meal to £2.41. Full allocations will be published later this month.

Russia cannot be allowed to hold world's food supply to ransom: UK statement to the OSCE

OSCE Economic and Environmental Committee on "The Benefits of Scientific and Technological Co-operation in Promoting Sustainable Agriculture and Food Security"

Last week, the UN Secretary General's [Global Crisis Response Group's](#) report confirmed an unprecedented crisis. It is now a crisis of lack of access to available food, but in six to twelve months' time it may well turn into the first global food availability disaster in over 70 years, because of factors including Russia's war in Ukraine.

The UN estimates that up to 25 million tonnes of grain destined for export remains in storage in Ukraine, with its Black Sea ports blocked and road and rail capacity severely limited.

The World Food Programme has made repeated calls for Russia to allow the re-opening of the ports at Odesa and allow food to flow freely. But they won't.

Responsible not only for the deaths of thousands of Ukrainians and suffocating a vibrant economy, President Putin, through his war of choice and territorial ambition, is choosing to level misery and starvation on millions of vulnerable people around the world. Putin cannot be allowed to hold the world's food supply to ransom, in an attempt to secure the lifting of sanctions that are critical to stopping his brutal war on the innocent people of Ukraine.

Reports from places like Bucha and Irpin revealed evidence that soldiers in the Russian army committed war crimes. We now know that soldiers in the

Russian Army are also common thieves – as we heard earlier, there are multiple reports describing how Russia is stealing thousands of tonnes of grain in temporarily-Russian-controlled areas and destroying silos and agricultural equipment.

The UK, working with international partners, is determined to support countries to mitigate the impact on their economies and their people of rising food prices due to Russia's imperialistic aggression, including by helping Ukraine export its food and play its role as the breadbasket of the world. We are calling on all countries, including in the WTO, to keep food trade flowing. Our sanctions against Russia do not target exports of food supplies for developing countries.

Mr Chair, the situation needs a coherent international response. We must avoid competing initiatives that dilute the collective impact. In this regard, we are fully committed to the [US Call to Action](#) and Germany's [G7 Global Alliance](#) as ways to achieve this. We must stand united against Putin's actions, and with the people of Ukraine who are so bravely standing firm in defence of their own sovereignty.

More business leaders to benefit from Help to Grow: Management scheme

A ground-breaking government scheme to boost the productivity and future growth of the country's business community will benefit even more entrepreneurs from today (Tuesday 14 June).

The Help to Grow: Management scheme offers business leaders 50 hours of leadership and management training across 12 weeks, backed by £220 million of government funding, which covers 90% of the costs involved.

It means for as little as £750 business leaders can benefit from one-to-one support from a business mentor, access to a network of like-minded business leaders, and a bespoke growth plan to help the business reach its full potential.

The scheme offers development opportunities for leaders and their staff, boosting productivity and growing their companies which can lead to more high-skill, high-wage jobs. This is part of the government's commitment to grow the economy to address the cost of living and level up opportunity across the UK, alongside standing behind businesses by cutting fuel duty and raising the Employment Allowance.

Up until today, eligible businesses could only have one participant on the scheme. From today, businesses with 10 or more employees will be eligible to have up to 2 participants join the scheme. Additionally, previous

participants on the Small Business Leadership Programme will now be eligible to join the scheme.

Today it's also announced that top names including Santander, Vodafone and award-winning mentor Herman Stewart have signed up as volunteer mentors to support the Help to Grow: Management course.

Small Business Minister Paul Scully said:

Again and again, business leaders are telling us how much they are benefiting from the Help to Grow: Management scheme both personally, and in the results they see in their companies and from their staff.

By expanding the scheme even further, more and more people will benefit from what Help to Grow: Management has to offer – including within the same business – and more organisations can thrive and grow.

Courses have been running at business schools across the UK since June 2021. Feedback on the training has been excellent, with business leaders reporting they benefit from greater confidence in leading and managing their businesses as a result of their participation.

Participants have included:

Louise Towler, Founder and Managing Director of Indigo Tree, who said:

There is no doubt in my mind that the Help to Grow: Management Course has been instrumental in giving me the confidence to grow my business.

Rosie Boullin-Barrett, the Finance Director of Seacat Services, who said:

I came away feeling absolutely energised, buzzing and positive about being a better leader.

Beverley Lewis, CEO of Welsh Triathlon Limited, who said:

No matter where you are in your leadership journey, you will get a lot out of the Help to Grow: Management Course. I don't know anybody that would have done the course and not come away with something valuable.

Chris Reeks, Founder and Director of Fentrade Aluminium, who said:

I would definitely recommend the Help to Grow: Management Course. The opportunity to be in a room with people in the same position as me, trying to grow their businesses, wanting to take the next step but not being quite sure how to do it, was really valuable.

Geoff Wilkinson, Managing Director of Wilkinson Construction Consultants Ltd, who said:

I know for a fact that I'm going to be going back to the things that we've learned on this course.

While access to the scheme is widening, other Help to Grow: Management eligibility criteria will remain the same. For example, the applicant must still be a senior decision maker such as a Chief Executive or Finance Director, and any business must employ between five and 249 people to send at least one employee.

The Help to Grow: Management scheme sits alongside the Grow: Digital scheme.

Under Help to Grow: Digital, eligible businesses can receive discounts of up to £5,000 off the retail price of approved Digital Accounting and CRM software from leading technology suppliers. This software helps them to manage their finances and build customer relationships, ultimately helping businesses to scale up.

Find out more about the [Help to Grow schemes on the dedicated website](#).
